Recommended Plan – Highlights

August 2022

The Dawson Planning Region

The Dawson Planning Region¹ is in the west central part of Yukon and is about 39,854 km² or 10% of Yukon. Three highways go through the region as well as the Yukon River. The population is 2220 (2017) which is 5.7% of Yukon's total population. The City of Dawson is the main settlement area.

The Government of Yukon manages the public land in the region and Tr'ondëk Hwëch'in have 135 parcels of settlement land. These are the two Parties to the Plan and they will be jointly responsible for making it work.

The First Nation of Nacho Nyäk Dun and Vuntut Gwitchin First Nation, have overlapping traditional territory and White River, a non-self-governing First Nation under the UFA, have identified a land selection in the Region.

The region has a thriving community and cultural landscape, and has healthy ecosystems that support a wide variety of fish and wildlife.

The Dawson Region boasts many opportunities and activities in mining, forestry, agriculture, tourism, trapping, big game outfitting, subsistence harvesting and fishing.

The Tr'ondëk Hwëch'in, as well other First Nations, have lived and travelled in the area Hwëch'in for generations. It is a place of immense importance as Tr'ondëk identity, culture, beliefs, traditions and practices are rooted in the land.

The region is of global archaeological and paleontological interest because of its beringian and Gold Rush Past

¹The City of Dawson (and surrounding communities), Tombstone Territorial Park, and Klondike National Historic Sites are not in the scope of the regional plan.

This booklet introduces the Recommended Plan for the Dawson Planning Region and presents some of its key ideas. The full version of the Recommended Plan can be found at dawson.planyukon.ca

This Recommended Plan was written by the Commission based upon feedback they received on the Draft Plan in 2021. It is their best attempt to reflect community values, and to meet the objectives of Chapter 11 of the Tr'ondëk Hwëch'in Final Agreement.

Plan Concepts

Vision

The Plan is based upon the concept of *"On the land we walk together - Nän käk ndä tr'ädäl"* which highlights the shared responsibility that we all must be stewards of this region. The future of the region will include a diverse economy, rich cultural legacy, healthy environment with shared and respectful use of natural resources.

Based on the Party, public, and Plan Partner feedback more work was needed to better address some important concepts throughout the Plan.

Umbrella Final Agreement Alignment

The Recommended Plan is an important step towards the implementation of the Tr'ondëk Hwëch'in Final Agreement and First Nation reconciliation. The Recommended Plan made stronger connections to the First Nations Final Agreements.

Traditional Knowledge and Tr'ondëk Hwëch'in culture and values

The important differences between Tr'ondëk Hwëch'in's ancestral responsibility to the land and community stewardship is highlighted. Tr'ondëk Hwëch'in culture and values are woven more deeply throughout the Recommended Plan.

Climate change

The potential impacts of and mitigations for climate change are considered in more depth in the Recommended Plan.

Key Recommendations

Access: Careful and responsible development of roads and trails.

Caribou: A mix of protection and limits to development in critical habitat and migration corridors.

Conservation Priorities: Recommendation for legal protection of five areas to preserve wilderness value and wildlife habitat.

Culture and Heritage: The rich history of the region is celebrated and cultural and heritage resources preserved, including a healthy, connected landscape.

Cumulative Effects: A Framework and thresholds for indicators (surface disturbance and linear feature density) are recommended to provide a way of understanding and monitoring activities in the Region.

Implementation: Emphasis on co-management and the Parties working together and with stakeholders and the community to implement the plan is encouraged. The Commission is recommended to continue after plan approval to monitor progress, conformity checks, and play a role in sub-regional planning.

Mineral Development and Exploration: Available land for placer and quartz exploration and mining, continued development of existing claims in protected areas and support for new reclamation guidance.

Stewardship: The introduction of Integrated Stewardship Areas in the land designation system, and creation of a Dawson Land Stewardship Trust for ongoing practice of stewardship.

Traditional Knowledge: The rich knowledge held by the Commission, Tr'ondëk Hwëch'in citizens, and the community guided the direction in the Recommended Plan, and should continue to guide the implementation of the Plan.

Wetlands: Recognition of wetlands and their ecological importance including development limits in rare and sensitive wetland types.

What is Stewardship?

Stewardship as it is lived and understood by Tr'ondëk Hwëch'in is an ancestral and spiritual responsibility to live with the land 'in a good way'. More broadly, 'community stewardship' is about having a sense of responsibility to the land, water, and animals.

Land Designation System

There are 21 Landscape Management Units (LMU) in the Recommended Plan, and each are assigned one of the following land designations:

- ① Integrated Stewardship Areas 1-4 (ISA)
- ② Special Management Areas (SMA)
- ③ Sub-regional Planning Areas
- ④ Community Area

The Recommended Plan also uses overlays to identify LMUs that have specific values that need to be managed for:

Caribou Stewardship Overlay
Wetlands Stewardship Overlay
Highway Corridors

Some of the LMUs have been recommended for a temporary (interim) withdrawal from mineral staking. Because of their environmental and cultural values, these areas need special attention and new guidance before the withdrawals can be removed, such as new reclamation or access plans. These areas are:

LMU 7 – Wehtr’e (Antimony)
LMU 17 – Nän Dhòhdäl (Upper Indian River Wetlands)
LMU 21 – Wëdzey Tay (Fortymile Caribou Corridor)

A map of the region is on the next page.

Data sources: Maps in this series include base and thematic data provided by MRCAN, Yukon Government, Tr'ondëk Hwëch'in Government, US National Parks Service, Ducks Unlimited Canada, YLPC, WYPC, or DRC. **Data disclaimer:** This map is a graphical representation depicting the approximate site configurations and spatial relationships of geographic features. Some datasets have specific disclaimer notices from the data provider. While great care has been taken to ensure the best possible quality, this document is not intended for legal descriptions nor to calculate precise areas, dimensions, or distances. It is possible for errors, omissions, and inaccuracies occur in these data which is beyond our control. Wildlife Key Areas (WKA) are compiled by the Yukon Department of Environment WKA Inventory Program (2014 and 2016), against 1:250,000 NTDB from various data sources. Key Areas are based on observed locations of wildlife at key times of year, not on habitat assessment. With new information, boundaries and designations of Key Areas can change and additional Key Areas can be identified. Furthermore, Key Areas are not the only sites important for wildlife for reasons outside the scope of the WKA Inventory Program. Updates to Key Areas occur only periodically. For the most current information, please consult with the Regional Biologist for your area of interest. If you have questions or would like to contribute to the WKA database, please contact the WKA Inventory Program. Digital copies of this map may be obtained from the Dawson Regional Planning Commission and the Yukon Land Use Planning Council websites at dawsonplanning.ca and www.alaska.gov.
