28 February 1969
Mr. Mayo/cd/863-6291

Subject DF dated 14 February 1969 is rewritten per advice of JAG office as follows:

Inasmuch as the subject project in a maintenance contract to be accomplished entirely in Canada, it is recommended that the advertising for bidding be limited to Canadian contractors.

It is felt that the award of a contract with material purchase to Canadian commercial interests will cement relations with officials of that Government as well as to enlist from them a measure of responsibility. Therefore, for the best government interest, it is requested that solicitation be limited as stated above.
