Address reply to
Commissioner of Yukon Territory

WHITEHORSE, Y. T.
May 3, 1956

Colonel Carl Y. Farrell,
District Engineer,
Corps of Engineers, U. S. Army,
Alaska District,
Anchorage, Alaska

Dear Colonel Farrell:

I enclose a copy of a memorandum from the Forest Engineer which I thought might interest you and which indicates that you have cooperated most admirably in rectifying the jet fuel spillage on the Alaska Highway.

Colonel Allen was in the other day and together with Mr. Wilson we discussed his plan for covering the residual danger areas with a chemical in either the form of powder or liquid, the type to be determined after experiment. We concur Colonel Allen's recommendation and trust that you will implement it as soon as possible.

With kindest personal regards, I am,

Very sincerely,

/s/ F. H. Collins
