10 February 1954

Brigadier General E. G. Shingler
Division Engineer, North Pacific Division
500 Pittock Block
S.W. Tenth Avenue & Washington Street
Portland 5, Oregon

Dear Gen:

As indicated in your letter of 28 January 1954, your decision to advertise for welding inspection for the Alaska Pipeline and to employ an expert to review specifications prior to advertising is advisable.

I have followed the question of Housing at Haines with G4 and find as late as yesterday they were considering the cost data in order to back up their pending decision approving the construction by the District at Haines Terminal. They are favorable to the construction and are fortifying their data so that a positive reply may be made to Congressional inquiry if any develops as a result of their decision. We will keep you advised on the progress of approval.

RICHARISON

Sincerely yours,

CAREY
