Yukon Geographical Names Program  
Tourism and Culture

## Yukon Geographical Place Names Program

The Yukon Geographical Place Names Program manages naming and renaming of Yukon places and geographical features. This includes lakes, rivers, creeks and mountains.

Anyone can submit place names that reflect our diverse cultures, history and landscape.

## Yukon Geographical Place Names Board

The Yukon Geographical Place Names Board (YGPNB) approves the applications and recommends decisions to the Minister of Tourism and Culture. The YGPNB meets at least twice a year to decide upon proposed names. The Board has six members appointed by the Minister of Tourism and Culture, three of whom are nominated by the Council of Yukon First Nations.

## Yukon Geographical Place Names Database

The Heritage Resources Unit maintains and updates the Yukon Geographical Place Names Database of over 6,000 records. The Unit administers the program for naming and changing the names of Yukon place names and geographical features such as lakes, rivers, creek and mountains, approved by the Minister of Tourism and Culture, based on recommendations of the YGPNB.

## Guiding Principles

The YGPNB bases its decisions on whether to recommend or rescind a particular place name to the Minister of Tourism and Culture on a number of principles and procedures first established by the Geographic Names Board of Canada.

- First priority shall be given to names with long-standing local usage by the general public, particularly indigenous names in the local First Nation language.
- The board has no jurisdiction over the names of municipalities, parks, territorial divisions, or other legal bodies that have been created by, or result from, legislation.
- Naming for rivers, lakes, creeks, and other physical features shall be used for the entire feature. In other words, you would not call the Yukon River one name at Whitehorse and another name in Dawson.
- Proposals to name a place or geographical feature after a specific person shall show that the person to be commemorated has contributed significantly to the area where the feature is located. In most cases, personal names may be given to geographical features only after a person's death.
- When proposing names for previously unnamed features—those for which no local names exist—preference shall be given to names from native languages, names that describe the feature, name associated with historical events, and names of people who have made an important contribution to the area where the place name is proposed.
- Geographical names shall be recognizable words or acceptable combinations of words, and shall be in good taste. Names that are discriminatory or derogatory for the point of view of race, sex, colour, creed, or political affiliation shall not be accepted.
- The spelling and accenting of names shall agree with the rules of the language in which they were written.

## Yukon's Place Names Review Process

Place name applications are submitted to the Yukon government's *Heritage Resources Unit*, a component of Cultural Services Branch within the Department of Tourism and Culture.

Processing place name applications in a timely manner is a priority of the YGPNB. However, the speed with which a place name application is processed is dependent on a number of factors that include:

- Completeness of the application when submitted to the Yukon Toponymist (L-1), Heritage Resources Unit, Cultural Services Branch;
- Whether the place name site is on First Nation traditional or Settlement Lands; on federal or territorial lands;
- Whether the place name site identified is located within a park;
- Whether the location of the place name site has been accurately determined (to the nearest second);
- Whether the historical or cultural backgrounds have been given.

## Naming Features on Settlement Lands

Under the Land Claims Final Agreement, the YGPNB is directed to consider the following procedures when reviewing place name applications on Settlement Lands:

- When considering the naming or renaming of place names or features located within the traditional territory of a Yukon First Nation, or when acting with a federal agency where joint jurisdiction over the naming of the place or feature exists, the YGPNB shall consult with that Yukon First Nation or federal agency.
- A Yukon First Nation may name or rename geographical features on Settlement Land and such names shall be deemed to have been approved by the YGPNB.
- Traditional indigenous place names shall be included to the extent practicable and in accordance with map production specifications of Canada on revised maps of the National Topographic System (NTS).

## Inquiries Concerning Yukon Geographical Place Names

For information concerning geographical nomenclature in Yukon, or information about the activities and mandate of the Yukon Geographical Place Names Board please contact:

## Definitions

**Official Name** - means a geographic name, which has been approved by the Minister of Tourism and Culture upon recommendation of the YGPNB. Only Official Names will be produced in official publications in either traditional or electronic forms.

**Alternate Name** - means a geographic name, which has been approved by the Minister of Tourism and Culture upon recommendation of the YGPNB, and which is different from the official name and which is in common and/or local use. Officially recognized Alternate Names facilitate the preservation of First Nation languages. There can be up to four Alternate Names for one feature.

## Map Reference

The purpose of this column is to assist the user when a map is required. The map is at the 1:50,000 scale, being the largest scale of the NTS available for the majority of Yukon.

It should be noted that some of the names in the Gazetteer of Yukon may not be found on the referenced 1: 50,000 map. This may occur because of congestion of named features, the small size of the named feature at that scale, or because the name was approved after the publication of the current edition of the map.

## General Information

The information contained in this volume of the Gazetteer of Yukon has been produced from the Yukon Geographical Place Names Database.

In an effort to remain receptive to our clients' needs, your comments concerning this volume are welcome. If you have any suggestions or criticisms on content, style or presentation, please contact us at the following address: Yukon Toponymist (L-1), Government of Yukon, Box 2703, Whitehorse, Yukon, Y1A- 2C6, or Toll Free 1-800-661-0408 ext. 3099 or [geographical.names@gov.yk.ca](mailto:geographical.names@gov.yk.ca)
