Moose Late Winter Habitat Selection

- High Habitat Selection Probability
- Moderate Selection Probability
- Low Selection Probability
- Nil (No Habitat)

- Secondary Road
- Contour
- Watercourse
- Waterbody

**Mount Nansen Project Area
Moose Late Winter Habitat Classification**

1:50,000 Topographic Spatial Data: Canvec and digital elevation model provided by Geomatics - Yukon Government via online source (Corporate Spatial Warehouse) www.geomaticsyukon.ca.

Project data displayed is site specific. Data collected by EDI Environmental Dynamics Inc. (2011) was obtained using Garmin GPS technology.

The habitat selection data were provided by Simon Lapointe (Site Planning and GIS) and further refined by EDI for the purposes of this project.

This is not an official land survey and the spatial data presented is subject to change.
