

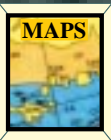

Figure 13:

Parts of southeastern Coast and northwestern Cascade mountains showing correlative (?) terranes and rock units that span the physiographic boundary between the two (delineated by the Fraser River) and locations of **stops 1-1, 1-2, 1-3 and 1-4**. Tentative correlations: HL Harrison Lake terrane = HL (Stollicum Schist); EL Elbow Lake Formation = EL (Cogburn Group = ? Bridge River terrane); S Shuk-san and Darlington Phyllite = S? Settler Schist; Geographic localities: CkR. Chilli-wack River; CmR, Cheam Range; MS Mount Shuksan; OS, Old Settler; RbC, Ruby Creek; RtC, Ruth Creek; WC, Wa-hleach (or Jones) Creek. Figure adapted from Monger, 1991a).
