INTRODUCTION

This index of publications issued mainly in 1964 continues from where Paper 64-3 left off. These two papers and the two previous supplements, together with the index by A.G. Johnston provide a complete index of publications issued by the Geological Survey of Canada up to the end of 1964.

It contains also a list of papers by officers of the Geological Survey published in various scientific periodicals.

Publications issued by the Geological Survey of Canada comprise maps and printed reports. Maps include basic geological maps and special maps such as those dealing with mineral areas, geophysical observations, groundwater, oil and gas, and geochemical studies. Reports are of several categories:

Memoirs - Comprehensive reports on the geology of specific areas.

Bulletins - Detailed scientific studies on any geological or related subject.

Economic Geology Reports - Comprehensive studies of economic interest on a broad regional basis.

Preliminary Series - Designed for the prompt publication of geological information of immediate practical interest.

Requests for geological maps or information on specific areas or topics should be addressed to:

The Director, Geological Survey of Canada,
Department of Mines and Technical Surveys,
Ottawa.

Requests for specific reports should be addressed to the Geological Survey as above, or to the Queen's Printer, Ottawa.

Branch offices of the Geological Survey in Vancouver, Calgary, Whitehorse and Yellowknife maintain limited stocks of reports for the convenience of local residents.

Lists of publications showing geological maps and reports for each province are available without charge.

Notification service - Regular users of Geological Survey publications who wish to receive announcement cards of all publications as issued may do so by writing to the Geological Survey. Please state clearly your name and permanent mailing address when requesting this free service.

A complete index of all reports and maps with references and geographic area covered by each publication according to the National Topographic System is provided in:

Index of Publications, Geological Survey of Canada (1845-1958)	(\$4.00)
Supplements for (1959-60), (1961-62), (1963)	(.35)
