May 8/92

Weather Cloudy

Day
(5)

Walked up Benson Creek North side

(4)

panning & sampling approx 4 miles

try south side to morrow 1 to 2 specks
of gold in every 8 pans of panning

See Sketch #1

Day
(6)

May 9/92

Weather Sunny

(5)

went up south side of Benson Creek

try panning got a few colour

past sec cabin on sand bar

See Sketch #1

Day
(7)

May 10/92

Weather sunny

(6)

panned some down stream to

North Klondike River got 1 speck of gold
at old cabin on Benson Creek

~~is~~ a lot of ice in spots on

Creek see sketch #1

May 11/92

Weather sunny

Day 8
Went to Whitehorn to pick up Cliff
Crain, for Helper to put some Holes
down.

May 12/92

Weather Cloudy & sunny

Day 9
arrived at Mcquesten River at 10: PM
stayed over night fixed pump ~~at~~ for
water with Cliff as Helper.

CLIFF Crain Day 1 Helper \$100.00 per day

Day 10
May 13/92.

Weather Rain showers

to Dempster at Bensom Creek, start
work on Hole #1 got approx 2 ft down.
Hole 4x4 approx. see sketch #1

May 14/92

Weather Cloudy some sun.

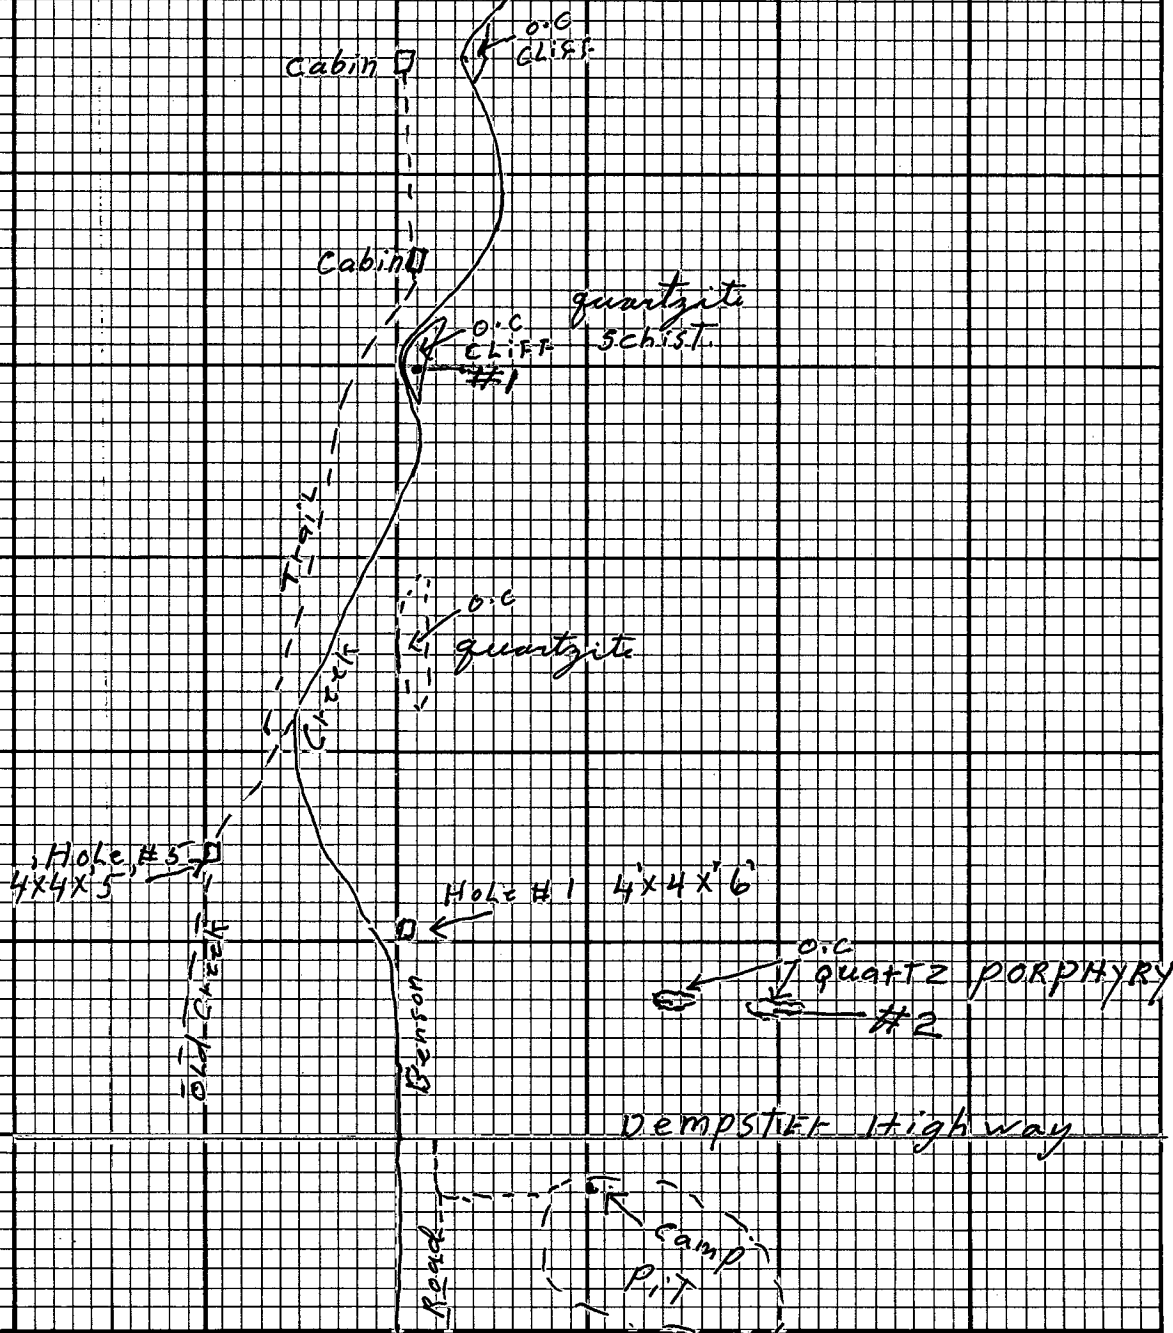

Day 10
went up south side of creek to
hole #2 worked on it all day
Drove from the surface down. Bilt
fire to throw out ground. see sketch
#1

BENSON CREEK

Gravel & Sand Bay

Scale 1 inch = 400 ft.

Rock sample # 1-2

May 15/92 weather Cloudy & sunny intervals

Day 11
worked on Hole #1 & #2 put samples
through small sluic Box. Not too much
luck, no gold specks.

Day 12 May 16/92 weather snow & ^{Cold} Rain showers

went up North side of Creek to Hole #3
spent all day Burning to through out ground

Day 13 May 17/92 weather sunny showers
in late after Noon 5:30 PM.

worked on Hole #3 panned out
samples 2 small specks of gold.

Day 14 May 18/92 weather sunny

cliff worked on Hole #1 & #2.

I checked Rock ~~so~~ ground area
mostly quartzite to Schist or Slate
see sketch on opposite page.
BENSON CREEK

May 19/92

weather Cloudy & sunny int.

Day
(15)
Went to creek north of Benson on old
Trail good gravel put Hole down approx
10 ft the Bank made bin cut down
By Cat about 4' ft we got down about 6 ft
put about 60 shovels of gravel through sluice
Box, panned out Tailings got Nothing.

SEE sketch #1

May 20/92

weather cold Rain showers.

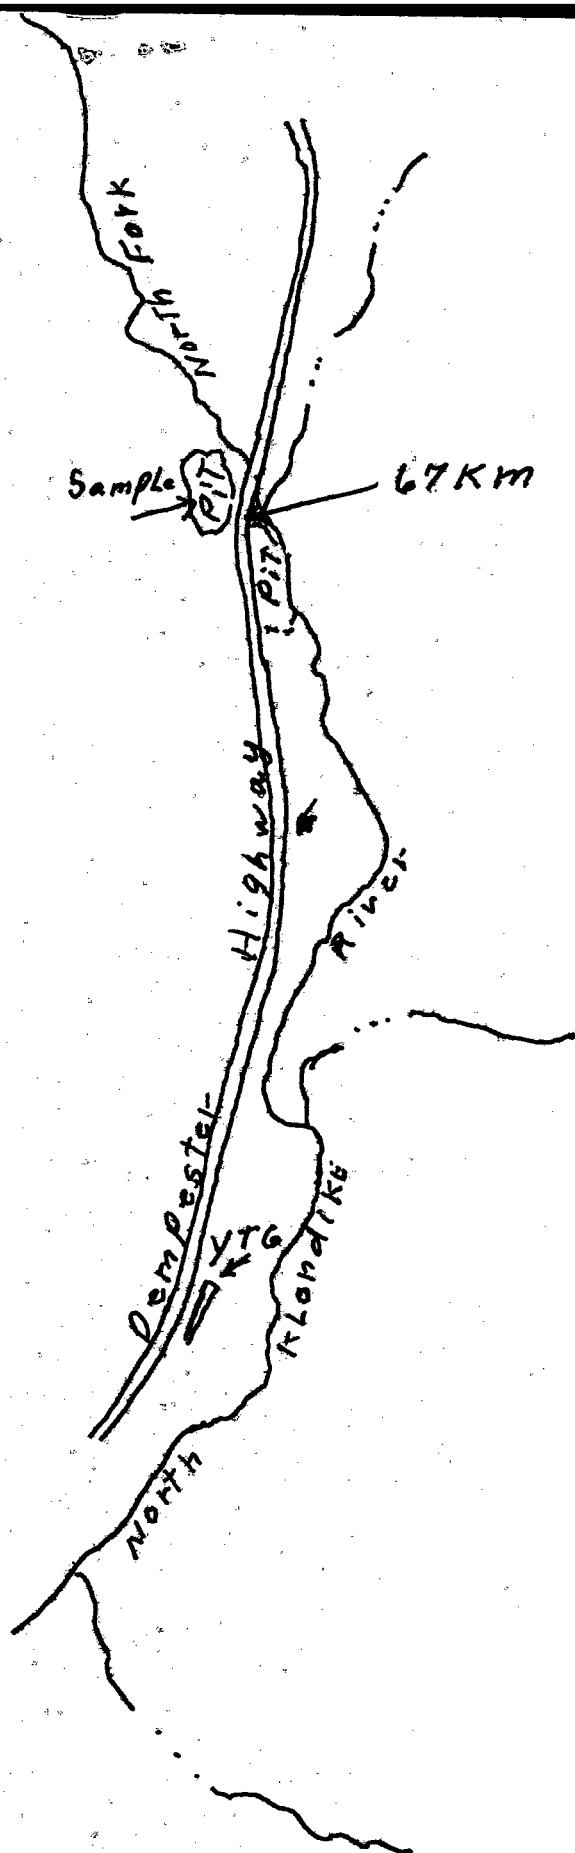

Day
(16)
Working on Hole #5 tried Hand
steel ing & blasting no luck Blast
ing only let water in to Hole,
got down about 5 ft. got a few specks
of gold using fine mesh glass to see
them.

SEE sketch #1 or

Benson Creek 400 ft scale

Map SHEET 116B-8

Scale
 $\frac{1}{2}$ mile to 1 inch
Sketch # 2

May 21/92 weather Cloudy sunny intervals

Day
(17) Finished Hole #1 & 2 approx 4'x4'x6 ft
(17) got a couple of specks of gold on #2
Hole very small. Might try to
get down deeper later on.

May 22/92 weather Rain showers

Day
(18) Panned out some samples got from
(18) gravel pits. No results. pits.

North of Benson Creek on sketch #1
went to Dawson for gold show. at 6:PM

Day
(19) May 23/92 weather sunny & warm

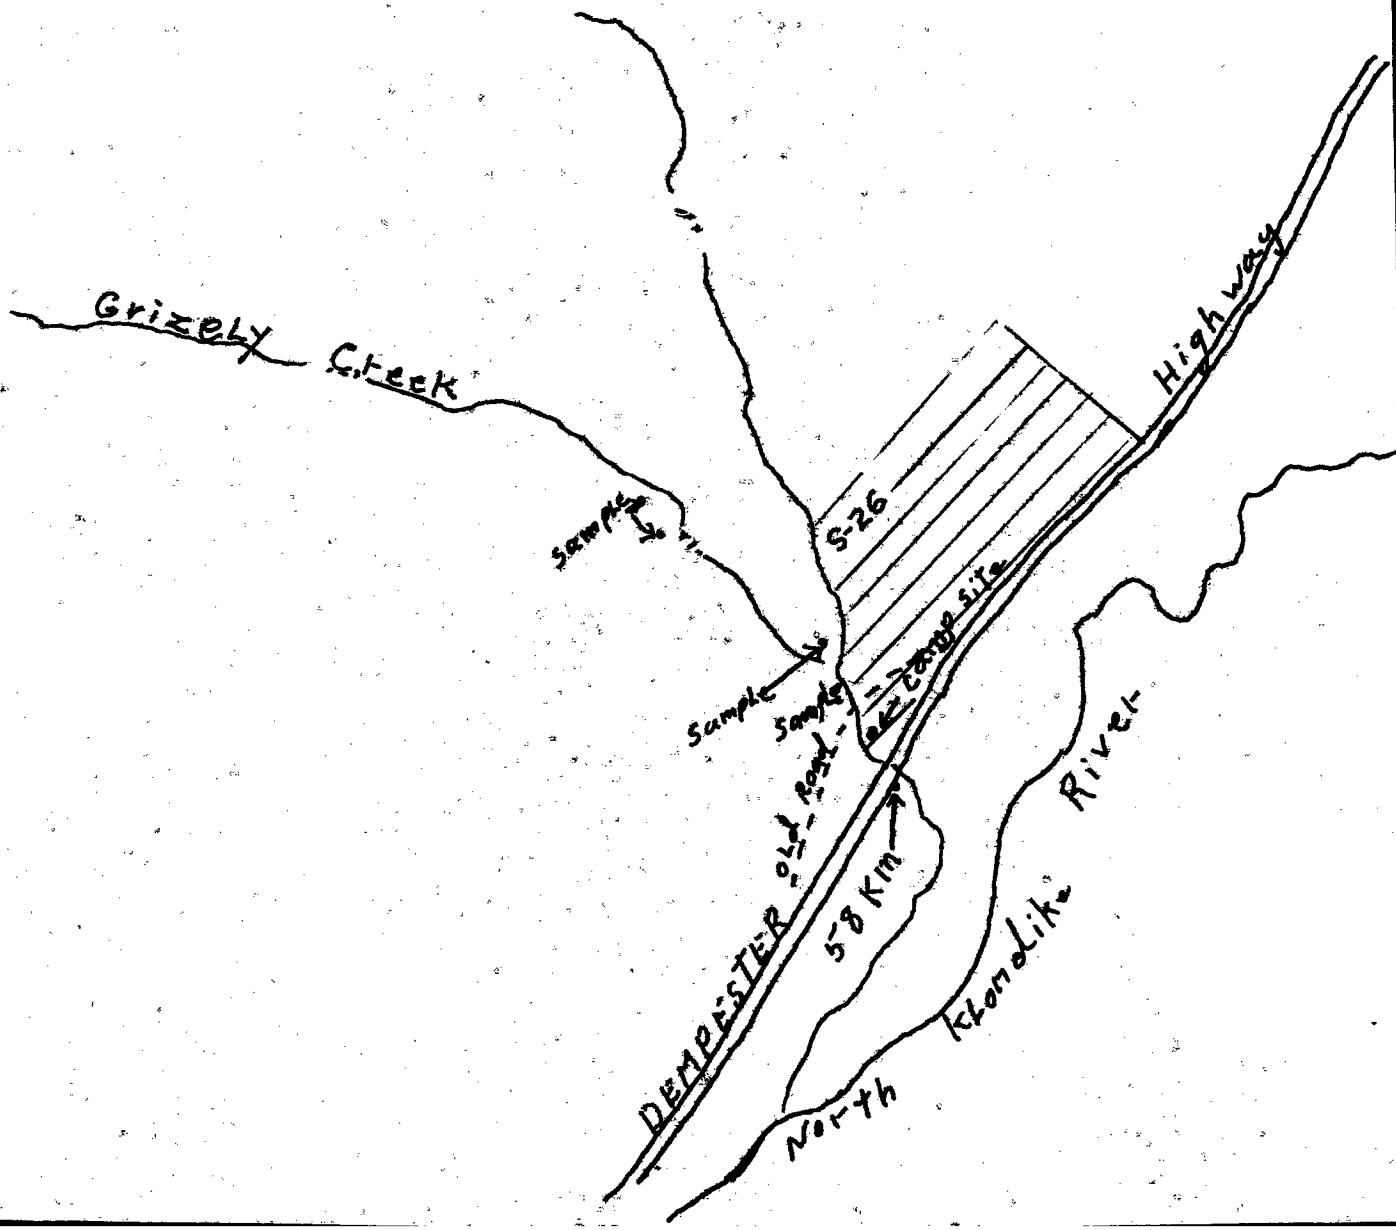

20 in Dawson seen gold show - Not
two good. left at 12 noon Back
up the Dempster to North Klondike
fork 67 Km on Highway Marker's.
a lot of snow past 67 Km. Camped
at pit. see sketch #2

MAP SHEET 116B-8

Scale $\frac{1}{2}$ mile To 1 inch.

Sketch # 3.

May 24/92 weather sunny & warm

Day
(20)

sampled Grizely Creek, got a few specks
of gold quite a bit of black sand
creek got high water, will likely
try south of Road later on. see
Sketch # 3

Day
(21)

May 25/92 weather Cloudy sunny intervals
sampled Wolf Creek got good blow
small specks of gold in most parts. 2 to 3
specks. put about 60 shovels through
 sluic Box got about 12 flakes of gold.
that was an RS 24 land. panned up
above approx 3000' ft. got small specks of gold
I will go up later on to approx 2 mile
too much snow at present.

see sketch on next page

Sketch # 4

May 29/92

weather sunny Clouding over
Rain in afternoon 3:30 PM.

Snow starting to melt water getting quite
High Klondike is flooding worked on
Peasoup Creek took samples up stream
to approx $\frac{3}{4}$ of a mile no results.

Out camp on Peasoup Creek approx 900' ft
up stream it is a quartzite with Bed
quartz veins in it. also a Big
Cabin 500 ft up stream on north side
claim is staked By Eric Anderson
Feb 8/92, First good claim line
I seen up this way. Started Hale
on East side of Highway.

See Sketch # 5

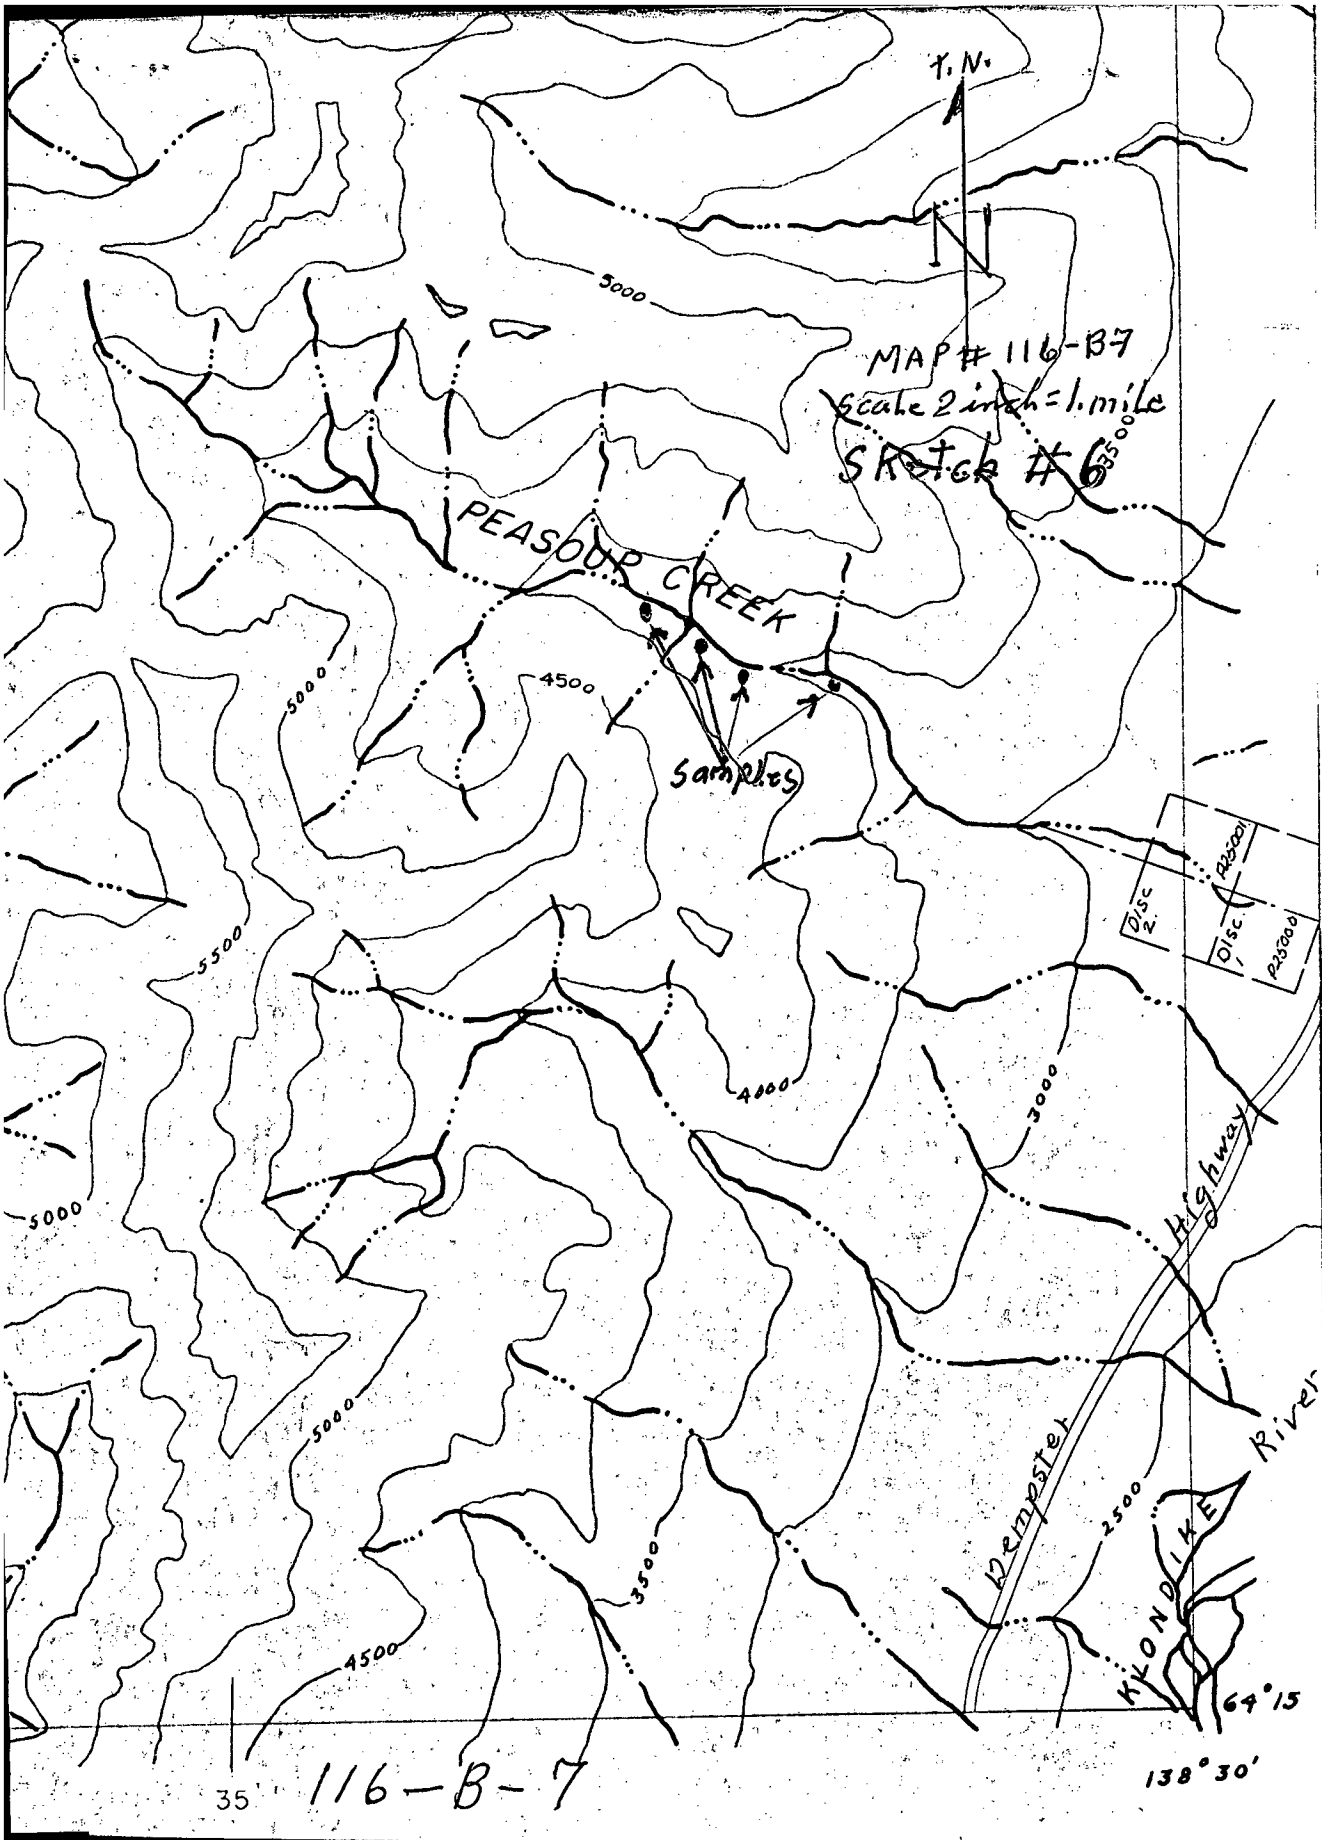

May 30/92 weather Rain all night
& most of day showers.

Day

(26)

(25)

Worked on Hale across Highway

got down about 4 ft got some samples
No gold, got flooded out Klondike
Came up about 2 ft in after noon
panned out samples at camp;
SEE sketch #5

Day
(27) May 31/92 weather cloudy sunny intervals
tried walking up Peasoup Creek got
about 2 miles to much snow some dips
got about 14 in^{h's} in them took samples
3500 level up Has. still got a lot
of snow in places. panned samples
out at camp results nil a
fair amount of Black sand.
cleaned out Camper & truck
to look clean there was about
a 6 vehicle on the Highway.
water getting high all over.

SEE sketch #6

McQuesten to Whitehorse.

I am going back up to McQuesten
River & Slough Creek, for an
Sept 17/92 for about 10 days.

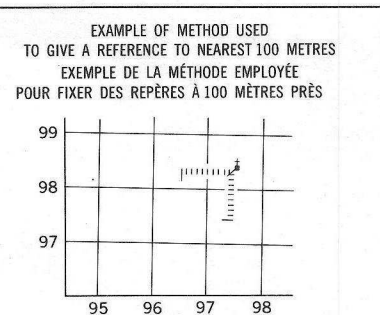

I want to re-sample the white clay
on slough creek.

11 days \$581.35

Balance coming 578.87

GRID ZONE DESIGNATION: DESIGNATION DE LA ZONE DU QUADRILLAGE: 8V	100 000 m SQUARE IDENTIFICATION IDENTIFICATION DU CARRÉ DE 100 000 m
--	---

REFERENCE POINT	CHURCH - ÉGLISE	(as above)
POINT DE REPÈRE		(ci-dessus)

EASTING: Read number on grid line immediately to left of point:	
ABSCISSE: Note le chiffre de la ligne du quadrillage immédiatement à gauche du repère:	97
Estimate tenths of a square from this line eastward to point:	
Estimer le nombre de dixièmes du carré entre cette ligne et le repère en direction est:	5

NORTHING: Read number on grid line immediately below point:	975
ORDONNÉE: Notez le chiffre de la ligne du quadrillage immédiatement en dessous du repère:	98
Estimate tenths of a square from this line northward to point: Estimer le nombre de dixièmes du carré entre cette ligne et le repère en direction nord:	4
GRID REFERENCE:	984
REFERENCE AU QUADRILLAGE:	975984

Nearest similar grid reference 100 000 metres
Le prochain carré similaire est à 100 000 mètres

UNIVERSAL TRANSVERSE MERCATOR GRID
ZONE 8
QUADRILLAGE DE MILLE MÈTRES
TRANSVERSE UNIVERSEL DE MERCATOR

The 1984 MAGNETIC BEARING is $31^{\circ}03'$ (552 mils) EAST of GRID NORTH.

ANNUAL CHANGE DECREASING $6.8''$

GRID NORTH is $1^{\circ}07'$ (20 mils) EAST of TRUE NORTH for centre of map.

Le REPÈRE MAGNÉTIQUE en 1984 est à 31°03' (552 mils)
à l'EST du NORD DU QUADRILLAGE.

VARIATION ANNUELLE DÉCROISSANTE 6,8'

Le NORD DU QUADRILLAGE est à 1°07' (20 mils) à l'EST
du NORD GÉOGRAPHIQUE au centre de la carte.

CONVERSION SCALE FOR ELEVATIONS
ÉCHELLE DE CONVERSION DES ALTITUDES

The scale consists of three horizontal axes. The top axis is for metres, ranging from 0 to 300 with major ticks every 50 units and minor ticks every 10 units. The middle axis is for feet, ranging from 0 to 1000 with major ticks every 100 units and minor ticks every 20 units. The bottom axis is for pieds, ranging from 0 to 1000 with major ticks every 100 units and minor ticks every 20 units. The scales are aligned such that 300 metres corresponds to 1000 feet and 1000 pieds.
