

SHEET II
MAP
OF A PORTION OF THE
YUKON DISTRICT
North West Territory
with the adjacent Northern Part of
BRITISH COLUMBIA
To accompany Report of
George M. Dawson, D.S., F.G.S., etc.
Corrected to January 1898

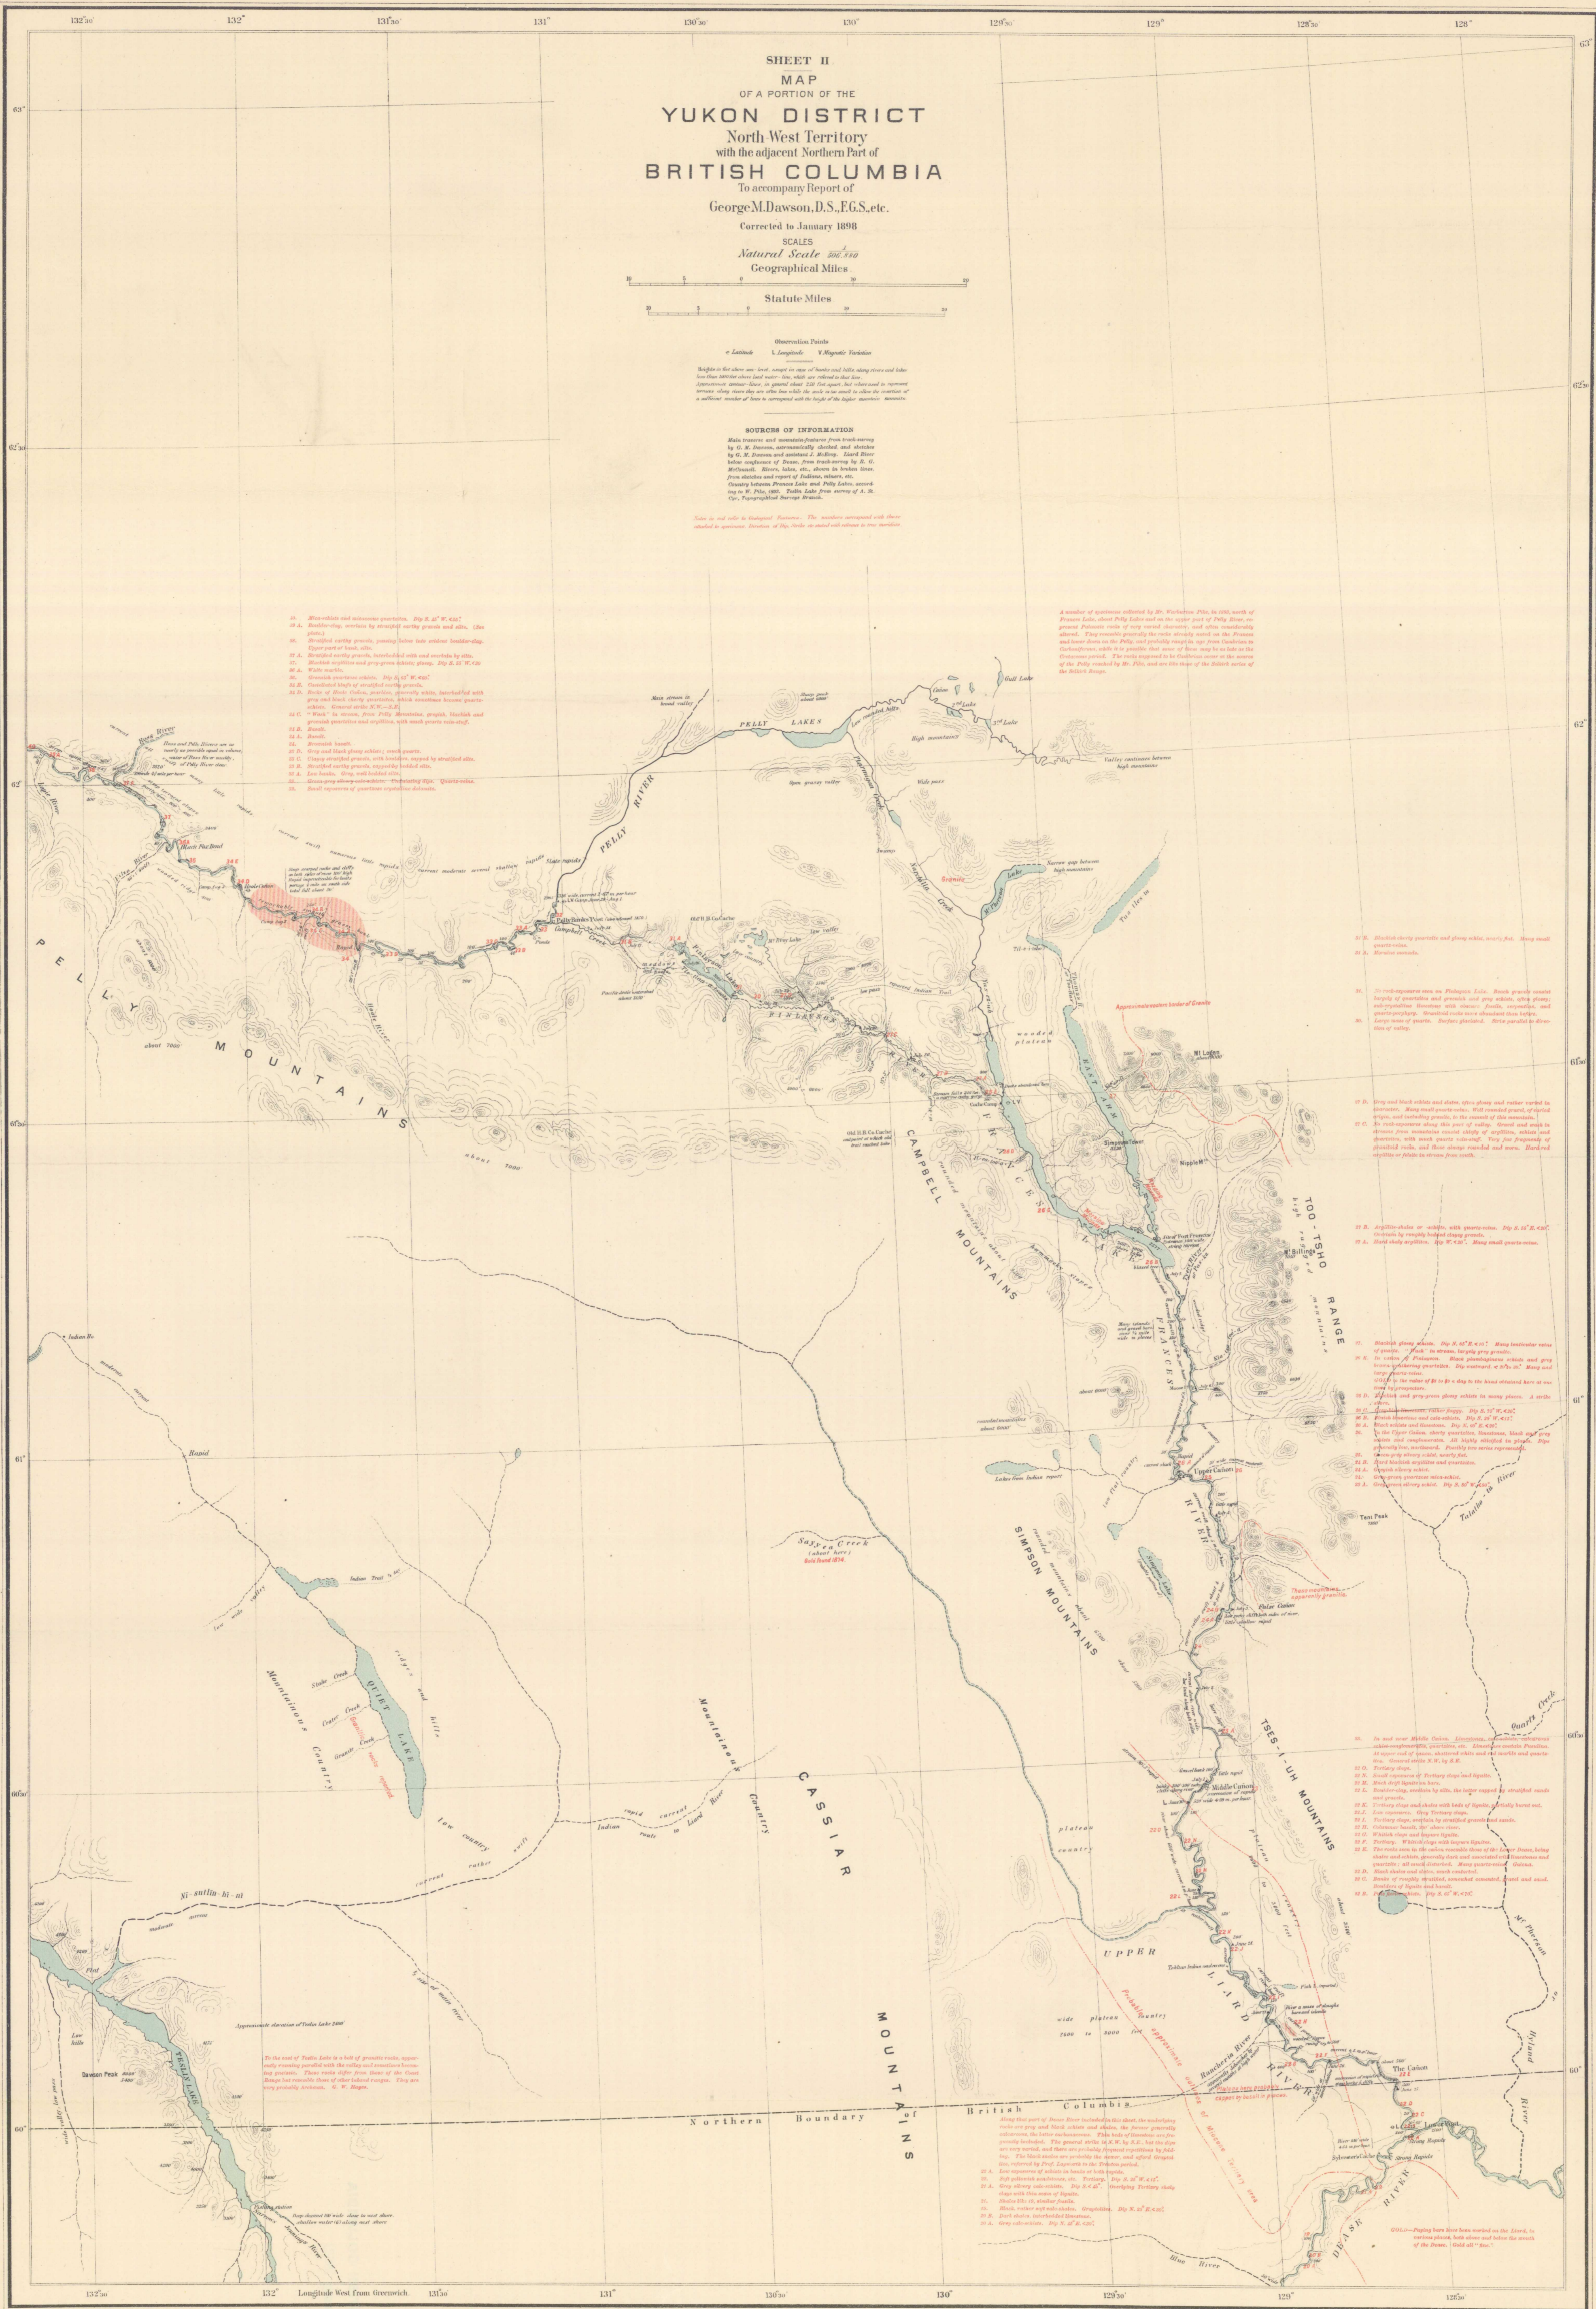

Observation Points
+ Latitude V Longitude V Magnetic Variation

Height in the above map is level, except in case of basins and hills, where contours and lake level are shown above and below, and are referred to the level of the sea. Approximate contour lines are shown at 100-foot intervals, but where the contour interval is less than 100 feet, the contour interval is a sufficient number of feet to correspond with the height of the higher mountains. Mountain

SOURCES OF INFORMATION

Both the map and the accompanying report were prepared by G. M. Dawson, assisted by J. H. Pelly, and corrected by G. M. Dawson and J. H. Pelly. The map was prepared by G. M. Dawson, and the report by G. M. Dawson, J. H. Pelly, and J. W. H. Murray. The map was prepared by G. M. Dawson, and the report by G. M. Dawson, J. H. Pelly, and J. W. H. Murray. The map was prepared by G. M. Dawson, and the report by G. M. Dawson, J. H. Pelly, and J. W. H. Murray.

This is not a geological map. The contour lines are shown in red, and the geological features are shown in black. The map is a geological map of the Yukon District, North West Territory, and the adjacent Northern Part of British Columbia. It shows the topography, including mountains, rivers, and lakes, and the geological features, including different rock formations and their distribution. The map is a detailed geological map, showing the distribution of different rock formations and their relationship to the topography. The map is a geological map of the Yukon District, North West Territory, and the adjacent Northern Part of British Columbia. It shows the topography, including mountains, rivers, and lakes, and the geological features, including different rock formations and their distribution. The map is a detailed geological map, showing the distribution of different rock formations and their relationship to the topography.
