

# Contents

## **State of the art**

- 3 Magnetic surveying instrumentation — a review of recent advances. Peter Hood.
- 32 Semiautomatic methods of interpretation of magnetic data. B.K. Bhattacharyya.
- 46 The use of gravimeter measurements in mining and groundwater exploration. W.E. Strange.
- 51 Application of resistivity methods in mineral and groundwater exploration programs. George V. Keller.
- 67 Ground electromagnetic methods. R.A. Bosschart.
- 81 Airborne electromagnetic methods. S.H. Ward.
- 109 Mining exploration with natural electromagnetic fields. D.W. Strangway and K. Vozoff.
- 123 The induced polarization method. Harold O. Seigel.
- 138 The importance of induced polarization method for the exploration of ore deposits. V.A. Komarov.
- 148 Seismic methods in mining and groundwater exploration. George D. Hobson.
- 177 Radioactive methods in mineral exploration. R.S. Foote.
- 191 Geophysical applications of modern computer systems. G.F. West, F.S. Grant and L. Martin.
- 202 Regional reconnaissance techniques applied to exploration. A.R. Barringer.

## **Geophysics in geological mapping and development of mineral resources**

- 213 The contribution of airborne magnetic surveys to geological mapping. David Boyd.
- 228 AFMAG for electromagnetic mapping. Don B. Sutherland.
- 238 A new gravity anomaly map of Canada: an aid to mineral exploration. M.J.S. Innes.
- 249 Regional geophysical mapping. L.W. Morley.
- 259 The role of geophysics in the development of mineral resources. J.M. Rayner.
- 267 The role of geophysics in the development of the world's groundwater resources. Don R. Mabey.

## **Base metals**

- 275 Exploration for massive sulphides in the Canadian Shield. N.R. Paterson.
- 290 Some recent geoelectrical measurements in the Swedish sulphide ore fields illustrating scope and limitations of the methods concerned. D.S. Parasnis.
- 302 The use of induced polarization measurements to locate massive sulphide mineralization in environments in which EM methods fail. Philip G. Hallof.
- 310 Geophysical exploration methods for nickel. J.S. Dowsett.
- 322 Geophysical aspects of porphyry copper deposits. John S. Sumner.
- 336 Geophysical detection of deeply buried sulfide bodies in weathered regions. William M. Dolan.
- 345 Base metal exploration in the Cordillera. D. Smellie.
- 350 Geophysical exploration of Mississippi Valley - Appalachian type strata-bound zinc-lead deposits. William H. Callahan and H.V. McMurry.

### **Ferrous, radioactive and other minerals**

- 363 Geophysical methods of prospecting and prognostic valuation of iron deposits in the U.S.S.R. M.I. Kiselov, Z.A. Krutikhovskaya and N.G. Schmidt.
- 371 Iron ore exploration in North and South America. Don A. Hansen.
- 381 Iron ore prospecting in Scandinavia and Finland. J. Espersen.
- 389 Current research in the application of natural and induced radioactivity to mineral exploration. Ronald Doig.
- 401 Borehole logging methods for exploration and evaluation of uranium deposits. Philip H. Dodd, Robert F. Drouillard and Carl P. Lathan.
- 416 Airborne radiometric surveying for mineral deposits. R.H. Pemberton.
- 425 The application of geophysics to gold exploration in South Africa. A.T. Roux.
- 439 Diamond prospecting by geophysical methods — a review of current practice. E. Gerryts.
- 447 Exploration for marine placer deposits of diamonds. B.L. Oostdam.
- 462 Neutron activation techniques for precious metal exploration. Frank E. Senftle, Perry Sarigianis and Philip W. Philbin.
- 470 The application of geophysical methods in the exploration for bauxite deposits. E.W. Greig.
- 476 The application of geophysics to exploration for chromite and tungsten. V.A. Klichnikov and V.I. Segalovich.
- 485 Geophysics and asbestos exploration. H.M.K. Conn.
- 492 Logging the Prairie evaporite formation in Saskatchewan. I.P. Norquay and J.T. Costello.
- 497 Geophysical investigations of evaporites in Nova Scotia. D.E.T. Bidgood and J.E. Blanchard.

### **Groundwater**

- 507 Integration of geophysics and hydrogeology in the solution of regional groundwater problems. Zeev Shifftan.
- 517 Integration of geophysical methods for groundwater exploration in the prairie provinces, Canada. D.H. Lennox and V. Carlson.
- 536 Geophysical prospecting for groundwater in the Soviet Union. A.A. Ogilvy.
- 544 The use of seismic refraction and gravity methods in hydrogeological investigations. G.P. Eaton and Joel Watkins.
- 569 A review of some problems of seismic prospecting for groundwater in surficial deposits. K.B.S. Burke.
- 580 Interpretation of geoelectrical resistivity measurements for solving hydrogeological problems. H. Flathe.
- 598 Borehole geophysics as applied to groundwater. W. Scott Keys.
- 615 Resistivity mapping by electromagnetic methods. L.S. Collett.
- 626 Etude par prospection électromagnétique aérienne d'un contact eau douce - eau salée dans le delta du Rhône. P. Baudoin, G. Duruzoy and M. Utard.
- 638 La prospection géophysique et la recherche des eaux souterraines. J.J. Breusse.
- 641 Geophysical studies in permafrost regions in the U.S.S.R. A.A. Ogilvy.

### **National geophysical facilities**

- 651 Geophysics in United Nations projects. J.M. Brown.
- 658 Applied geophysics in the Natural Environment Research Council in Great Britain. K.C. Dunham.
- 667 The organization and role of geophysics in prospecting and exploration for mineral deposits in the U.S.S.R. V.V. Brodovoy, V.A. Gelamkov and V.V. Fedynsky.
- 688 Mining geophysics in India and the role of government in this field. L.N. Kailasam.

### **Human resources**

- 709 Human resources and geophysical exploration (panel discussion). G.D. Garland and D. Mabey, chairmen.
- 721 Author index
