The early change of the North Magnetic Pole renders the magnetic
compass unreliable in this area. Magnetic declination 1950 varies
from 11° 00' westerly at centre of west edge to 29° 00' easterly at
centre of east edge.

La variation directionnelle du pôle Nord magnétique tend à rendre le compas
magnétique peu utile dans cette région. La déclinaison magnétique varie de 11° 00' ouest
au centre de la limite Ouest à 29° 00' Ouest au centre de la
limite Est.
