

Figure 1. The shaded map areas are described in this report. Pre-1984 published geological maps for adjacent regions are labelled¹ [original figure].

¹ Since 1985 regional-scale maps include: Nahanni (Gordey and Anderson, 1993) and Teslin (Gordey and Stevens, 1994), Glenlyon (Colpron et al., 2002), Tay River and Sheldon Lake (Gordey, 2006) and Whitehorse (Gordey, 2008). These and other maps constitute a digital map database of Yukon bedrock geology (Gordey and Makepeace, 2001, 2003).
