

## Appendix 2. Measured stratigraphic sections of Askin group

orcupine	105F/15	61° 45.2'N, 132° 41'W
lount Hogg	105F/8	61° 20'N, 132° 14'W
oole River #1	105G/6	61° 23'42″N, 131° 31'W
oole River #2	105G/6	unknown; prob. near Ragged Pk; 61° 24'N, 131° 35'W
skin Lake	105F/14.	61° 55' N, 133° 09' W
IcConnell River	105F/10.	Top is at 61° 38'N, 132° 37'W
lount Misery	105F/9.	Top is at 61° 37'N, 132° 17'W
vin Lakes	105F/7.	61° 33'N, 132'W
acid volcanic section"	105F/9	top is at 61° 38'N, 132° 22'W

Unfortunately the original logs are lost. Photocopied pages of 3 sections were found and have been assembled here. Cellophane tape that originally held the notebook pages together appear as dark bands in the photocopies. In these dark bands where handwriting could be deciphered the notes are re-typed on white overlays. Transcribed lithologic descriptions are arranged beside them.

Stratigraphic units inserted In the left column are as shown on Figure 20 and the maps. The adjacent column lists sample numbers and photographs - the whereabouts of these are unknown.
