

Destruction Bay Highway Maintenance Section: Sheet 41 (km 1783 to km 1792)

Highway Feature	
AC = Access Points	RC = Rock Cuts/ Slide Areas
BP = Borrow Pits	PO = Pull Out
DNG = Drainage (Roadside Ditch, Run-off Control Structures, etc.)	CV = Culvert
Q = Quarries	MP = Multiplate
RA = Rest Area	BR = Bridge
UC = Utility encroachment /Crossing	IS = Insulated Structure
RS = Road Surface	GS = Granular Source / Stockpile
WX = Wildlife Crossing	

Engineering Component	
US = User Safety (eg. Avalanche / Wildlife Area)	EC = Erosion Control
IC = Icing Control	ECP = Erosion Control Protected by Geotextile
RV = Revegetation (Existing Material, Revegetating & Reclaimed Areas)	WM = Waste Management
SF = Snow Fence (drifting control structure)	OH = Outhouse
SR = Snow Removal	GT = Geotextile / Granular Filters

Environmental Component	
CU = Cultural Use	WQ = Water Quality
HTG = Heritage	REC = Recreation
BL = Boat Launch	WH = Wildlife and/or Wildlife Habitat
FH = Fish and/or Fish Habitat	SV = Scenic Viewing
RCP = Residential / Commercial Property	

Maintenance Advisory System	
Notification	Soil Remediation Advisory
Caution *	Revegetation Advisory
Alert *	Road Surface Advisory
	Caution Bar

Section Specific Features

Notes:
 DB004: Geotextile under embankment.
 DB005: Geotextile under bed, inlet, & outlet channels.
 DB006: Geotextile under embankment & on both sides of highway.
 DB008: Geotextile under embankment.
 DB009: Geotextile under bed, inlet, & outlet channels.
 DB010: Geotextile under embankment.

Surface distortions due to differential settling.
