## INTRODUCTION

This report has been prepared to summarize the short but intensive 2001 work program carried out on Discovery Claim P 23784 located on NTS Map 105 B/14

The Shootamook property has a placer mining history extending back to 1875 as well as a long hardrock exploration history

### Placer History

The Shootamook property is held under Discovery Placer Claim P23784. The claim covers Shootamook Creek and two of its tributaries known locally as Red and Matt Creeks. Red Creek runs from the west into Shootamook Creek and Matt Creek runs from the east into Shootamook Creek. Shootamook Creek flows northward in the area of the tributaries. The confluence of Matt and Shootamook Creeks is slightly upstream from that of Red Creek.

The property was apparently first placer mined by Chief Billy Smith of the Tagish Band in the early 1930s. Hand stacked rocks located on both Red and Matt Creeks as well as flumes, sluice boxes, and two cabins located on Matt Creek are evidence of his work. Mel Holloway has recently excavated an old shaft near where the cabins had been before their destruction during a forest fire in 1991. The shaft probably represents work done by Wolf MacKinnon in about 1945. The shaft went to bedrock at a depth of 40 feet (12 m). A test of the gravels at the bottom of the shaft in 1997 returned gold values of less than \$2.00/yd<sup>3</sup>. The assumption is that the old timers had mined all the gold at this location.

During 1998, 333.7 yd<sup>3</sup> were excavated on the placer claim P 23784 using a John Deere 350 C loader/backhoe. 21 panels of gravel were tested using a gold claimer test plant. Each panel test consisted of ½ to 1 yd<sup>3</sup> of gravel and returned estimated gold values from \$1.00 to \$4.25/yd<sup>3</sup>.

The testing done in 1999 resulted in the discovery of a pay streak which crosses Matt Creek at the sharp bend in the creek approximately 400 ft (122 m) upstream of the Winnie hardrock showing.

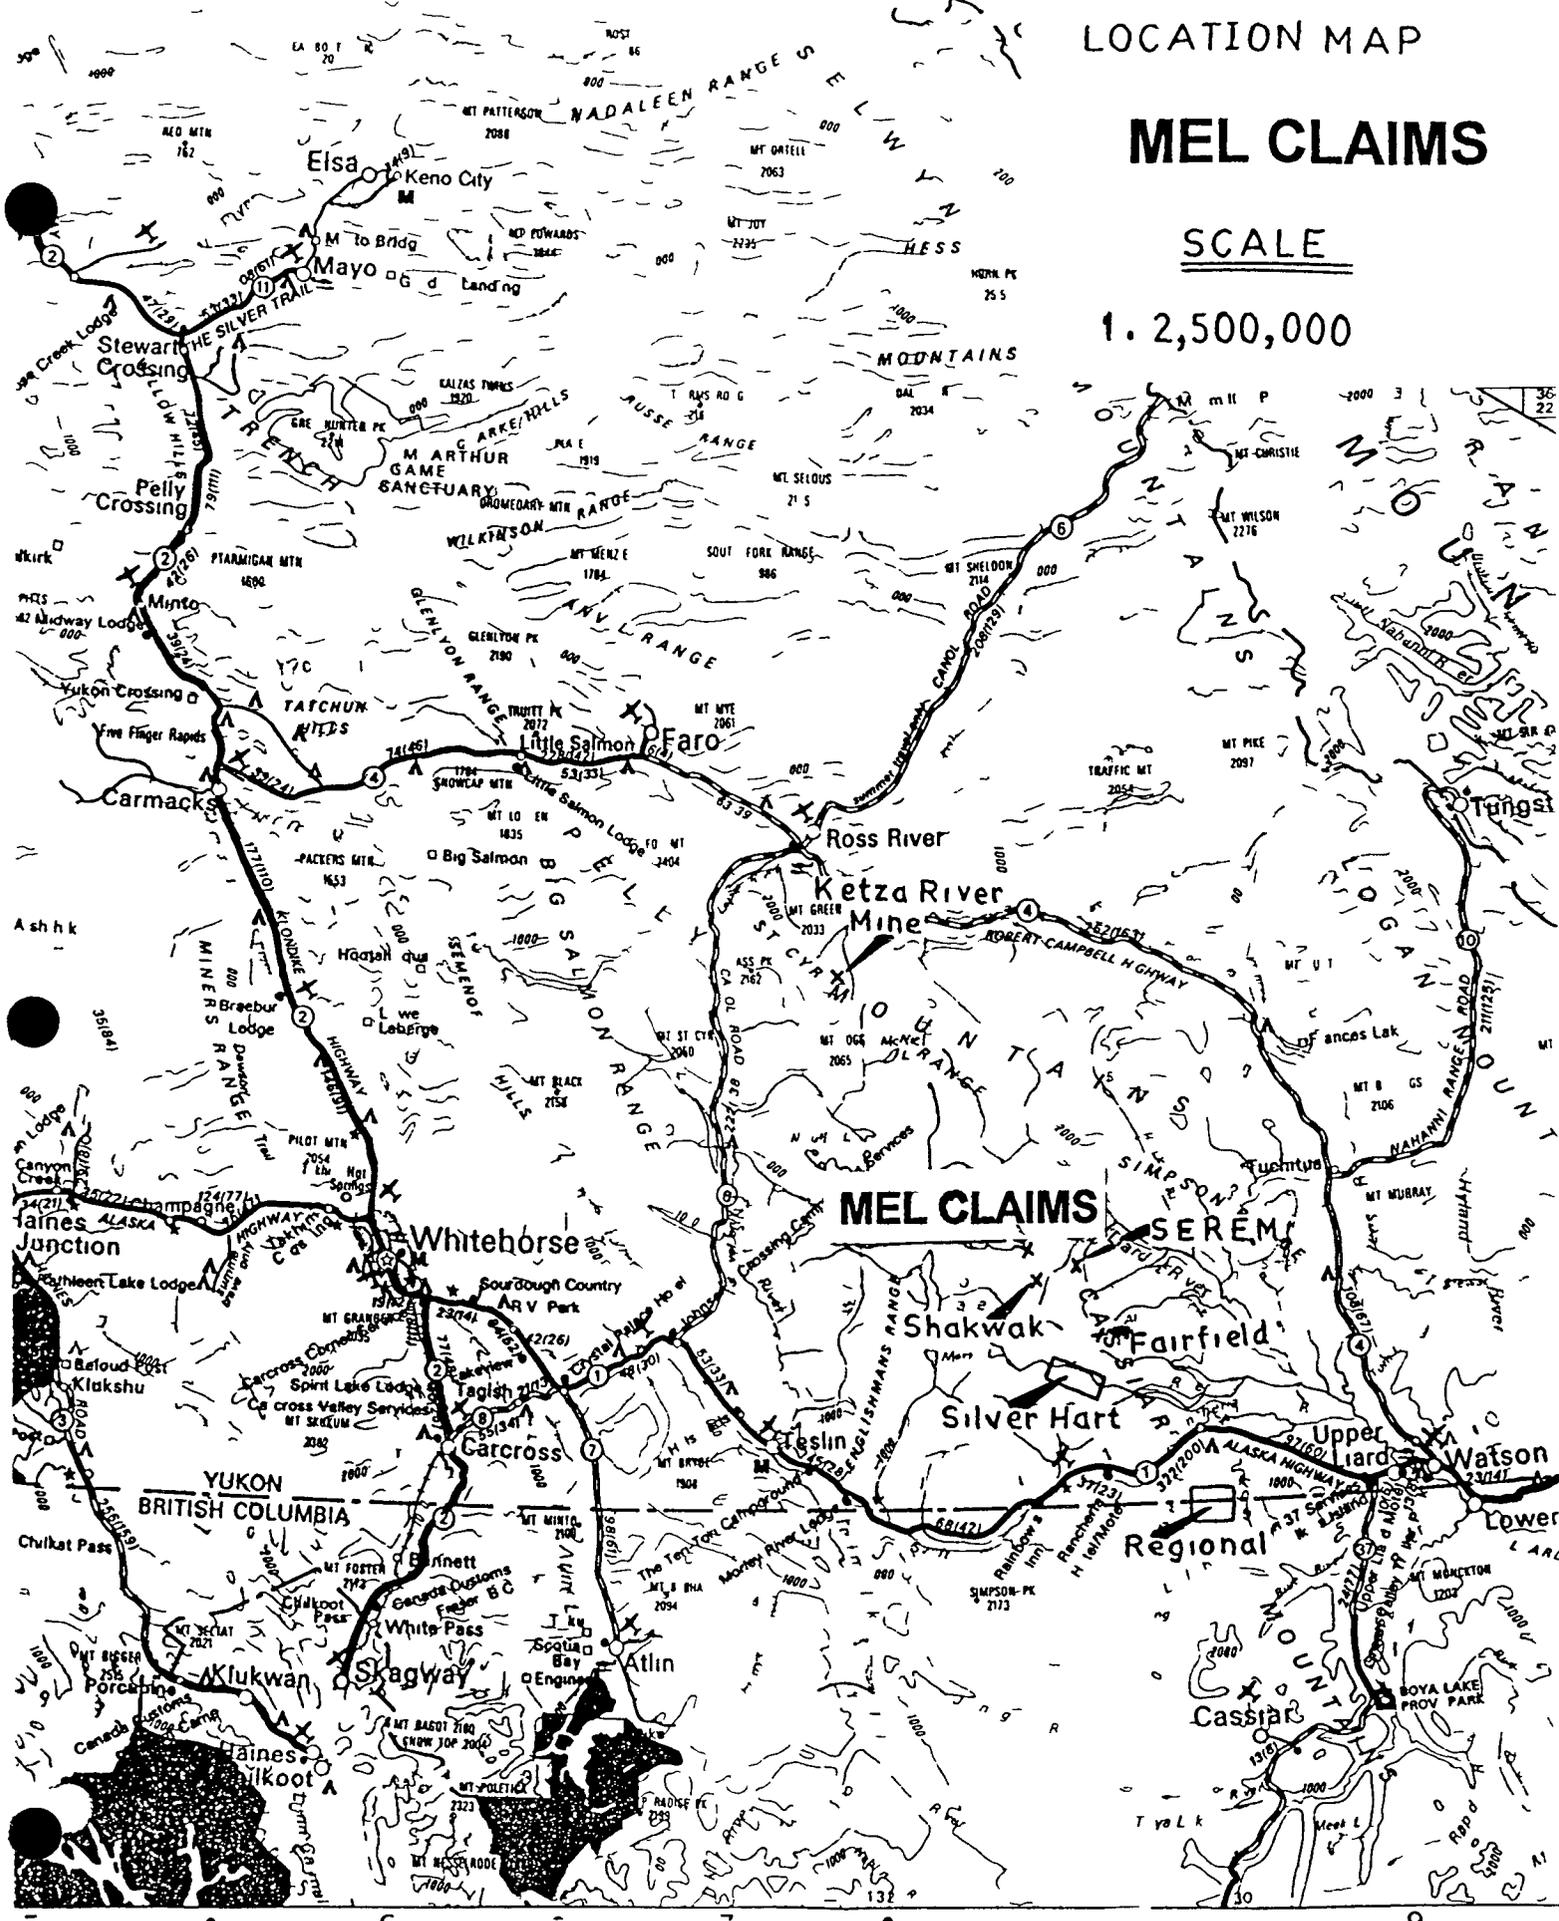

No work was done on the property during 2000 due to Mr. Holloway's serious illness. Mr. Holloway succumbed to his illness just short of 3 weeks after the completion of the 2001 work program.

LOCATION MAP

# MEL CLAIMS

SCALE

1 : 2,500,000

## LOCATION, ACCESS AND CLAIMS

Discovery Placer Claim P23784 is situated on Shootamook Creek within the Watson Lake Mining District of Yukon on the Wolf Lake Map Sheet NTS 105 B/14 at Latitude  $60^{\circ}46'57''$  N Longitude  $131^{\circ}02'39''$  W The block of 42 Mel Claims (See Mel Claims Claim Map) surrounds the placer claim

Shootamook Creek is a tributary of Scurvy Creek approximately 55 miles north of Rancheria Lodge situated at Mile 710 (Km 1143) of the Alaska Highway See the included Mel Claims Location Map for a better property location The property has an air strip so access is by small fixed-wing aircraft

## 2001 WORK PROGRAM

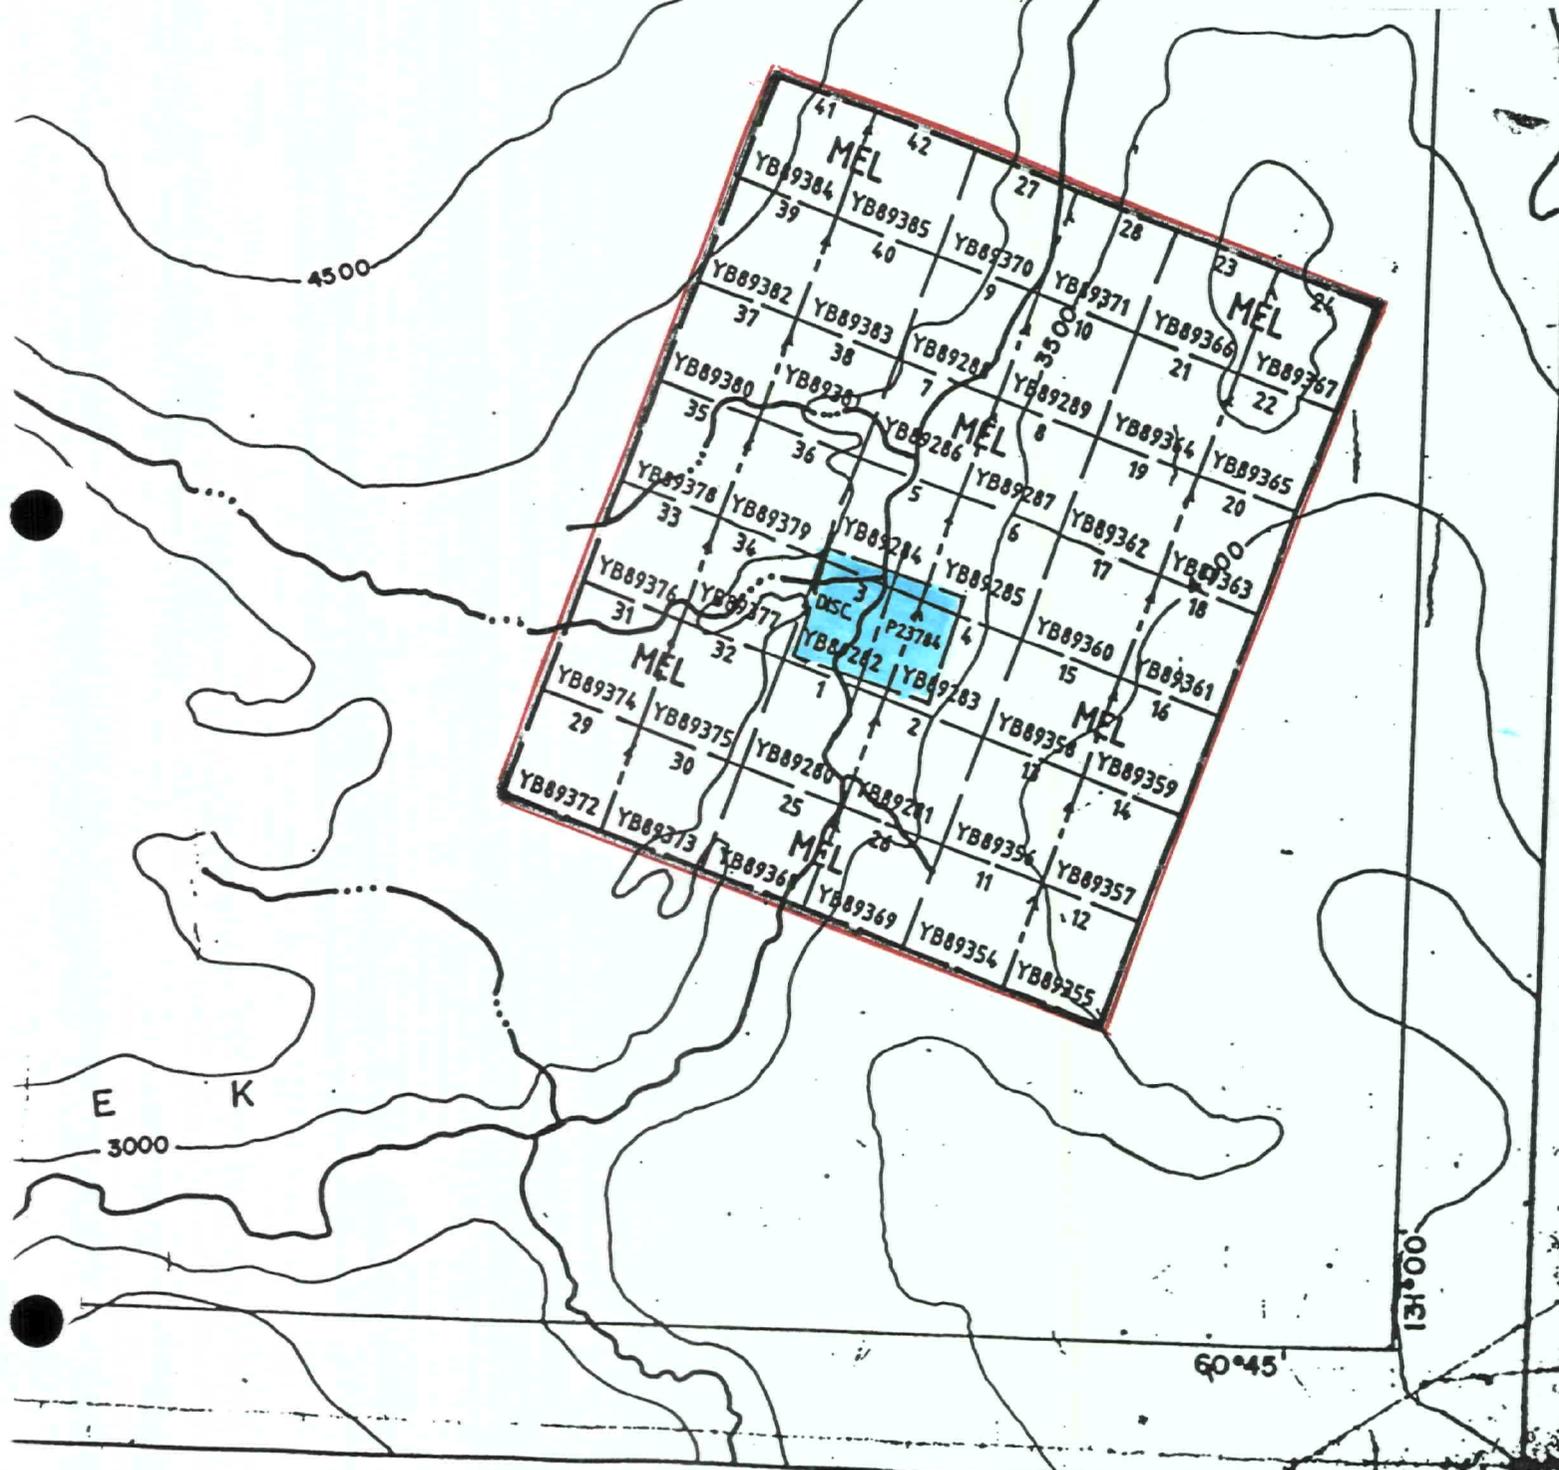

The 2001 work program consisted of several parts

- 1 Modification of the sluicing plant
  - Building a hopper to allow loading with the John Deere tractor
  - Building a vibrating grizzly to be placed below the hopper to reduce gravel size going to the sluice box
- 2 Recovery of the diamond drill rods and other materials from the Winnie Showing where they had been buried by a collapse of rock The rock collapse is expected to have been the result of an earthquake or simple weathering of the outcrop rock
  - This recovery necessitated the movement of approximately 400 yds<sup>3</sup> of rock and debris with the John Deere 350 C loader
  - Recovered equipment has now been stored nearer the camp
- 3 Tree clearing around the airstrip to assist in easier take-off s and landings
  - Clearing was extended by 200 – 250 feet north from the end of the strip
  - Clearing was extended across Shootamook Creek at the south end of the strip for approximately 500 feet from that end of the strip
  - Clearing was also extended on both the east and west sides of the strip by 50 – 75 feet to assist landings when cross winds exist
- 4 Two small areas of gravel were tested with the suction dredge in Matt Creek where the pay channel was expected to cross its flow
  - One of these areas measured approximately 3 ft wide X 10 ft long X 5 ft deep
  - Just upstream another test was performed in an area measuring 4 ft X 4 ft X 5 ft deep
  - This resulted in the sluicing of approximately 8.5 yd<sup>3</sup> of material The concentrate from the sluicing has not as yet been tested for its gold content

HOLLOWAY PLACER TESTING

SCALE 1:2500

SEPTEMBER/01

## CONCLUSIONS

The placer gold from this property is relatively small and flat. The addition of a vibrator to remove more of the larger gravel before it passes through the sluice box should increase the amount of gravel being processed. It should also permit the recovery of the small flat gold.

Unfortunately, due to the small amount of gravel put through the newly modified plant in 2001, a good estimate of increases in throughput and gold recovery was not achieved.

## RECOMMENDATIONS

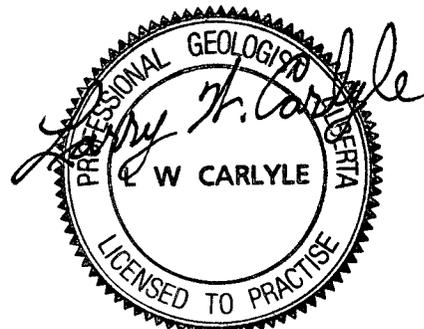

1. The recovery of gold during earlier tests demonstrates that placer gold exists on the property. 14 000 yd<sup>3</sup> of gravel have been estimated to contain gold in the area.
2. The presence of this placer gold so close to the Winnie hardrock gold showing demonstrates the existence of gold mineralization within the structures of the area. The mineralization appears to follow Matt Creek, so since Red Creek is probably the offset portion of Matt Creek, placer testing should also be done there. The location of old placer workings on Red Creek increases the chances for success.

## STATEMENT OF QUALIFICATIONS

I LARRY W CARLYLE do certify

- 1 That I am a professional geologist resident at 74 Tamarack Drive Whitehorse Yukon Y1A 4Y6
- 2 That I hold a B Sc Degree in geology from the University of British Columbia (1970)
- 3 That I am a Fellow of the Geological Association of Canada (F – 4355)
- 4 That I am a Registered Professional Geologist in the Association of Professional Engineers Geologists and Geophysicists of the Province of Alberta (41097)
- 5 That I have practiced my profession as a mine and exploration geologist for over twenty years
- 6 The conclusions in the attached report are based on information provided by Mr Holloway other people on the property in 2001 and on a review of the references cited

DATED at Whitehorse Yukon this *21<sup>st</sup>* day of October 2001
