Dear Mr. Galambos:

YUKON MINING INCENTIVES PROGRAM

LETTERS OF OFFER/AGREEMENT - APPLICATIONS: #01-049 AND #01-050

Thank you for the letters of Offer/Agreement for the above noted applications.

This letter is to acknowledge receipt of the above noted Letters of Offer and to hereby accept the conditions of the Agreement for financial assistance in the amounts of: Application #01-049: \$10,000.00 and Application #01-050: \$19,700.00. I have signed the original documents and have had my signature witnessed by Leane Ball, Housing Manager, Watson Lake, Yukon.

The original Agreements for the above noted Yukon Mining Incentives Program are attached for final signature.

If you require any further information please contact me at 867-536-2841(afternoons) or at 867-536-7551(mornings). Also I can be contacted in writing at the above noted address.

Yours truly,

Stella Hearty

01-049

April 20, 2001

Stella Hearty
Box 81
Watson Lake, YK Y0A 1C0

Dear Mrs. Hearty:

The Yukon Government recognizes that many of Yukon's mineral deposits and prospects have been discovered by independent prospectors. For this reason, we are pleased to continue the Yukon Mining Incentives Program and provide prospectors with financial assistance for field expenses.

It is my pleasure to inform you that your application for a contribution under this program has been approved for the upcoming field season. Please find enclosed a contribution agreement which I would ask you to sign and return in full within 30 days to Ken Galambos, Mineral Resources Branch, PO Box 2703, Whitehorse, YT Y1A 2C6.

I would like to wish you the greatest success during your field program.

Sincerely,

Angus Robertson
Deputy Minister
Economic Development

Watson Lake, YK Y0A 1C0

Dear Mrs. Hearty:

YUKON MINING INCENTIVES PROGRAM

LETTER OF OFFER/AGREEMENT - APPLICATION #01-049

On behalf of Angus Robertson, Deputy Minister of Economic Development, I am pleased to be able to provide you with an agreement for a contribution under the Yukon Mining Incentives Program. The project has been reviewed and approved with the designation number 01-049 expiring 31 March, 2002. On the basis of the information supplied on the application form, subject to the terms and conditions contained herein, I hereby offer the Applicant financial assistance by way of a contribution in the amount stated in Section 2.

Purpose

1. The purpose of the contribution is to assist the Applicant with travelling and operational expenses while prospecting in the area(s) described in Schedule "A" attached hereto.

Amount

2. The amount of the contribution will consist of 100% of eligible exploration expenses up to a maximum of \$10,000.00. Eligible exploration expenses will include costs for salaries (of hired labour if necessary), equipment and machinery rental, supplies, services, and transportation which are in the opinion of the Department reasonable and are directly attributable to the designated program of mineral exploration.

Interim Payment (Advance)

3. An interim payment in the amount of \$0.00 is hereby approved. Failure on the part of the Applicant to observe the terms and conditions as set out in this Agreement will render any interim payment made to the Applicant repayable to the Government of Yukon on demand.

Material Changes

4. No material changes shall be made to the exploration program as described in Schedule "A" without the prior written approval of the Department, such consent not to be unreasonably withheld.

Obligations of the Applicant

5. The Applicant is required to spend a minimum of thirty (30) days in prospecting activities within the area(s) specified in Schedule "A"; and while doing so is required to maintain the following information, shall supply such information at any time upon demand by a person authorised by the Department, and shall submit the information to the department in its entirety, on completion of prospecting activities and in any case not later than 31 January, 2002.
 - (1) A daily diary of the Applicant's prospecting activities including detailed information with respect to locations visited, any observations made, any physical work such as sampling, hand trenching or drilling performed;
 - (2) A map of 1:50,000 or greater scale which shows traverses undertaken and locations visited during the course of active prospecting;
 - (3) Results of all assays and analyses performed upon samples of specimens collected during the course of active prospecting;
 - (4) A technical report in duplicate summarising work performed, complete with supporting data. This report should include a claim location map, a map showing all traverses at an appropriate scale, maps of geoscientific surveys with results plotted, maps showing trenching, drilling, shafting locations, analyses/assay certificates for all samples analysed and plotted, and a discussion of the results including recommendations for further work.

Local Benefits

6. The Applicant undertakes to hire Yukon residents and contract to Yukon businesses to the greatest extent possible.

Statement of Expenditure

7. Upon completion of prospecting activities and in any case not later than 31 January, 2002, the Applicant will submit a Statement of Expenditures together with the original copy of all supporting invoices and receipts. The total amount of any interim payments made to the Applicant will be deducted from the total of all eligible expenditures in arriving at the final amount due to the applicant.

Governing Law

8. This offer and the Agreement resulting from acceptance by the Applicant of this offer will be construed in accordance with and be governed by the laws of the Yukon Territory.

Entire Agreement

9. The provisions contained herein constitute the entire Agreement between the Applicant and the Government of Yukon and supersede all previous communications, representations (other than those contained in the application) and agreements, whether oral or written, between the Applicant and the Government with respect to the subject matter hereof.

Waiver

10. No term or condition of the Agreement resulting from the acceptance by the Applicant of this offer and no breach by the Applicant of any such term or condition will be deemed to have been waived unless such waiver is in writing and signed on behalf of the Department. The waiver by the Department of any breach of any term or condition of the Agreement resulting from acceptance by the Applicant of this offer will not be deemed a waiver of such term or condition or of any subsequent breach of the same or of any other term or conditions of said Agreement.

Demands and Notices

11. Any demand, notice, request or other document that the Government may, at any time or times after acceptance of this offer by the Applicant, wish to make or give to the Applicant will be in writing and will be effectively made or given if mailed in Canada with postage prepaid addressed to the Applicant at the address set forth on Page 1 hereof and any such demand, notice, request or other document so mailed will be deemed made or given to the Applicant on the tenth business day after mailing of the same.

Assignment of Contribution

12. The right to receive a contribution under this program shall not be assigned, charged, attached or given as security, and any transaction purporting to assign, charge, attach or give as security the right to receive a contribution is void.

Indemnity

13. The Applicant and the Government of Yukon shall each indemnify and save harmless the other and any of their respective employees and agents from and against all losses, claims, debts, judgements, damages, costs, actions or proceedings arising out of or relating to the performance of this Agreement.

Confidentiality

14. All reports, maps and other information submitted by the Applicant in support of an application for payment shall be held in confidence by the government for a period of five years following expiry of designation, after which time they may be made available for public inspection.

Headings and Captions

15. The headings or captions of paragraphs of this offer are inserted only for convenience of reference and in no way define, limit, construe or describe the scope or intent of any of those paragraphs.

Legislative Approval of Funds

16. This Agreement is subject to the Financial Administration Act and the Yukon Government's obligation to pay is subject to money being appropriated by the Legislature for the purpose of the contract.

Acceptance of Offer

17. This offer shall be open for acceptance for thirty (30) days from the date set forth on Page 1 hereof, and may be accepted by the Applicant duly executing the original copy of this offer where indicated below and returning same by mail or in person to:

The Department of Economic Development
Mineral Resources Branch(F-3)
Government of Yukon
PO Box 2703
Whitehorse, Yukon Y1A 2C6.

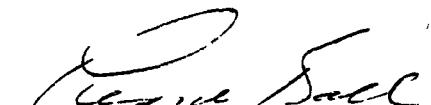

The date of acceptance of this offer will be conclusively deemed to be that date on which the original copy of this offer, duly executed by the Applicant, is actually received by the Department in Whitehorse.

SCHEDULE "A"

Yukon Mining Incentives Program

Application #01-049- Stella Hearty

1. The purpose of the contribution is to assist the Applicant with travelling and operational expenses while prospecting in the following area(s):

Hasselberg Lk. area on NTS 105A/13, as described in the application.

Eligible Exploration Expenditures

2. For the following work, the amount of the contribution will be (100% of expenditures) for a total of up to \$10,000.00.

Prospecting as is described in the application

3. Reimbursement will be made only on the basis of receipts showing the actual cost of the materials and/or work done and paid for by the Applicant. The expenditures to be reimbursed must be an element of the approved work plan.

Effective Period of Agreement

4. The Agreement is deemed to cover eligible exploration expenditures incurred between 1 April, 2001 and 31 January, 2002.

Environmental and Legal Requirements

5. This Agreement is conditional upon all legal permits and other requirements having been secured by the Applicant.
6. The Applicant shall not conduct an exploration program on lands withdrawn from mineral staking such as Class A Lands as identified in the Umbrella Final Agreement or within lands identified as Study Areas for Special Management Areas or future Territorial and National Parks.

Watson Lake, YK Y0A 1C0

Dear Mrs. Hearty:

Thank you for your application to the Yukon Mining Incentives Program. It has tentatively been approved for funding pending the outcome of various mandatory checks to be made by the department (i.e. land claims, environmental considerations, etc.). A copy of an approved notification or operating plan will be required prior to final approval of those applications requiring them under the current Mining Land Use Regulations. If no problems arise with your application, you should receive a letter from the Deputy Minister and a contribution agreement sometime in the near future.

Congratulations on your tentatively successful application and good luck with the upcoming field season.

Sincerely,

Ken Galambos

The Department of Economic Development may verify all statements related to, and made in this application.

1. I am the person, or a representative of the company or partnership, named in the Application For Funding under the Yukon Mining Program.
2. I am the person who is nineteen years of age or older, or the representative of the company or partnership, who is ordinarily a resident of Canada.
3. I have complied with all the requirements of the said program.
4. I understand that if this application is incomplete, I will be notified in writing and will have until March 1 to make the revisions. After this date, the application will be judged as incomplete and will be rejected.

For Grassroots Prospecting and Grassroots Grubstake Applications:

5. I am a Canadian Citizen or landed immigrant or the person I am Grubstaking is a Canadian Citizen or landed immigrant, nineteen years of age or older.

Signature of Applicant S. Hearty Date 15 January 2001
Name (print) STELLA HEARTY

Position or Title (if applicable) PROSPECTOR / OWNER

This information is being collected under the authority of the Economic Development Act for the purpose of: 1) contacting the client, and 2) determining the eligibility of the client.

PROSPECTING PROPOSAL: SUMMARY

- a) Location
 - i) Hasselberg Lake area (=7 km NW of the north end of the lake)
 - ii) NTS 105 A /13
 - Area 'B' centred on UTM coords: 454000E, 6759000N and region to SE (either side of creek flowing SE to Hasselberg L).
 - Area 'C' 447500E, 6757500N & 447500E, 6759500N
 - Area 'D': region outside the VIVI claim block, i.e. approx. 2.5 km radius around 451500E, 6758000N
 - iii) (see attached notes and maps)
 - iv) Prospecting proposal to be for areas off existing claims
- b) Access
 - Via existing winter road from Campbell Highway at the CanTung junction to cabin at Hasselberg Lake. This is passable by Argo during the summer without causing a significant 'footprint'. Existing argo trails allow access to the mountain top.
 - Seaplane access to Hasselberg Lake is also possible and the existing airstrip 1 km east of the lake is suitable for such STOL aircraft as a super cub. The prospecting operations are to be carried out using an Argo for ground transport from the lake.
 - Any visitor should call ahead on the radiophone if ground transport is required.
- c) Prospecting targets are:
 - i) Hardrock gold (both mesothermal shear related and listwaenite type is possible; one in-situ auriferous quartz vein is known)
 - Jade (nephrite). Both placer and in situ material are known from the area.
 - Talc: talc alteration of ultramafics has been found in the area.
 - (See accompanying geological report / prospecting proposal)
- d) Rationale:
 - The area has been a past producer of both placer jade and gold. It has received some geochemical work, but no real detailed prospecting programme. The 2000 geological reconnaissance (see attached report) has shown that the area is underlain by a metasediment / metavolcanic sequence which is intruded in the north by gabbro to pyroxenite bodies that vary from fresh to highly hydrothermally altered or serpentinised. There is excellent potential to find mineralization.
- e) Proposed work would include examination of all rock exposure (including geological mapping) and sampling for lithogeochemistry. If outcropping mineralization is found soil sampling may be carried out. If so, all sample pits will be backfilled. Details are given in the attached report.
- f) The summary report will include a geological map with rock descriptions, details of geochemical surveys with analyses and any assays performed. GPS positioning will be used for all data.

g) Working days: see attached form. Stella Hearty proposes to spend over 35 days on prospecting in open ground and Tim Liverton is due to spend up to 12 days on geological mapping and prospecting.

h) See attached forms.

i) No partners are applying for separate YMIP assistance.

HASSELBERG AREA: 105A-13 PROSPECTING PROPOSAL

INTRODUCTION

The centre of the region of interest is approximately 7km NW of Hasselberg Lake (105A-13). The claimholder, Stella Hearty, has been involved in production of jade from float (i.e. boulders within the mantle of glacial till) for many years. The region does, however, show potential for exploration for other commodities and Mrs. Hearty has been carrying out some geochemical sampling and basic prospecting for the last nine years during which significant gold grades in hard-rock have been discovered.

GEOLOGY

The area of interest contains outcrop of muscovite schist, quartzite, intermediate (?) tuffs and basaltic volcanics mapped as Proterozoic (unit 1d) of Gabrielse (1967): GSC Map 19-1966. These are intruded by a number of stocks of diorite to gabbro of outcrop scale under 500m across and a much larger extent of pyroxenite in the NW. These are considered to be Mississippian by Gabrielse. The limited amount of geological mapping attempted in 2000 indicates that the contacts of the basic to ultrabasic bodies are too irregular and locally steeply-dipping to be explained by low-angle thrust faulting i.e., they are indeed intrusions. As intrusive ultramafics these likely correlate with Permian ultramafics to the north (D.Murphy, pers. comm; see also Murphy, 2000: Sheet 105H/4, OF 2000-16). The pyroxenites vary from local masses of very fresh material between serpentinized zones to areas completely altered to talc and siderite.

MINERALIZATION

a) GOLD

Prospecting by Mrs. Hearty discovered a quartz vein within the tuff / metasediment sequence that carried 2ppm Au. This vein is exposed as a steeply-dipping zone in one of north tributary creeks of Bourget Creek. Further assays obtained from the ridge to the west indicate an approximate E-W trend, provided these are the one zone.

b) JADE (nephrite)

It is reasonable to assume that the boulder material extracted from this region has been derived from the large outcrop region of ultramafics to the northwest of Hasselberg Lake. Indeed, the geological reconnaissance of 2000 located a minor occurrence in a serpentine zone within pyroxenite.

c) TALC

A substantial portion of the pyroxenite is highly talc-altered. This mineralization is partially, but not completely covered by the LIVI claim block of J.P. Ross. The open Crown Land deserves prospecting for this commodity.

PROPOSED PROGRAMME

It is proposed to carry out prospecting during 2001 for the three commodities, as follows:

- a) The existing EZ and Jasper claim groups would be prospected for hardrock gold by means of a limited soil geochemical survey in the region of the previously discovered anomalous gold. Stream sediment would be taken at close spacings up the creeks for heavy mineral analysis. In-situ rock should be sampled where volcanics occur. The whole of the EZ 1-23 claim block requires geological mapping to delineate the extent of the volcanic package and the contact relationships.
- b) The region of open ground to the north and NE of the EZ 71-84 claims would be prospected by ridge and creek traversing to search for serpentine alteration zones and possible in-situ jade.
- c) Open ground west of the EZ 1-23 block deserves some geological reconnaissance and prospecting for gold (and base metals) in the volcanics.
- d) Open ground over the northern ultramafic body should be prospected for talc.

YMIP GRANT APPLICATION

Since the areas requiring prospecting are both on staked ground and on vacant Crown land, application is made for two grants:

Target Evaluation module proposal:

- (i) The Jasper claim block and part of the EZ claim block area marked 'A' on the accompanying map requires geochemistry: close-spaced stream sediment sampling and, if an examination of the ground indicates that there may not be too much till cover, a small soil sampling grid to cover the region indicated.
- (ii) The region of the EZ 69-71 claims has some rock exposure and requires geological mapping, as does the creek below. The EZ 1-23 block also has some good rock exposures and requires mapping and sampling of rock for lithogeochemistry over the volcanic units. Gold and base metal occurrences are the target here.

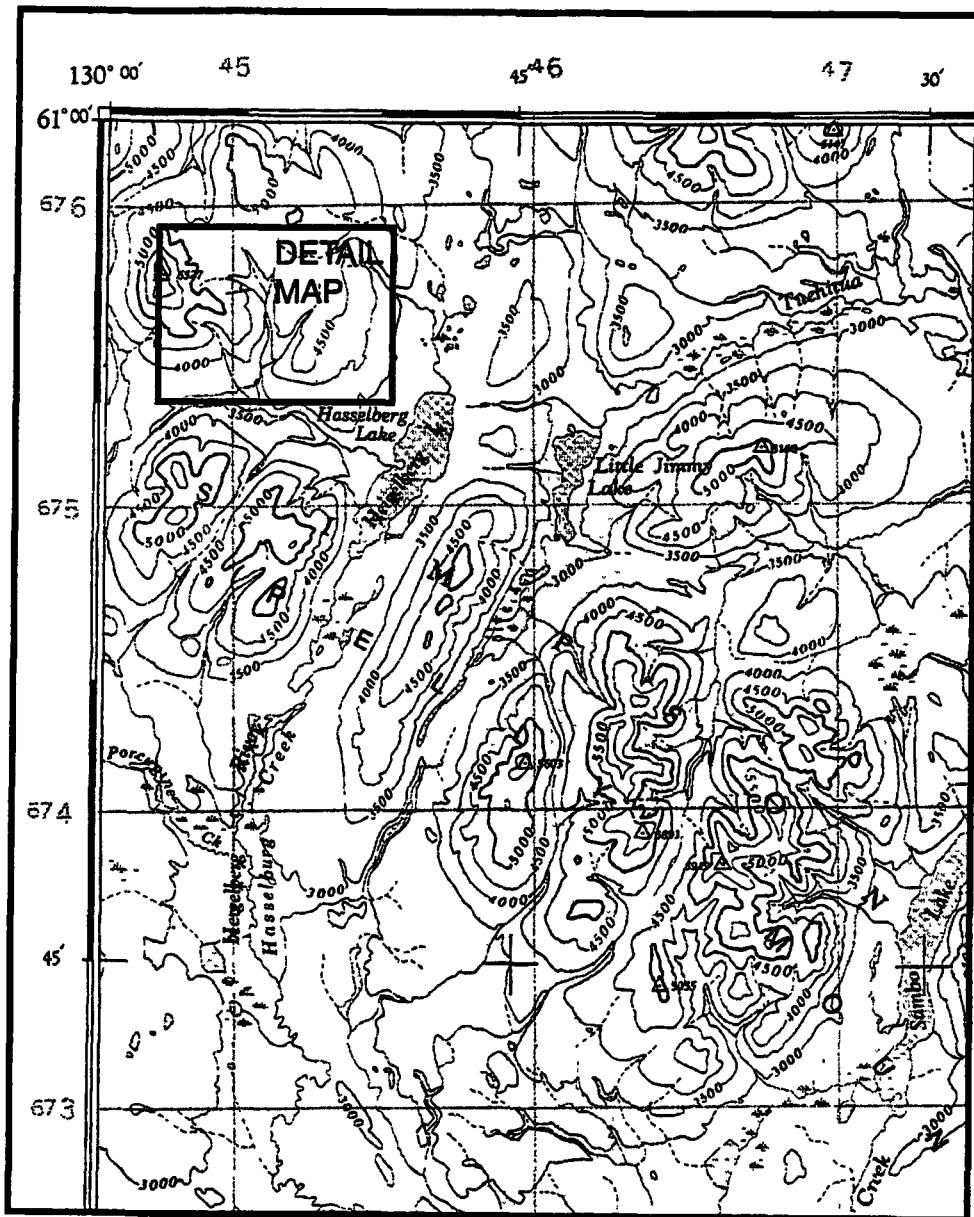

(iii) Some mapping more detailed than the 2000 reconnaissance would be beneficial over the EZ 71-84 block to evaluate the ultramafic body for both talc and jade.

Grassroots module proposal:

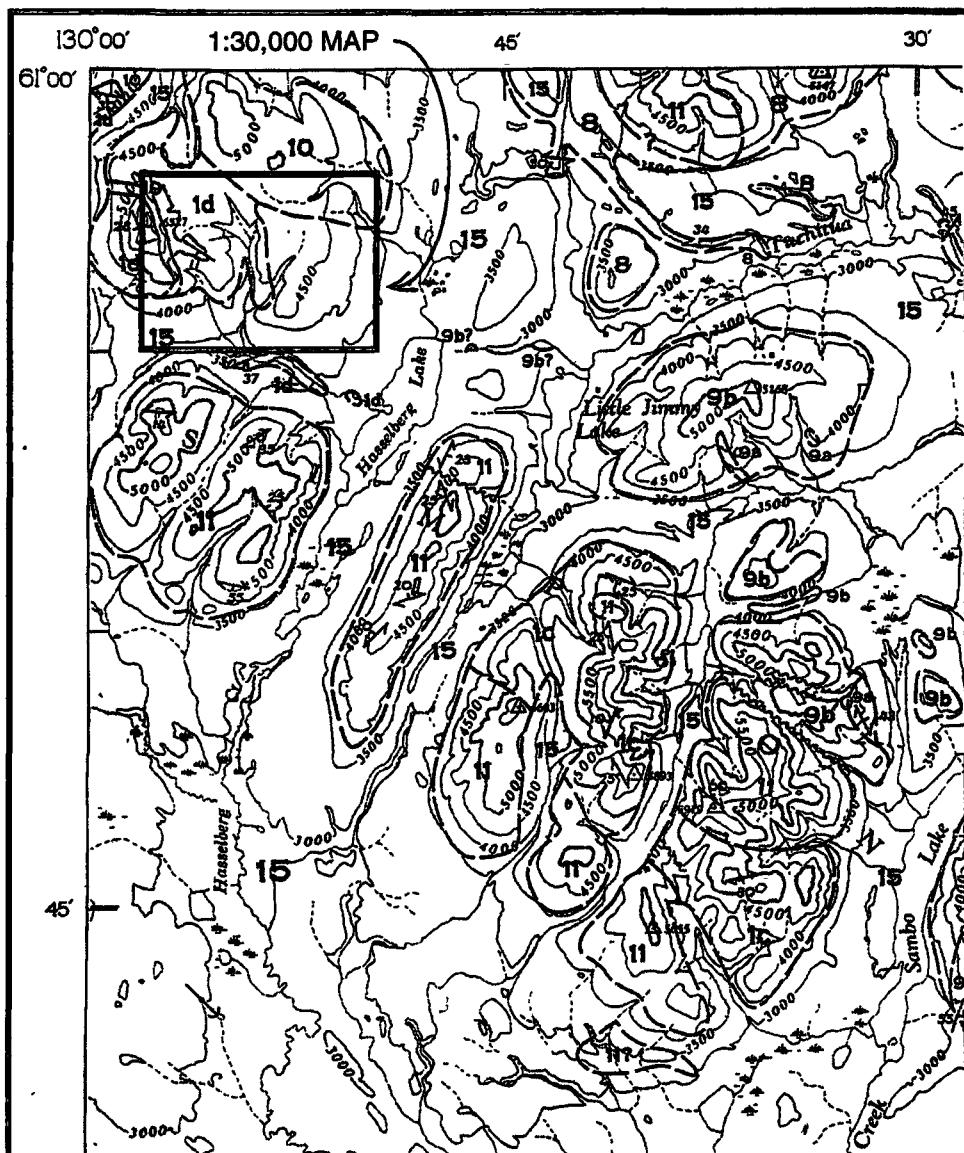

The areas outside of the claim blocks deserve prospecting (see map): Area 'C' for gold and base metals; Area 'D' for talc; and Area 'B' for jade (extending that particular prospecting down the drainage system eastward to Hasselberg Lake).

ACCOMPANYING MAPS

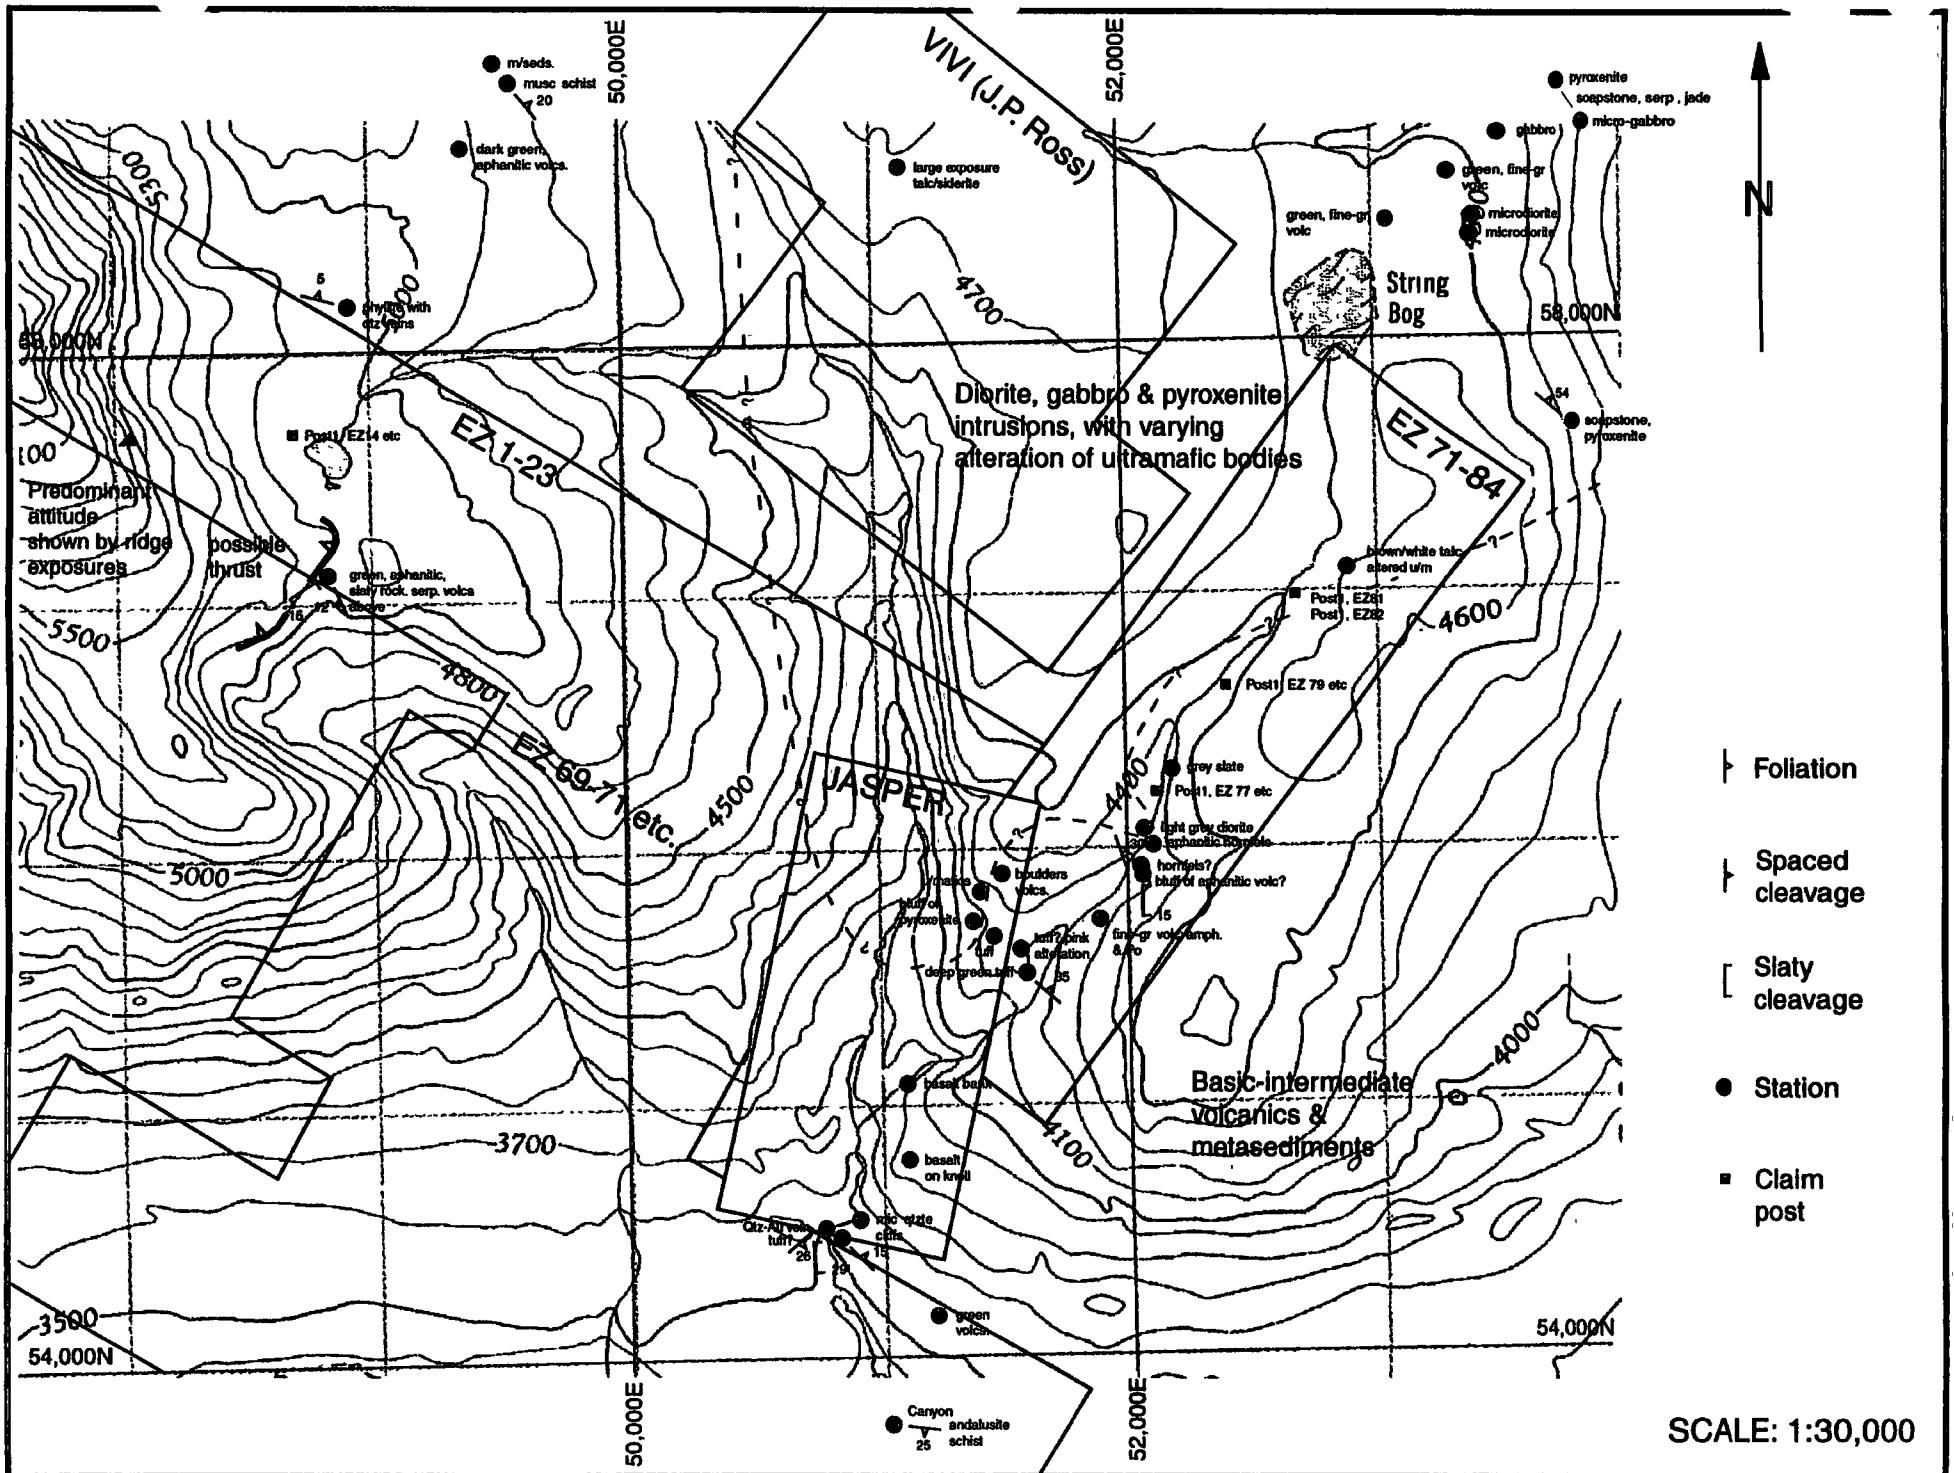

- 1) Location map: 1:250,000 scale, portion of sheet 105A.
- 2) Geology: portion of Watson Lake 1"= 4 miles sheet showing area of interest.
- 3) Topography, claim boundaries (adjusted to fit GPS coordinates located during 2000 season), with very brief geological notes from that reconnaissance. Scale 1:30,000.
- 4) As above, with topography removed for clarity.
- 5) As above, showing areas of interest for both grassroots prospecting and target evaluation.

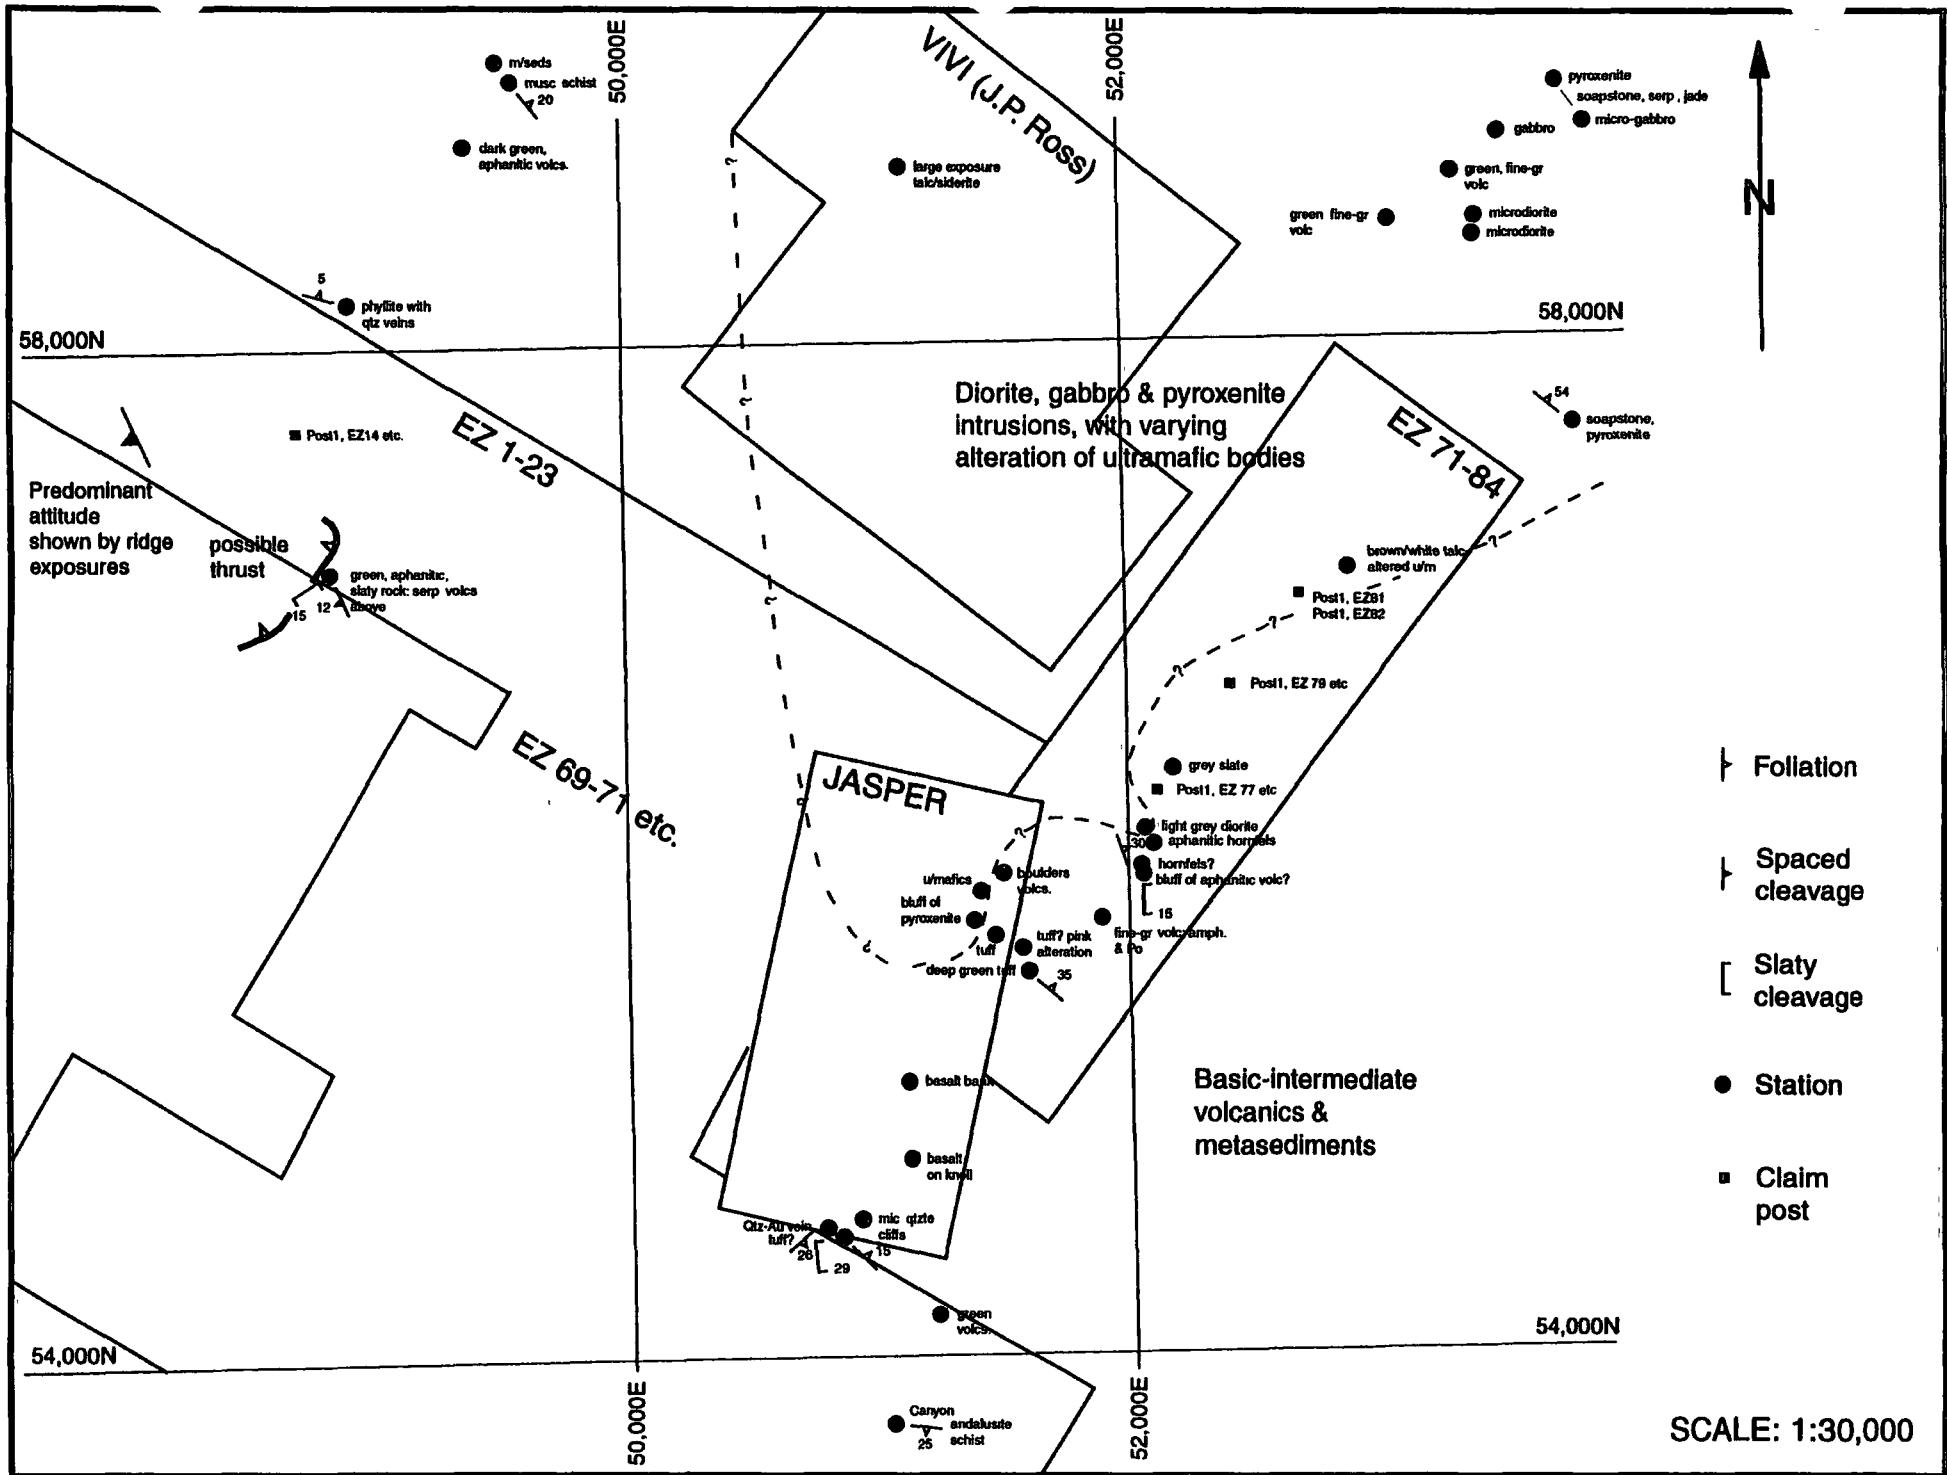

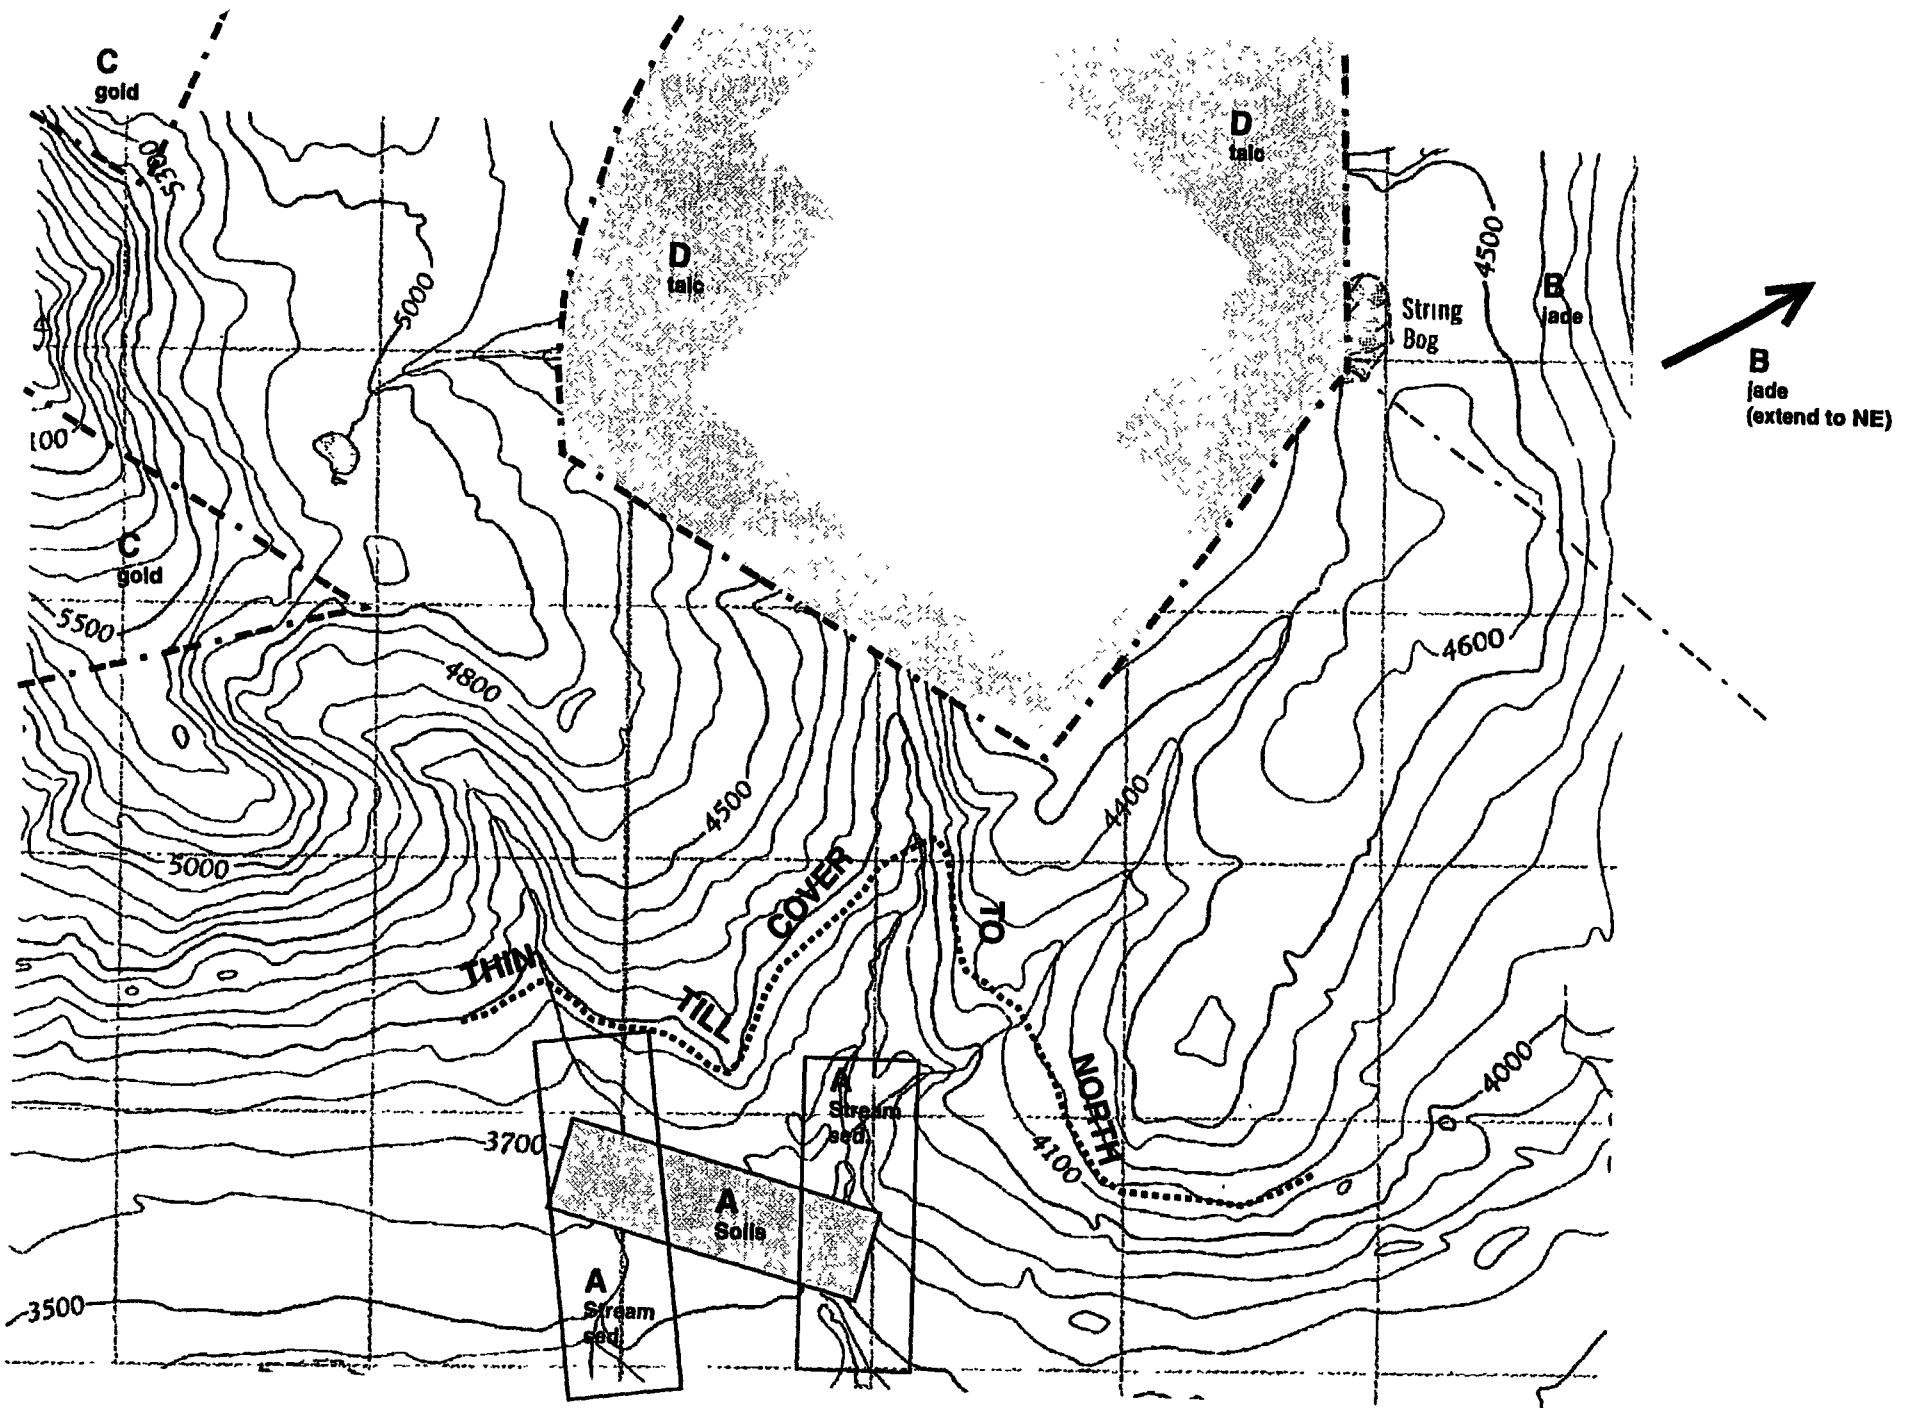

LOCATION MAP: 105A (1:250,000)

REGIONAL GEOLOGY: WATSON LAKE SHEET

33	09Sep.01	prospect north shore area Hasselberg Lake
34	10Sep.01	notes a.m. Prospect east shore Hasselberg L.
35	14Sep.01	prepare equipment and supplies for trip
36	15Sep.01	prospect Echo Creek and area
37	16Sep.01	prospect Kitkat Creek area
38	17Sep.01	trip Campbell hwy. pick up helper/supplies
39	18Sep.01	prepare and drill for samples
40	21Sep.01	continue drilling for samples
41	22Sep.01	continue drilling for samples
42	23Sep.01	trip to Watson Lake replace fuel/propane
43	25Sep.01	return from Watson Lake to Camp pack up Supplies, samples, equipment and personal belongings. Shut down camp for this year.

Copies of daily journal attached

②

Stopped at trail crossing where Ron waited with the Argo. We collected 5 SS. and 3 H.m samples. No outcrops of any interest.

July 21/01
8 AM "STELLA" Kevin
Kettle Creek
Travelled VIA Argo to trail crossing.
Continued northward on creek to headwater.
Outcrop - quartzite, shale - serpentine rock / quartz / granite + some soapstone rocks mainly in creek - did SS + H.m Sampling on return trip - 10 SS. 4 H.m. and 4 rock samples. Walked back to Camp - 8 PM.

①

Prospecting Notes
July 21/01
Hearily Creek STELLA/Jon
Water level dropping fairly well. Took one rock sample - Magnetite "magnetic". Continued to check area out for any further indications - None showing in bedrock. Magnetite = comes from further upstream a possibility. Spent 8 hours x 2 persons

July 20/01
Kettle Creek -
9 AM STELLA/Jon/I
Travel VIA Boat to mouth of Kettle Creek - Commerce S.S + H.m. Samples for approximately 2 Km. upstream.

July 24/01

(3)

9:30 Am

Stella & Ron

Travel North east
around peak of mtn.
to the headwaters of
Pasture Creek - Bough
going = buckbrush).
Started spruce !!
Took samples of S.E.
and 4 Km. also took
4 samples of bedrock.
fine drizzle starting
We are 3 miles from
Camp - start back
arrive back @
Camp 6:30 P.M. Supper
rain / wind !! that
evening. COLD on
mountain top !!

July 26/01

(4)

Mining Inspector
stopped by on his
way to Wolverine.
Everything OK.

Remained in camp
did up wood supply
dried equipment
prepared for another
trip. Did up
paperwork and
samples.

July 29/01 RTS

Bettle Creek Argo.
Tim & I went to
check out an
area on creek.
did Geophysical &
out crops GPS,
Types etc. Return
to Camp. via Argo.

(5)

Aug 2/01

8 AM - Stereo Jon/Ron
"Hearty Creek"
North end - headwaters
Travelled via Argo
to area - possible
Scodrite? serpentinite,
Talc and serpentinite
Drook samples -
Numbered and brought
back for testing.
Returned via Argo
to main camp. 9 PM.
Long day!

Aug. 3/01 - RJS
Kettle Creek - East

Side =
9 AM - Raining
but decided to go
Ahead anyway.
Found some things
interestingly near mouth
of creek - will test.

(6)

Decided to put in
claims.

Returned to camp
6:30 P.M. Raining
quite heavily now.
Had supper - did
up papers - bed
11 P.M.

12 P.M. Van Kirchbaum
and Son arrive @
camp - Van hurt -
head trauma -
Son O.K. They rolled
their Argo. We
called for a medi
vac - Kevin & I
took turns checking
every 15 minutes
on him for the rest
of the night - Plane
arrived 8:30 P.M.
to pick Van up.
No room for his
son - 100 ft. off, didn't see

(7)

Aug 4/01-

Travelled to Watson Lake. Brought in Van's son so he could be with his dad. Hospital medi-vac Van to Whitehorse for further observations - Son Chris remained w me.

Aug 6/01

Chris' Mom came in on the bus. I have to work all this week!

Did up samples for assay and paperwork.

Circuit Court 6-10/01

(8)

Aug 11/01

Ron/Stella/Jon
Take supplies back
to camp w/p truck
and Argo. Prepare
for trip next day.

Aug. 12/01. R,S,+J
Leave main Camp
8:15 AM going west
to mouth of Hartenkoff
Creek - Prospect Creek
flowing from south
into Berger Creek
and Labcine Creek.
Collected ss + Km
plus rock samples.
GARNETS in place
in boulders 5x6x5'
and in small
1x1x2'. Colour
range - pinkish
red -
odd clear one.
No real angles showing.
return 9pm.

Aug. 13/01

(9)

A.M.

Service and clean
Argo for next day.
Do up notes / secure
samples.

12:30 P.M. Travel
West along Bourget
to Kastukoff pick one
more sample SS + HM
return to Camp. 8:30pm

Aug. 14/01 R.S.J

"Swampland"
"Mosquito heaven"
Prospect westward
toward Kastukoff
Creek. Took one
S.S and checked
out side stream
No luck - return to
camp. 8 hrs.

Aug 15/01

(10)

Raining this
morning - supposed
to clear P.M.
Ordered float plane
for afternoon trip
to Korcupine River
and lake.

Checked out area
from plane - decided
on where to prospect
next season -

\$ 724.00 for plane
rental.

Returned to Camp

Aug 16/01.

10 AM S + J

Rucksack Mtn.
Walked to divide
Took 3 outcrop
samples - limestone -
quartz + unknown
Return Camp 7 PM.

(11)

Aug 17/01 RSS

Kastrykoff Creek
Took Argot's Creek -
Prospect for Jade
Gold.
Found some Jade
Boulders - small
ones - even found
Soapstone boulders.
Prospected 2 miles
of creek plus first
entrif. side
Creek poor - mostly
Granite / Quartz boulders
Outcrops along
creek - Shows some
Pyrite / Copper? pyrrhotite
Assay - Return
to camp 10 P.M.

(12)

Aug 18/01.

Kastrykoff Creek
South end. One
mile took S.S Hm.
Rock samples. to
where it flows
into Alexander
Lake. 1-1½ mi long.
Swamp north end -
got stuck! Took
Ridge trail - mostly
gravel - along the
Lake. Kastrykoff Creek
flows out of Lake into
Porcupine River. We
Changed direction
to eastward along
Apache Mtn. basin
serpentinite boulders,
Granite boulders,
Quartz Rock - 7 P.M.
Starts raining - decided
to head home. arrive
at Camp Midnights!

Aug. 19/01. R + S + J

(13)

bry out rain gear
Clean out Argo
mud sticks etc.
repair tires.
Ho up notes and
number samples.
Friends drop by
in the afternoon.
Had coffee and gave
us fresh meat for
supper.
Ue gave them
some fresh home made
bread and home made
jam.

Aug. 20/01

Raining too
much today!!
PECT Sample Number:

Aug 22/01

RSS

(14)

Prospect mouth
ridge Bourget
Creek East area
some Jade/Serpentine
Soak samples from
outcrops -
Return to camp -
wash & prepare
for assay.

Aug 23/01

Trip to Watson
Lake for gas,
propane and
groceries -
Did up 5 Boxes
of samples and
sent out to Chery.
FREIGHT - \$ 127.00

Aug 24/01

Return to Camp

Aug. 23/01

Mileage - 140 Km $\times 2 =$ 280 Km

Gas: \$137.00

Groceries 12

August 24 - 01

Return to main Camp.
prepare equip. to
continue prospecting

Prospect
Aug 25/01 250

Travel up Party Creek to Bog - and NE to head - Water of Party Creek - Collected samples of Rock and sediment having metals - but decided to continue North west along - clear ridges for the next 6 miles approx. located. Collected 4 rock samples. return to Valley & set up camp! Major traps on the outcropping

Chopper flew over us in the 2nd valley North west - Afternoon - mid. heading toward Wolverine or fish lake area.

Prospect
August 26/01 R+S

Returned to ridge to continue prospecting areas of interest.
Collected three further samples.

Saw three bull Caribou and 2 cows. Right! They are not afraid but very curious - came over to us!!

Called it a day and returned to Camp - 7pm

Prospect. R+S
Aug. 27/01 Rainy day

Continue Northwestern trek -

Ascend large outcrop of magnetic bedrock. Took samples - 3 Total followed outcrop along side of ridge for $\frac{1}{4}$ mile - boulders began species magnetic from boulders as well.

Aug 28/01 Prospect R+S
Rainy day again

Did final trek along ridge - samples from outcrops and floats -

Final "Top ridge" showed largely float on the surface - largely serpentinite mix.

Took smaller Pt. to

Aug. 29/01 R+5
Hearty Creek
Commenced @ 8:30 AM
to prospect said creek
traveled up approx
1/2 the length of the creek
Took 6 rock samples
8 AM - 55 (4 each)
Rock outcrops - shale
(gray) with quartz veins
 $\frac{1}{4}$ " to 2" in size.

Sunny today - W. cloudy
and light wind. Good
day today -

Chain came off sprocket
on Origo - were able to
put it back on but
chain + tightener broken!

Return main Camp
2:PM

Target
Aug 30 | Eugene Camp
Samples for PGE
TEST. RS+J

Aug 31/01 Prospect
Hearty Creek - South
end to complete lower
section. Took soils
to Beaver dam. Last
part heavily dammed -
No proper samples
can be taken!

Sept 1/01 - rain -
do paper work - Sample
check - Cook/kake.

Sept 2/01
Still quite wet
day of rest!

* Sept 3-4-5 go
to W.L. for fish.
Sept 6th - Skit to return
Our plane to Camp 6th

TARGET

Sept 8/01 8 am RST
Oci today Cloudy but
no rain - return to Canyon
Continue mapping - Samples -
map outcrops - return
Samples to Orzo - Lunch - Continue
mapping - return to Orzo
6:20 pm - return to Camp
7:40 pm - Supper - day's
done.

Sept 9/01 Prospect

S + J

Rained most of the night -
still raining in the morning
Do up paperwork this A.m.

P.M.: Checked North Shore
West 3000' boulders
Consist - serpentine,
jade, quartz, soapstone
granite - fine grade
Conglomerate Similar to
109 B 16

Sept 10/01 Sept.
Raining again this
Am - do more paperwork

P.M. Sun peaking through
Checked 3000' shoreline
North on east side -
Boulders - small -
mostly granite
one Conglomerate some
or similar to Mt. Shasta
Some Small Jade &
Serpentine - mostly
gravel & sand with
smaller rock bottom -
Shoreline overgrown
not as shallow as
West side -

* still wish it
was August!!!
Have to phone
~~Cherry for more soil~~

TARGET
bag - another
250 ? ~~Sept 10/01 - Trade Center
bombed!~~
Return to Eugene R. S. ST
Creek - complete mapping
Canyon - collect more
samples from bedrock.
Lunch 2:30 - 3: Pm
Walk Grid - take
Compass readings
& Alt; measure each
sample hole distance
for mapping of Grid
line.

Return to main
Camp @ 7:30 P.m.

All planes grounded
Canada & U.S.A.

Sept 12/01

Raining once more
All planes still
Grounded -
Held up paperwork
Tim working on
Mapping Canyon
today.

*Visitors came in
Today from the USA
Roger, Mark & Ray.
Roger from Boulder
Colorado, Mark (Lawyer)
and Ray (Rancher,
Black Canyon) from
Wyoming = Go to
do some site seeing
& fishing!
Staying in the cabin!

Sept 13/01

Planes still
grounded. Continue
w/ paperwork. Tim
continues w/ mapping
Other guys out
fishing in the rain!

Fish for supper!
[I don't eat fish - (a
sandwich is mine)]

Sept 13/01

Planes can fly
Tim took off this
afternoon just
before the rain
Started once more!
Dumb over at other
lake fishing - SKUNKED
No fish!!
Yeah! Ham for
Supper!!

Sept 15/01
Camp left first
before lunch - headed
out to highway - going
up mountain @ 89 miles
Jade Mountain!

We got our equipment
ready to go out and
do some more prospecting
Project

* Sept 15/01 R+S
Travelled out to
creek west of camp
Checked for Jade
Boulders - may
have found some
smaller ones! Have
to drill them or
cut a piece off!
(NEXT Project)

Sept 16/01 R+S
Entered Bourget
Creek @ KAT 7+8 -
post #2 claims.
Prospected for Jade
boulders. Found 2
and some smaller
ones. Have to take
samples from them
up.

Sept 17/01
Weather changing.
Cloudy but clearing
Hope the nice
weather holds until
the weekend is over!
Service Argo this A.M.
Pick up Jon this
afternoon.

Sept 18/01 RSS

Wrote back to Kat 748
area - drill boulders
serpentinite - darn!!
Rained all day !! got
soaked -
Creeks rose 1 foot -
2 feet from all the
rain.
Thunder storm came
3 Am - lightning too!
Rained so hard filled
canoe (20') $\frac{1}{3}$ full
before marine light
dimmed & got about
another 5 gal in it
during the day !!

Sept 19/01

Fog right down to
shoreline - raining -
noon rain slowed to
drizzle then mist from
fog supposed to
clear for tomorrow !!

Have Migrane - took pills
hope it goes away within
a couple days! Unable to
work

Sept. 20/01

Migrane still
active - staying
very quiet today.

Sept 21/01 RSS

10 AM
Migrane gone - gone
to drill some more
boulders - NO good ones

RSJ

Sept 22/01
Went to fast rock off
Creek - drilled borehole
BINGO!!

Time to take a
break. Return to
Camp.

Sept 23/01 RSJ

Travel to Watson
Lake -
Groceries, gas ..
Propane -
(Fridge hard on
propane tanks).

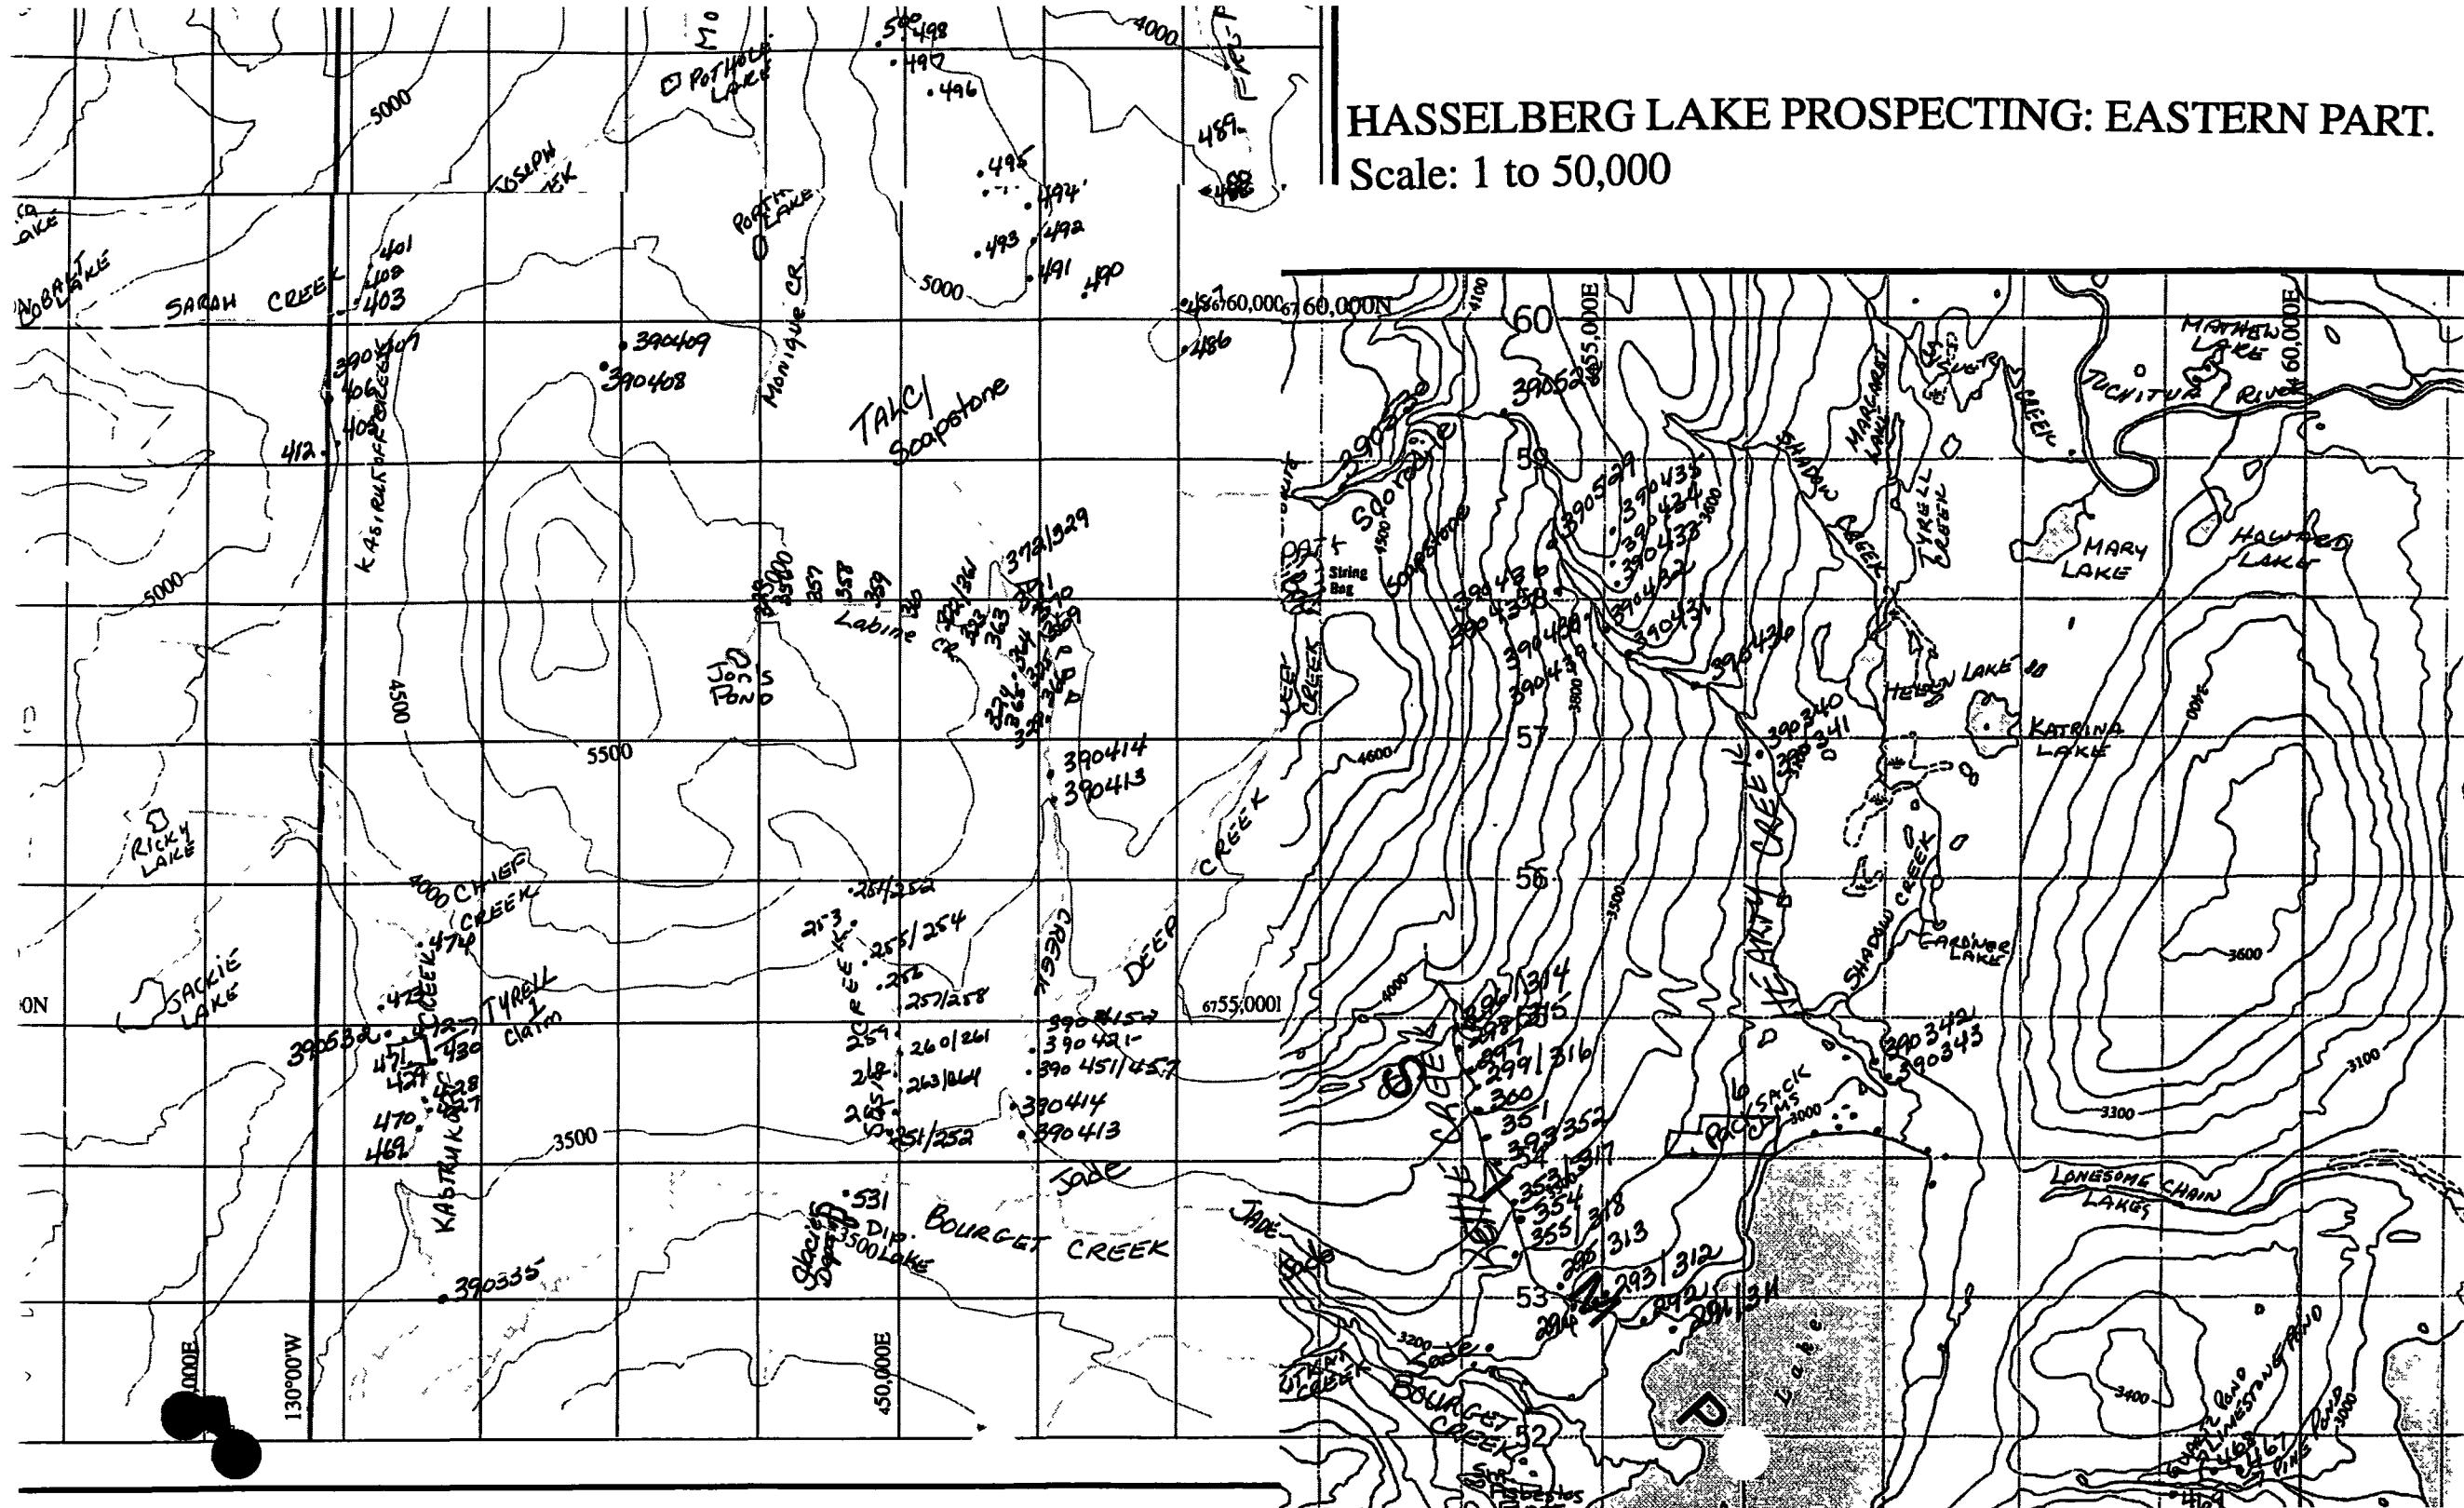

25 Sept 01

Return to Camp Sample
pack up samples / Geophysics
equipment and shut
down camp for this
year!

Project.
P.O. #:Samples submitted to our lab in Vancouver, BC.
This report was printed on 19-NOV-2001.

SAMPLE PREPARATION

METHOD CODE	NUMBER SAMPLES	DESCRIPTION
PUL-31	13	Pulv. <250g to >85%/-75 micron
STO-21	13	Reject Storage-First 90 Days
LOG-22	13	Samples received without barcode
CRU-31	13	Crush to 70% minus 2mm
SPL-21	13	Splitting Charge
229	13	ICP - AQ Digestion charge

* NOTE 1:

The 32 element ICP package is suitable for trace metals in soil and rock samples. Elements for which the nitric-aqua regia digestion is possibly incomplete are: Al, Ba, Be, Ca, Cr, Ga, K, La, Mg, Na, Sr, Ti, Tl, W.

ANALYTICAL PROCEDURES 2 of 2

**ANALYSIS
OF
PROSPECTING RESULTS**

ANALYSIS OF PROSPECTING RESULTS

Overall there were four main gem and metals that were prospected for. The main gem being nephrite jade. Metals ere gold, silver, nickel and copper. Two other minerals were prospected for as well in the region and they were talc and soapstone.

We found that the nephrite jade came from northwesterly direction adjoining our prospecting sector. There were no large deposits of this gem although we did find small boulders of jade bu the quality of the jade was on the lower detection of the grade scale. We found an area that contained a large amount of soapstone/soft serpentine. It was in a loose rock slide area. One would have to trench to bedrock to obtain positive results if it is in place. Prospecting further in this area may give more evidence to the location of the main body of the nephrite jade.

Following along these north northwesterly ridges are three quartzite veins that were well exposed to the elements. They were pure milk white - no metals exposed and showing to the eye within the quartz samples checked. Each of these veins sheered off at the edge of the steep ridges, this gave excellent exposure of the depth of one of them. One of these veins which flows in a north southerly direction has a fracture opening approximately twelve feet across and is approximately eight hundred metres long. The depth of the fracture is approximately three metres. These veins are approximately three metres across and range from one metre in depth and more. Large sections of the quartz from all three exposures had fallen down the slopes of the ridges.

A large area of Slate was noted in this general area. It covered an area of approximately one hundred square metres and runs in the same general direction as the fractured quartz vein and seems to be adjoined to the quartz vein in one sector.

The large ridge (north of one of our camps which was located at the source of the waters for Hearty Creek), on the north side of Hearty Creek approximately a quarter of a kilometre, running in a westerly direction proved to be highly magnetic. Outcrops of bedrock along the north side of the slope were easily accessible and samples were taken. In this area we travelled down to the creek we call Firefly Creek and took samples of the exposed bedrock there. Scorodite covered an area of outcrop in this area. Some core samples should be taken to identify the components underneath the scorodite covering. We returned to the top of the ridge and worked our way over the next few days to the west end of the ridge where it fall down to the valley toward Monique Creek. Samples were taken at intervals along these ridges of outcrops and floats. Sample numbers have been listed on the map attached to this report. The magnetic mineralization is quite large in this area and further prospecting and mapping should be done to confirm the actual size and direction in which it may be travelling.

Scorodite mineralization in Area "B" of the prospecting project covers a major area on both sides of Hearty Creek. This mineralization is located at the 4000 foot level and continues up and past the 4500 foot level. It is of emmence interest to me due to the fact that it is known to be a cover for mineral bodies. Samples of the outcrops, heavy mineral samples and soil sediments were taken along this creek. Assays were done on most of the samples taken and they are attached also to this report.

Area "D" proved to be a large area of soapstone/talc. There is only one small area of pure talc and it does not seem to be a feasible project at the moment to continue with. The outside area of talc and soapstone that is not of the purest form should be further prospected and more assay work done to verify whether it may contain any dangerous fibres such as asbestos.

Located just south of Area "C" between the headwaters of Eugene Creek and Deep Creek in an area of approximately three hundred square metres of tuff. It is well exposed to the elements. Granite boulders can be found in great abundance in Eugene Creek along with small jade boulders, quartz and chalcopyrite sections and serpentine boulders.

Just east of this exposure and on the East side of Deep Creek is are exposures of Basalt.

I prospected the area north of locator 6483 Area "C". I travelled around the base of the peak and over Monique Creek, then up Joseph Creek to the headwaters of Kastrukoff Creek. I prospected this area and took soil sediment/heavy mineral samples and outcrop samples. One of the most interesting things that I found in this general area was a small sample of uverivite crystals. This holds my attention and I will be returning to that area to do more prospecting to try to discover the actual location of the source of these crystals.

The southern section of Kastrukoff Creek proved to hold a good sampling of nephrite jade, serpentine, and soapstone boulders. Along with these were some boulders that contained a large quantity of garnets. The boulders range in size from fifty kilograms to five tonnes. The garnets are very close together and range in colour from pale red to deep red. There are very few clear garnets. Most are smaller than the size of a wooden match head. Samples were taken of these garnets.

Kettle Creek which flows into Hasselberg Lake midway down the western shore was sampled for heavy minerals and soil sediments. The gold potential in this area came in with the following assay amounts: close to the lake 3560 ppb, then up the creek in the following amounts: 760ppb, 140 ppb and thereafter under 100ppb. This area will be reprospected to a greater extent next season to see if a larger concentration of the metal can be located. Of interest large concentrations of chromium were showing on the assays done on this creek. There are three assays within two thousand metres of each other that read greater than 10,000 ppm. I feel that this area should be grid tested for future references. The main area in which the gold concentrations were found are areas covered by fine to coarse gravels and small rocks. Glacial deposits??

The areas prospected showed the expected mineralogy overall. The large deposit of talc, soapstone, and magnetite in Area "C" should be further

prospected and drilled to verify the mineralization located beneath the surface. Results of minimal platinum have shown up on the assays received. (10 ppb being the largest). Silver, nickel, copper, arsenic, and gold showed up at various levels on all samples assayed. One of the higher concentrations of silver came from the Hearty Creek location. It was assayed at 232g/t. Future prospecting of this area is highly advised. This area has not been prospected to its full potential. Sedimentary rock, shale, slate, talc, quartzite, serpentine, jade, soapstone, basalt and tuff make an appearance in more than one area in the prospected areas.

The areas that I had chosen for prospecting came up with points of high interest that will have to be prospected in more depth next season. They are listed as follows:

- 1) Gold concentrations - Kettle Creek Area
- 2) Chromium concentrations - Kettle Creek Area
- 3) Silver concentrations - Hearty Creek Area
- 4) Magnetite concentrations - North of headwaters of Hearty Creek Area
- 5) Scorodite concentrations - Northern section of Hearty Creek Area, both sides
- 6) Jade/Garnets/ concentrations - Kastrukoff Creek Area
- 7) Uvarivite crystals - Kastrukoff Creek Area
- 8) Packsack mtn. Outcrops - Quartz, Limestone and Pine Pond Areas

Future prospecting, sampling both rock, soils, sediments and heavy minerals should be done in all of these areas. Mapping should also be started and completed for them as well.

Enclosed with the final submission are copies of the assay work I had completed this season along with a map showing the location of assay numbers. Another map shows the direction and trails that I utilized for the prospecting I did along with the areas clearly marked. The dates are clearly marked on the trails that I travelled over the prospecting season.

Overall I feel that the prospecting season for 2001 has been a success and has given me more knowledge of my area. Also it has exposed those areas of high interest that I will continue to prospect next season.

FINAL

SUBMISSION

FORM

YUKON MINING INCENTIVES PROGRAM

FINAL SUBMISSION FORM

INSTRUCTIONS: Please read the guidebook before completing form.
Please type or print.

Submit completed form and summary or Technical Report by January 31 for the Grassroots prospecting,
Grassroots Grubstake and for the Target Evaluation programs to:

Yukon Mining Incentives program
Economic Development
Government of the Yukon
Box 2703, Whitehorse, Yukon, Y1A 2C6

**TO BE COMPLETED AFTER PROJECT COMPLETION AND ACCCOMPANIED BY THE SUMMARY OR
TECHNICAL REPORT**

Applicant STELLA HEARTY File Number 049
