Preface

This report is a compilation of designated protected areas in each Canadian province and territory as of April 2001. This compilation was done by the Mineral Resources Branch, Government of Yukon.

The purpose of the study was to compile information on the size and designations of protected areas from other Canadian jurisdictions to assist with Protected Areas initiatives (and other land planning) within the Yukon Territory. The Yukon Geological Survey is pleased to release this information in this report.

The information is being released as originally prepared and may not conform to current Yukon Geological Survey publication standards. Please note that the report does not include information from any jurisdiction after the date the report was written.

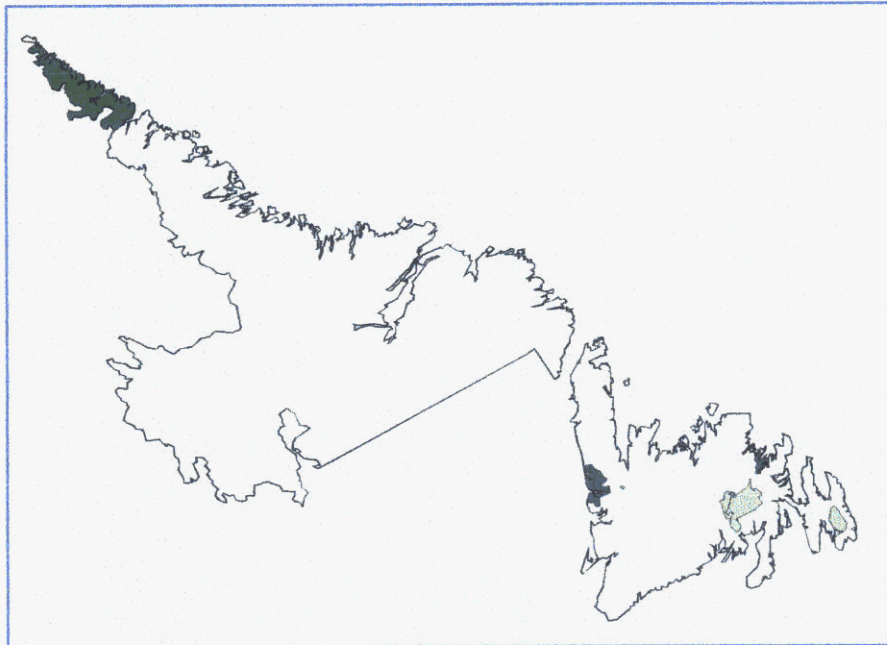

Protected Areas in Canada

April, 2001

Compiled by A. Fonseca
YTG - Mineral Resources Branch

Protected Areas

NEWFOUNDLAND

Park in Labrador

Restrictions to exploration and mining:

- prohibited in provincial and national parks (existing mineral interests, deposits or operations generally being bought out through expropriation or excluded by definition from the parks);
- prohibited in ecological reserves and wilderness reserves unless the activity was in existence at time of reserve creation;
- allowed in wildlife reserves and public reserves under certain conditions

Compensation: Government may (not shall!) negotiate compensation under the Expropriation Act for mineral interests or operations incorporated in reserves.

Newfoundland

Area: 373,872 km²

protected areas

18 wilderness and ecological reserves	4,884 km ² (1.2%)
2 wilderness reserves	
14 ecological reserves	
2 provisional reserves	
13 federally protected lands	2,306 km ² (0.57%)
2 national parks	
8 national historic parks	
3 migratory bird sanctuaries	
25 provincial parks	226 km ² (0.05%)
6 other provincially protected lands	1,376 km ² (0.34%)
3 wildlife reserves	
1 nature park	
1 public reserve	
1 development control area	
proposed Torngat Mountains National Park	9,610 km ²

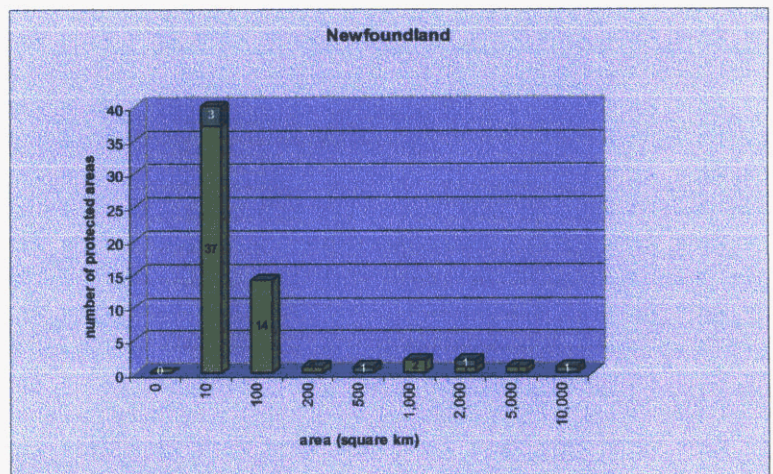

(2.3%)

Total: 18,402 km², or % of the landbase in national and provincial parks, natural areas, and wildlife management areas.
Not all these areas considered Protected Areas.

Protected Areas commitment: to achieve representation of ecoregions. In insular NF, sub-ecoregion representation is being sought.

Target or cap: none; best estimates (based on current plans) is that representation will be achieved with under 12%, but there is no commitment to a particular figure.

Status: currently 4.5% of landbase in protected areas (about half of this in the newly created SMA for the proposed Torngat National

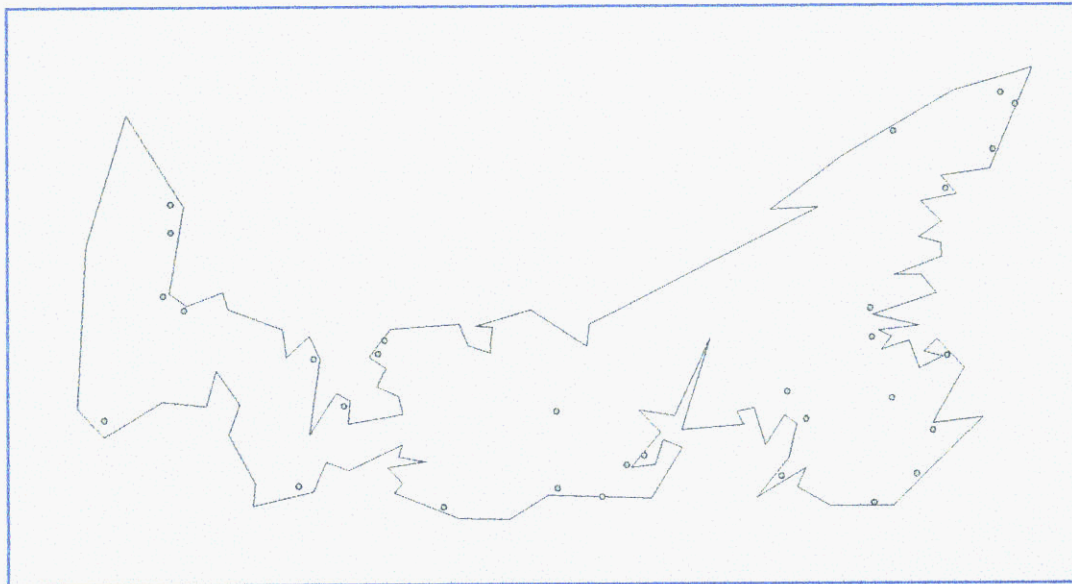

Histogram showing size distribution of protected areas in Newfoundland. Protected areas managed by federal government in dark green, and protected areas managed by provincial government in light green.

Protected Areas

PRINCE EDWARD ISLAND

Prince Edward Island

Area: 5,660 km²

protected areas

-Managed by Federal Government

1 Migratory bird sanctuary	1.3 km ² (0.0.2%)
1 National Park	30 km ² (0.5%)
1 Canadian Heritage River	350 km ² (watershed)
1 Wetland (Ramsar site)	244 km ² (4.3%)

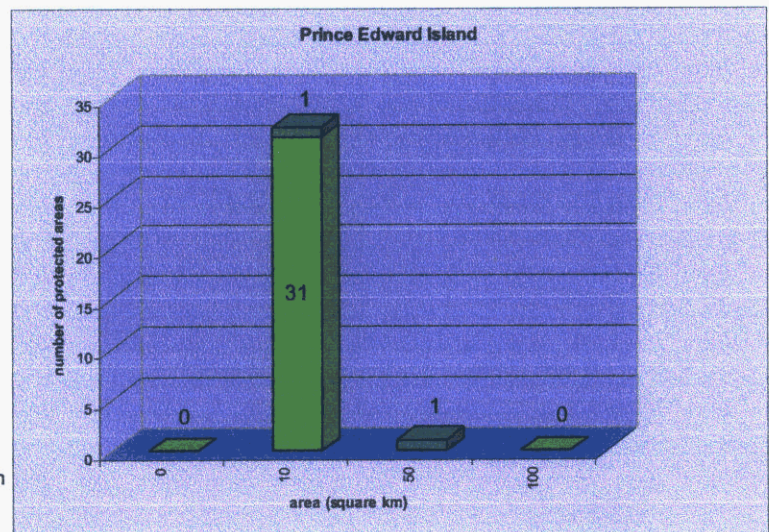

-Managed by PEI Government

29 Provincial Parks	1.75 km ² (0.03%)
1 Provincial Ski Park	16.3 km ² (0.3%)
1 Wildlife Management Area	3.16 km ² (0.06%)

Total: 297 km², or 5.2% of the landbase in parks plus 594 km² in map notation (heritage river and wetland). Not all these areas considered Protected Areas.

Protected Areas commitment: to achieve representation of natural landscapes.

Target or cap: 7%; PEI government endorsed it and informed the WWF they would meet this target. 12% was originally considered, but only 10% of PEI was crown land at the time.

Histogram showing size distribution of protected areas in PEI. Protected areas managed by federal government in dark green, and protected areas managed by provincial government in light green.

Protected Areas

NOVA SCOTIA

Nova Scotia

Area: 53,338 km²

protected areas

-Areas managed by Federal Government

7 Migratory Bird Sanctuaries	38 km ²
5 National Wildlife Areas	17.3
2 National Parks	1,353 km ²
3 Wetlands/Ramsar Site	523 km ²
15 National Historic Parks	?
2 Canadian Heritage River	1,443 km ² (watershed)

-Areas managed by Provincial Government

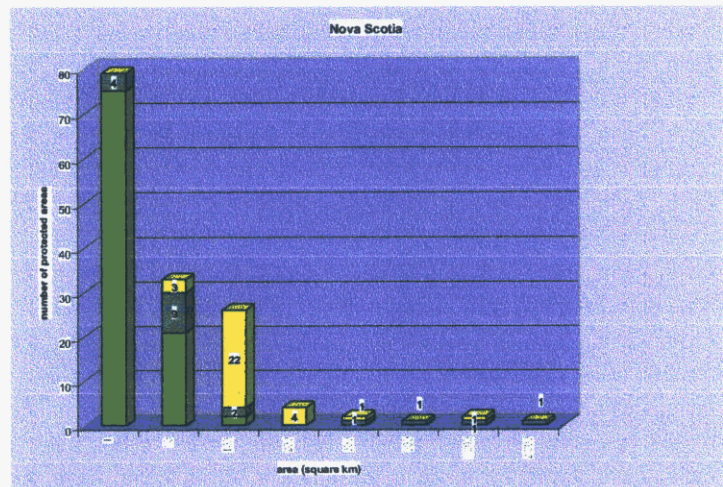

98 Provincial Parks	152 km ²
31 Wilderness Areas	2,868 km ²
1 Wildlife Park	0.4 km ²

Total: 4,951 km² or 9.3% of the landbase (heritage rivers not included). Not all considered protected areas.

Protected Areas commitment: to achieve representation of natural landscapes

Target or cap: 12%; only 20% crown land.

Status: approximately 1/3 of the landscapes well represented by March 2001

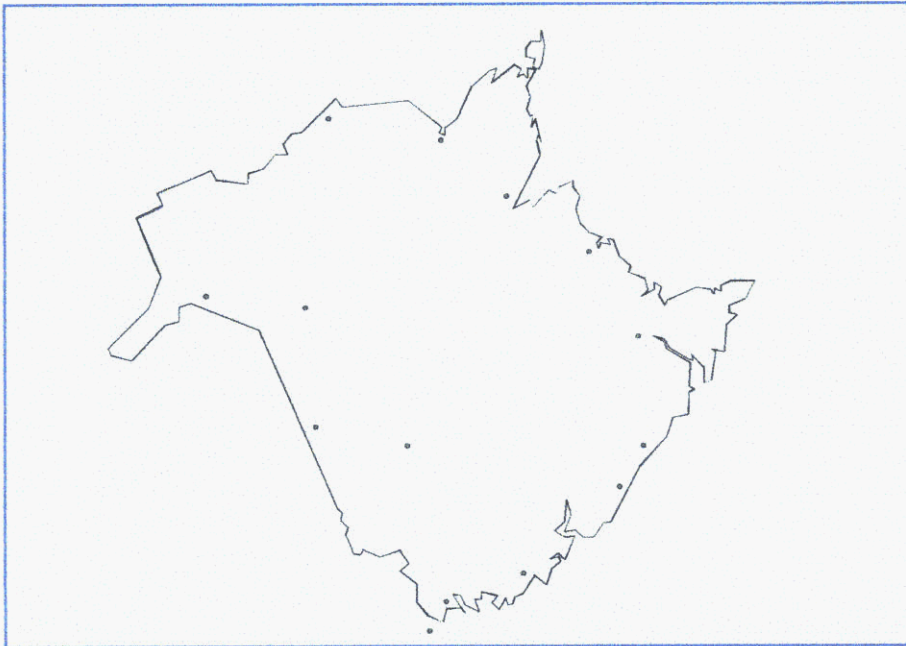

Histogram showing size distribution of protected areas in Nova Scotia. Protected areas managed by federal government in dark green, and protected areas managed by provincial government in light green. Protected Areas Strategy sites in yellow

Protected Areas

NEW BRUNSWICK

were refused due to conflicts with economic interests. In mid-March, 2001, NB's government released a revised list of 25 sites that are interim protected. The sites make up to 2,101 km², or approximately 2.8% of the province's landbase.

Restrictions to mineral exploration and mining: All protected areas strategy sites and federally managed sites are fully withdrawn from all types of development activity, but hunting is allowed in some sites. Government's directive is that existing mineral tenure is to be excluded from park boundaries in all cases.

New Brunswick

Area: 73,440 km²

Protected areas

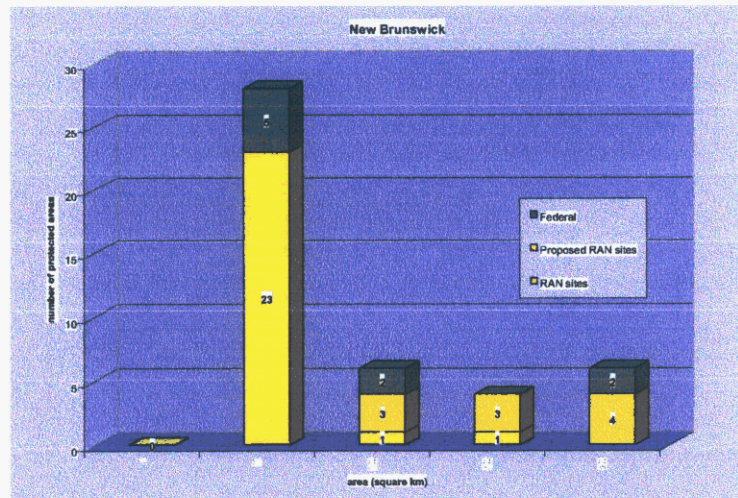

-Managed by Provincial Government (1.84%)	
provincial parks	162 km ² (0.22%)
ecological reserves	7 km ² (0.01%)
conservation areas	59 km ² (0.8%)
representative areas strategy	1,513 km ²
(2.06%)	
other areas	198 km ²
(0.27%)	
-industrial park, marine park, etc	
-Managed by Federal Government (1.84%)	
2 national parks	445 km ²
5 national historic sites	?
2 migratory bird sanctuaries	2.6 km ²
5 national wildlife areas	62 km ²

Total: 2.78% of the landbase under some form of protection or map notation. Only 2.06% of the landbase in interim protected lands for the representative areas network.

Protected Areas Commitment: The Province of New Brunswick has committed to establishing a network of protected areas by the year 2005. Meeting this commitment will ensure that portions of New Brunswick will be left with little or no human disturbance to help maintain ecological integrity and biological diversity, serve as benchmarks and represent the Province's natural landscape.

Target: The areas proposed in the strategy would add another 2.1% protected areas, raising NB's contribution to 3.5% of the lands as highly protected areas, which is more in line with other jurisdictions in Canada and North America.

Status: Ecological value analysis was contracted to Dr. LaPierre, who identified 16 areas in an initial proposal. 8 sites

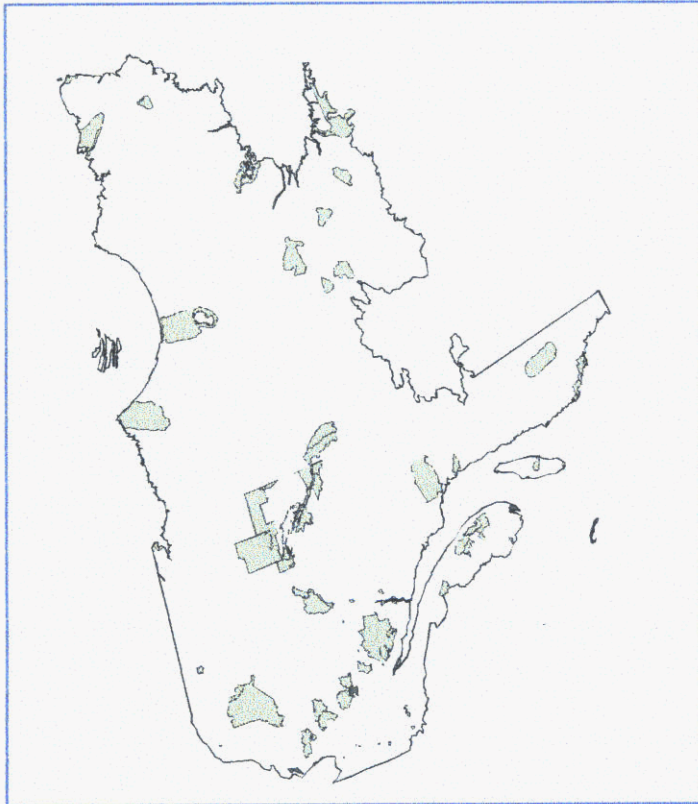

Histogram showing size distribution of protected areas in NB. Protected areas managed by federal government in dark green. Representative Areas Network Sites are shown in yellow (approved and regulated) and orange (proposed)

Protected Areas

QUEBEC

or 8.5% of the landbase is managed lands (Community wildlife areas, Research forests, Experimental forests, Wildlife reserves, Forestry stations, and Controlled development zones), which do not have restrictions on mineral exploration and mining.

Proposed protected areas (interim protected):
 20 proposed parks (designation uncertain) 58,354 km²
 4 proposed ecological reserves 608 km²

Total: 3.5% of the land base interim protected for proposed parks or ecological reserves.

Target: The Quebec Government committed to protect 8% of its landbase by 2005.

Protected areas commitment: In 1996, Quebec Government adopted a strategy and action plan to conform to the International Convention on Biodiversity. The objectives were:

- to develop the knowledge base necessary to establish a conservation network;
- to establish and maintain a network of representative areas (representative of the 13 natural provinces) necessary to preserve biodiversity;
- to reinforce the existing conservation management in order to ensure biodiversity.

Status: 2.84% of the landbase is protected. The Strategy is still in drafting stage.

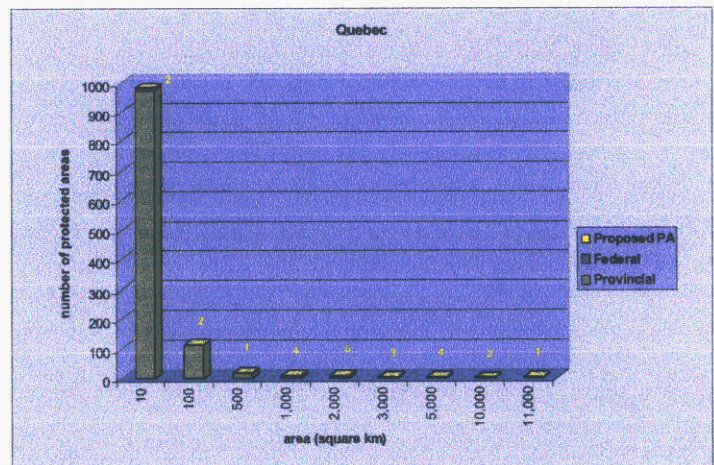

Quebec

Area: 1,667,900 km²

Protected Areas

-Managed by Federal Government	
2 National capital Commission park	359 km ²
2 National historic parks	2 km ²
3 National park and national park reserve	931 km ²
27 Migratory bird sanctuaries	508 km ²
8 National Wildlife Sanctuary	54 km ²
-Managed by Provincial Government	
27 Endangered species habitat	0.9 km ²
93 Wildlife habitat	37,385 km ²
1 Marine protected area	
1,138,000 km ²	
1 Natural area (prot. educational institution)	11 km ²
32 Recreational, touristic, conservation park	129 km ²
18 Provincial parks	4,404 km ²
7 Urban parks	11 km ²
5 Wildlife Refuge	17 km ²
58 Ecological Reserve	703 km ²
162 Salmon Rivers	?
28 Sites protected by the QWF	26 km ²
56 Sites protected by private institutions	49 km ²

Total: 45,875 km², or 2.84% of the landbase under various protected areas designation. Only 0.5% of the landbase is in protected areas where mineral exploration and development is prohibited. Another 141,592 km²,

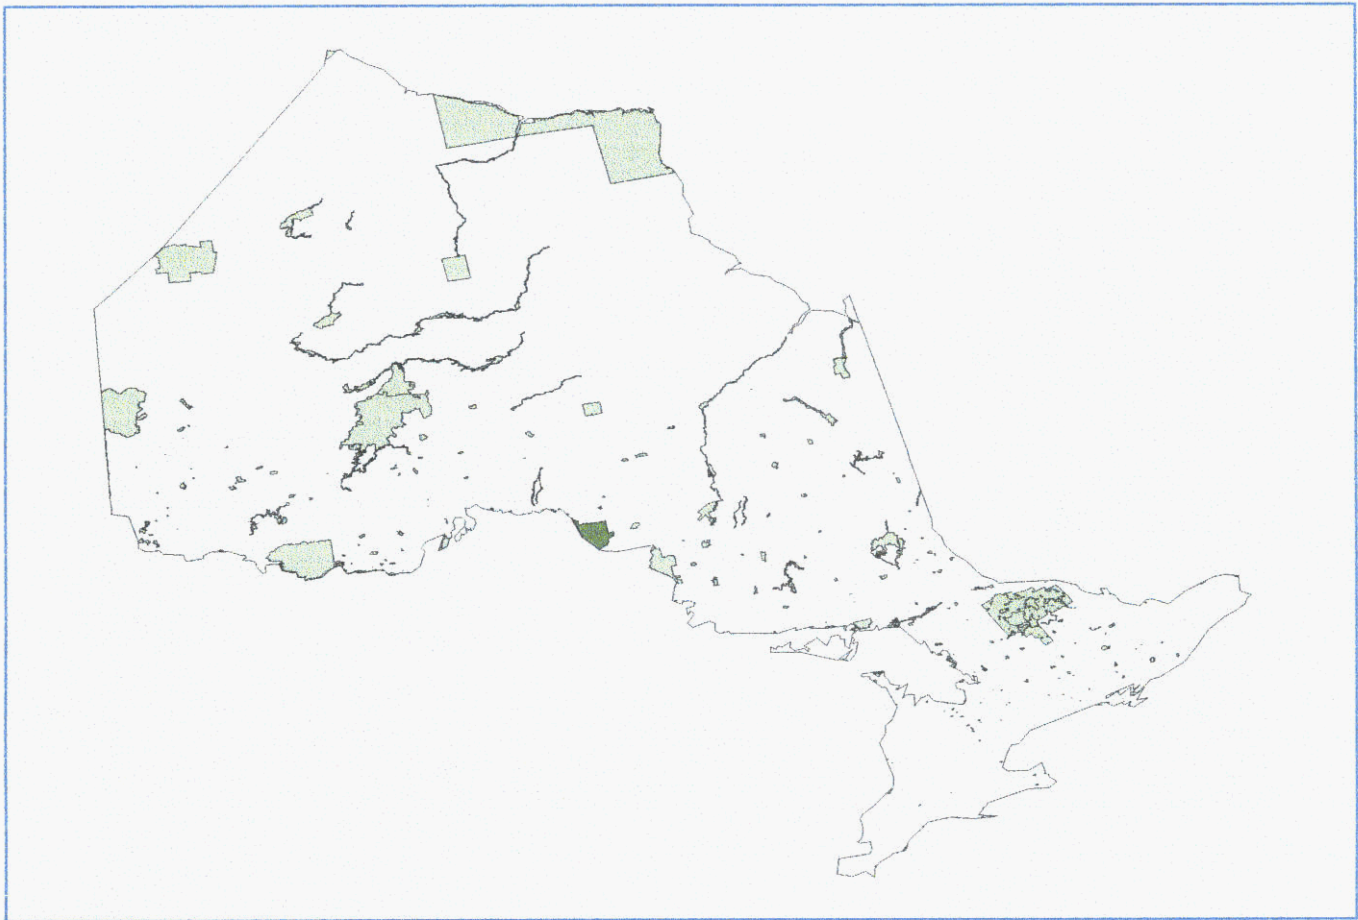

Histogram showing size distribution of protected areas in Quebec. Protected areas managed by federal government in dark green. Proposed Protected Areas sites are shown in yellow.

Protected Areas

Ontario

Area: 1,076,395 km²

Protected areas:

-Managed by Federal Government

5 national parks	2,082 km ²
1 national marine park	112 km ²
23 national historic sites	?
2 Ramsar sites	?
10 national wildlife areas	49 km ²
8 migratory bird sanctuaries	362 km ²

-Managed by Provincial Government

80 regional conservation areas	>143 km ²
293 provincial parks	70,490 km ²
68 natural environment parks	11,953 km ²
3 provincial historical parks	20 km ²
91 nature reserves	919 km ²
6 other provincial parks	83 km ²
70 recreation parks	400 km ²
37 wilderness parks	57,115 km ²
46 Ontario's Living Legacy sites	666 km ²
1 wildlife management area	52 km ²
444 proposed OLL sites	39,677 km ² (3.6%)

Total: 73,956 km² in some form of protection or map notation, plus 39,677 km² under map notation of proposed Ontario Living Legacy site.

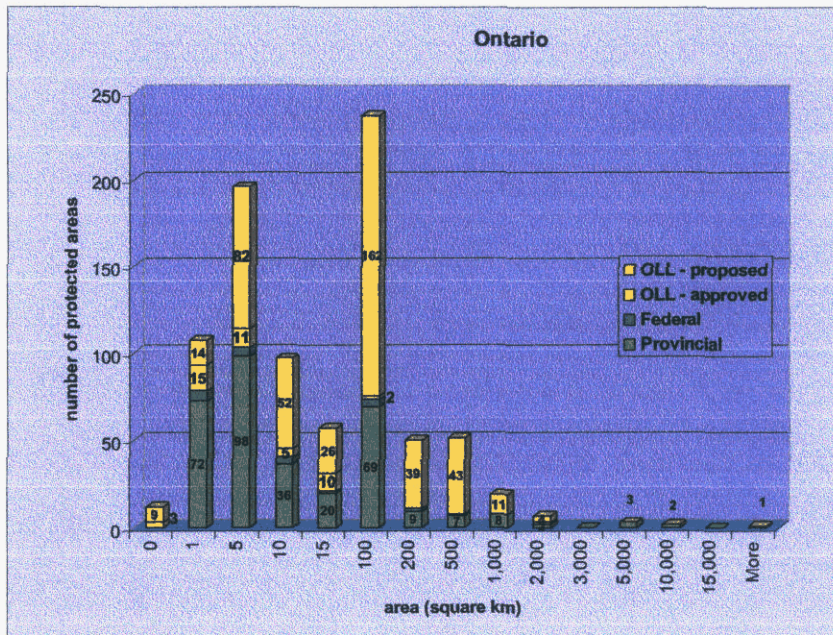

Protected areas commitments: Ontario's Living Legacy Land Use Strategy, approved in July 1999, enlarges the protected areas system by 2.4 million hectares (4.5% of the landbase), bringing Ontario to 12% protected. Mineral exploration and development is allowed in all new parks.

The strategy has four goals:

- completing Ontario's system of parks and protected areas;
- recognizing the land use needs of the resource-based tourism industry;
- providing forestry, mining, and other resource industries with greater land and resource use certainty, and;
- enhancing angling, hunting, and other Crown land recreation opportunities.

Target: 12% of the landbase protected upon completion of OLL.

Status: Currently, 7.5% of the province's landbase is considered protected. 46 new sites were regulated, 3 new sites have boundary refinement consultation complete; 187 sites are currently subject to

Histogram showing size distribution of protected areas in Ontario. Protected areas managed by federal government in dark green. Proposed Ontario Living Legacy sites are shown in orange, and approved OLL sites are shown in yellow.

boundary refinement consultation; 155 sites have not been put through the regulation process but will be completed over the next three years.

Restrictions on exploration and mining

Provincial parks and conservation reserves in existence before Ontario's Living Legacy do not allow exploration and development (although pre-existing mineral rights were grandfathered). New parks and conservation reserves created through the Ontario's Living Legacy strategy allow for controlled mineral exploration in areas with provincially-significant mineral potential.

Provincially significant mineral potential

Not only will the Ontario government respect the existing rights of all forms of mining land tenure in the new parks and conservation areas, but low impact staking and exploration will be allowed in unclaimed areas for deposits of provincially significant mineral potential located inside new parks and conservation reserves.

Floating reserves

If new discoveries are made in areas of provincially significant mineral potential, areas of a park may be removed due to mining development within the park boundary. In theory, another comparable area would be selected to replace the protected area lost to mining.

The case of Kawartha Highlands

The Lands for Life process expanded the Kawartha Highlands Provincial Park from 18 km² to 335 km². Within the park's boundaries there are active mineral claims, and currently opportunities are being identified for controlled mineral exploration within the new protected area. If new minerals are discovered, this could mean that areas of Kawartha Highlands Provincial Park may be exchanged for temporary park lands which may or may not be adjacent to the Kawartha Highlands Provincial Park. If a deposit is discovered and taken into production, the area containing the deposit would be only be returned to the park when the reserves are exhausted.

Ontario's parks system

Ontario's Provincial Park Planning and Management Policies establish the size and distribution criteria for wilderness, natural environment and waterway class parks. Number and distribution of parks is determined by the number and distribution of the province's site regions and districts. Theoretically, one wilderness park is established in each site region, while a natural environment and waterway park are established in each site district.

Provincial park categories (Provincial Parks Act has six park classes)

-Wilderness class parks: Target is to establish one wilderness park or equivalent sized national park, and one complementary wilderness zone in each of Ontario's 13 site regions. Wilderness parks should exceed 1,000 km², while wilderness zones should be greater than 20 km².

11 wilderness park targets and five wilderness zone targets have been met.

-Natural environment class parks: The target is to establish one 20 km² park or an equivalent size wilderness zone in each of Ontario's 65 site districts. 56 of 65 natural environment class park targets have been achieved. Parks in 16 of 56 districts, however, fall short of the minimum 20 km² size criteria for natural environment parks.

-Waterway class parks: The target for waterway class parks is to establish one waterway park, or an equivalent waterway corridor, traversing each of Ontario's 65 site regions. 37 of 65 waterway class park targets have been achieved.

-Nature reserve class parks: Targets for nature reserve class parks are defined by scientific based earth science and life science classifications. They are selected to represent natural features and ecosystems not found in other park classes. Currently, 88 provincial nature reserves and 263 nature reserve zones in other park classes incorporate 3,810 km² of lands and waters.

-Historical class parks: Targets for historical class parks are defined by an archeologic and historic-based classification. Less than one half of all desired cultural resources have been secured by provincial parks.

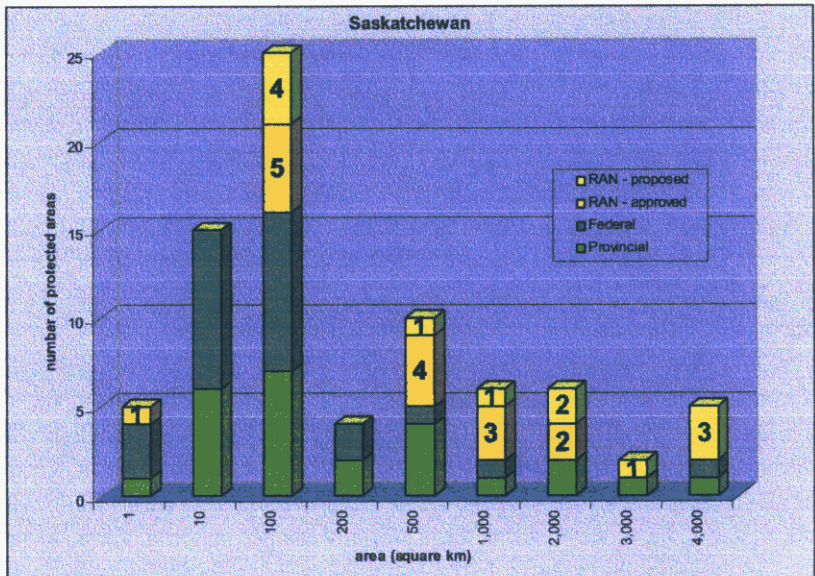

-Recreation class parks: The target is to provide residents and visitors with appropriate levels of day use and facility-based camping opportunities. Selection and operation of recreation parks and the provision of outdoor recreation opportunities is related to regional population distribution and demands. The existing parks are being re-evaluated to determine whether they adequately satisfy current outdoor recreation demands.

Protected Areas

SASKATCHEWAN

Histogram showing size distribution of protected areas in Saskatchewan. Protected areas managed by federal government in dark green. Proposed Representative Area Network sites are shown in yellow, and approved RAN sites in orange.

Saskatchewan

Area: 651,036 km²

Protected areas

-Managed by Federal Government	
15 Migratory Bird Sanctuaries	616 km ²
2 National Parks	4,775 km ²
8 National Wildlife Areas	211 km ²
1 Ramsar Site	156 km ²
4 National Historic Parks	?
15 RAN Sites	7,273 km ²
-Managed by Provincial Government	
25 Provincial Parks	11,479 km ²
11 Natural Environ.	(6,776 km ²)
10 Recreation P.	(147 km ²)
4 Wilderness P.	(4,556 km ²)
12 proposed RAN Sites	16,487 km ²
9 Provincial Historic Parks	3 km ²
? Wildlife Habitat Protection Act Land	13,189 km ²
? Wildlife Development Fund Land	560 km ²

Total: 41,003 km² or 15.8% of the landbase under protection or map notation. 9.81% of the landbase consists of existing and proposed RAN sites.

Protected areas initiative: RAN – Representative Areas Network

Protected areas commitment: RAN Draft Action Plan released in December 1996 committed to the goal "To conserve Saskatchewan's native biological diversity and natural resources by protecting and managing a system of areas which represent the full range or our native ecological systems by the year 2000. Included within this is the maintenance of the three basic levels of diversity: genetic, species and ecosystem.

Target or cap: none

Goal: To represent the province's biological diversity found within Saskatchewan's 11 ecoregions. Ideally, each ecoregion should have at least one very large (>1,000 km²) and several smaller representative areas in order to ensure complete ecosystems are preserved, along with unique features.

Status: 7.3% of the landbase in RAN sites

Restrictions to exploration and mining:

The Saskatchewan Government Dept. of Energy and Mines places crown reserves that prohibits new mineral and oil & gas dispositions in national and provincial parks (includes all RAN sites). Wildlife Habitat Protection Act lands, Wildlife Development Fund lands, Community Pastures, and Prairie Farm Rehabilitation Administration lands have lower levels of protection that allow for exploration and development. These areas are open to disposition, and are managed to maintain ecological integrity.

Protected Areas

ALBERTA

Histogram showing size distribution of protected areas in Saskatchewan. Protected areas managed by federal government in dark green. Proposed Representative Area Network sites are shown in yellow, and approved RAN sites in orange.

protected areas to preserve the environmental diversity of the province's 6 natural regions and 20 subregions by the year 2000.

Target or cap: none

Status: Nearly 13,000 km² were added to the province's network since 1995.

Classes of Protected Areas under the Special Places Program

Ecological Reserves

Samples of functioning ecosystems protected for scientific research, education, heritage, appreciation and to preserve genetic stocks.

Wilderness Areas

Large areas that retain their primeval character, unaffected by human influences. Visitors travel on foot to experience solitude and personal interaction with nature.

Provincial Parks

Areas containing provincially significant natural and historical landscapes and features. A range of facilities along with interpretive and educational programs enhance the opportunities for Albertans and tourists to explore, understand, appreciate and respect the natural environment and contribute to Alberta's growing tourism industry.

Wildland Parks

Large areas of natural landscape that cater to ecotourism and adventure travel. Interference with natural processes are minimized. Wildland Parks similar to Willmore Wilderness Park accommodate hiking, fishing, and the use of horses.

Natural Areas

Special and sensitive natural landscapes of local and regional significance are protected while providing opportunities for education, natural appreciation and low-intensity recreation. Facilities are limited to staging areas, trails and signs.

Recreation Areas, Forest Land Use Zones and Areas designated by Policy

A wide range of intensive recreation pursuits and tourism facilities are supported in modified or man-made settings. These areas make contributions to the preservation goal, but are also important to the Outdoor Recreation and Tourism/Economic Development goals of Special Places

National Parks and National Wildlife Areas

Existing protected areas that make important contributions to goals of Special Places.

Alberta

Area: 642,317

Protected areas

-Managed by Federal Government	
4 Migratory Bird Sanctuaries	156 km ²
5 National Parks	54,084 km ²
4 National Historic Sites	?
3 National Wildlife Areas	4 km ²
3 Wetlands – Ramsar Sites	3,894 km ²
-Managed by Provincial Government	
16 Ecological Reserves	294 km ²
152 Natural Areas	1,492 km ²
67 Provincial Parks	2,045 km ²
262 Recreation Areas	820 km ²
3 Wilderness Areas	1,010 km ²
28 Wildland Parks	10,369 km ²
1 Wilderness Park	4,597 km ²

Total: 80,734 km², or 12.6% of the landbase under some form of designation. Not all withdrawn from staking, and not all considered protected areas.

Protected Areas Initiative: Alberta Special Places - policy and implementation plan approved in 1995

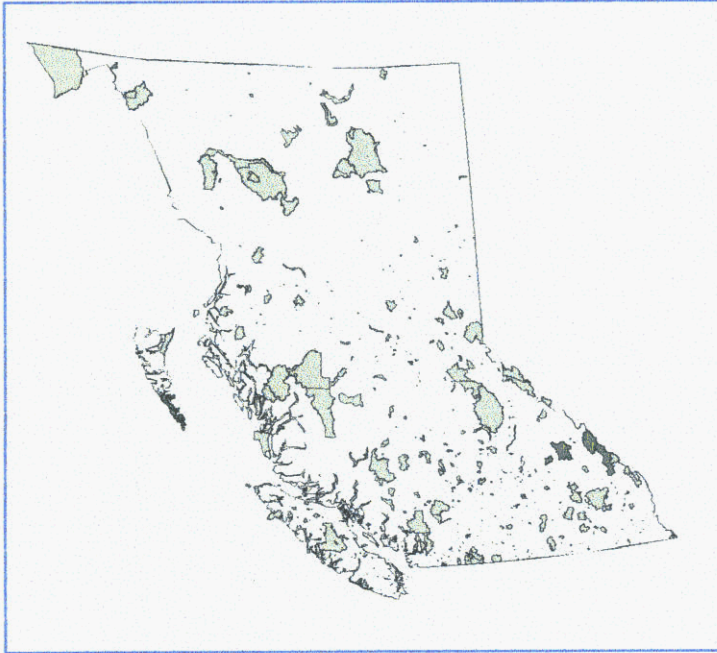

Protected Areas commitment: To complete a network of

Protected Areas

BRITISH COLUMBIA

Ontario

British Columbia

Area: 944,735 km² (water included)

Protected areas

-Managed by Federal Government

7 national parks	9,373 km ²
5 national wildlife areas	23 km ²
7 migratory bird sanctuaries	3,090 km ²
7 national historic parks?	
4 Canadian heritage rivers	?

-Managed by Provincial Government

587 class A provincial parks	87,103 km ²
2 class B provincial parks	38 km ²
18 class C provincial parks	5 km ²
147 ecological reserves	1,669 km ²
11 protected areas	4,168 km ²
15 public reserves	6,141 km ²

Total: 117,000 km², or 11.8% in national and provincial protected areas.

Protected Areas commitment: The BC Protected Areas Strategy states:

British Columbia is committed to developing and expanding a protected areas system that will protect 12% of the province by the year 2000.

The target of 12% will be made up of protected areas, including land and freshwater or marine areas that are set aside to protect the province's diverse natural, cultural heritage and recreational values. Protected areas are inalienable: the land and resources may not be sold. They are also areas in which no industrial extraction or development is permitted. No mining, logging, hydro dams or oil

and gas development will occur within protected areas.

Target: 12% of the province's landbase.

Status: BC government announced in Nov. 2000 (with the approval of the Mackenzie LUP) that it met its goal of protecting 12% of BC. BC achieved 12% of the landbase target by 2000. protection More than 117,000 km² is in parks and protected areas. However, only 27% of the BC's "ecosections" have more than 12% of their land protected. This is because there was a bias towards protecting mountain peaks. Currently BC's PAS is concluded, and the province is proceeding with its strategic land use plans.

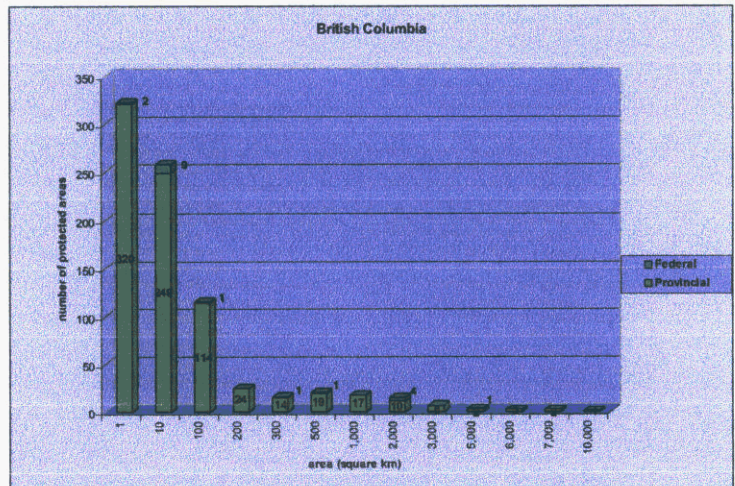

Ecosection representation

- 1 has 0% protection
- 10 have less than 1% protected
- 22 have 1% to less than 4% protected
- 21 have 4% to less than 8% protected
- 10 have 8% to less than 12% protected
- 36 have more than 12% protected

LPRMs: After completion of the protected areas strategy, BC will continue with its strategic land use plans. According to the Land Use Coordination Office, an estimate of total protected area in BC after all LRMPs are done is difficult to calculate, but looking at what areas could be added (based on official study areas, areas of high values identified by government staff, and areas of interest to ENGOs and communities), a low estimate/projection is 13.1% of the landbase.

Provincial park categories:

The current Park Act restricts alienation of interests for Class A or C parks.

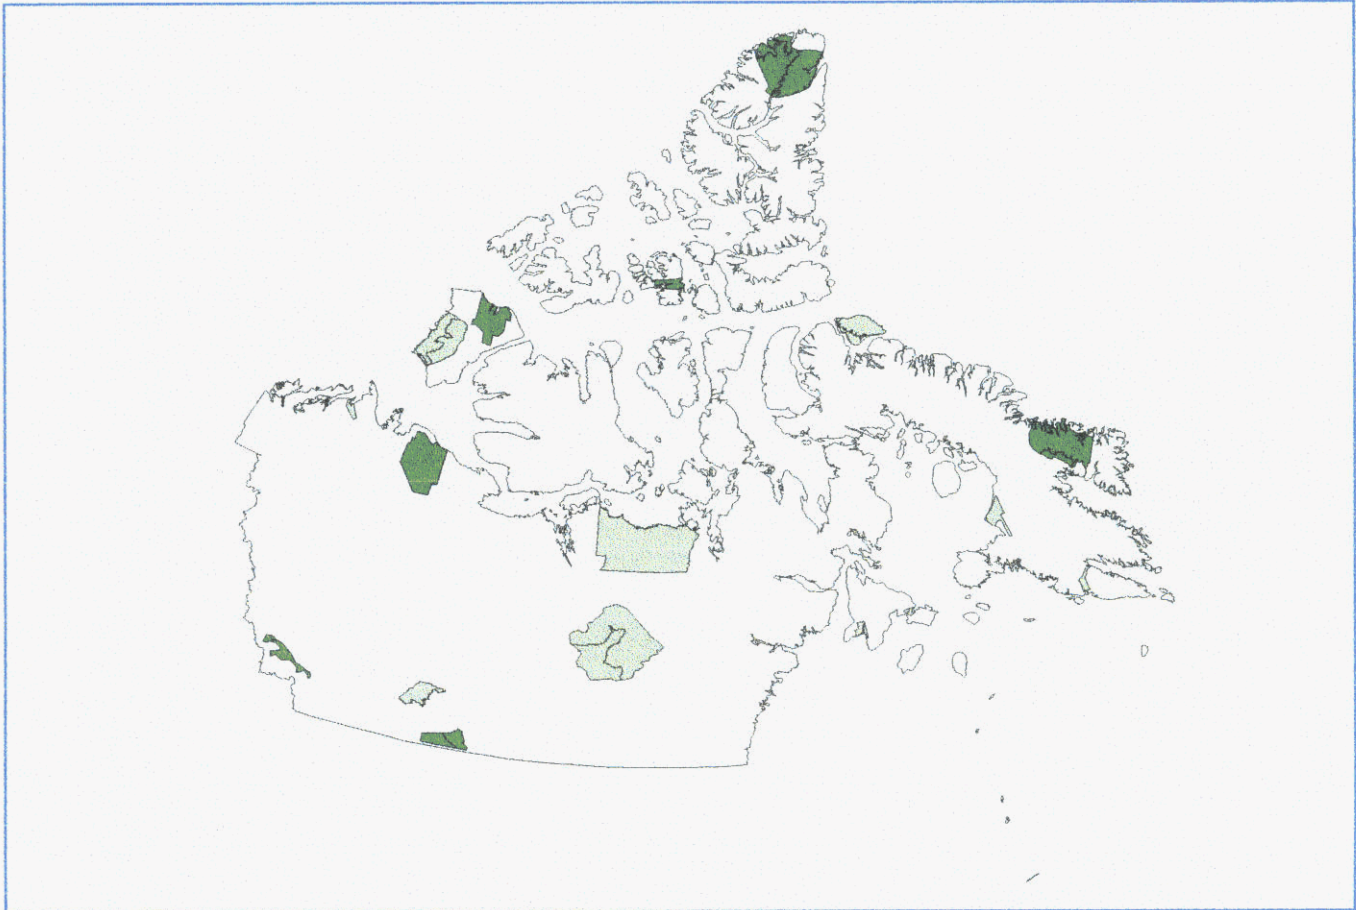

Histogram showing size distribution of protected areas in BC. Protected areas managed by federal government in dark green.

1 travel development area	?

Total:

Protected areas commitment: In August, 1996, the federal and territorial governments committed to the completion of a PAS. The PAS identifies areas representative of each ecoregion by dividing the ecoregion into smaller sections called landscape units.

Target: none

Guidelines for adequate landscape unit representation:

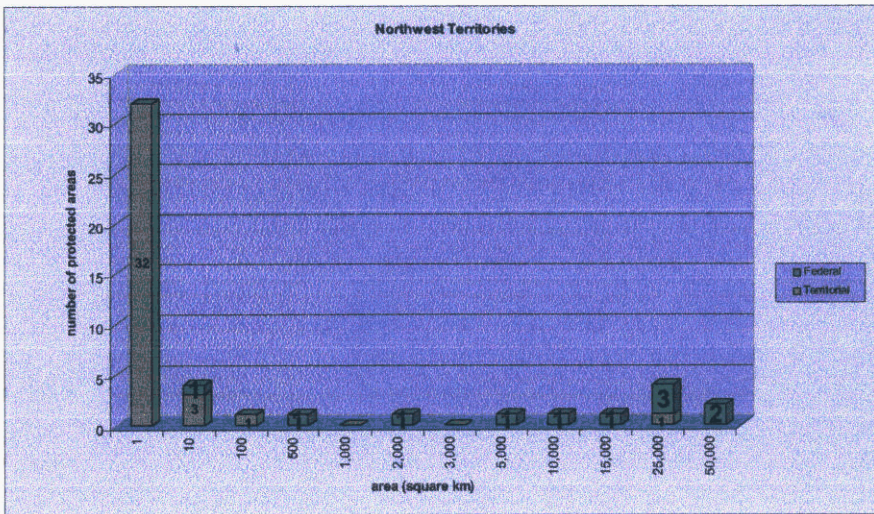

-Small landscape units (<100 km²) Adequate representation may require that the entire landscape unit be protected, especially if the landscape unit is smaller than 10 km². Adequate representation requires the protection of adjacent landscape units to preserve integrity of the smaller unit.

-Medium landscape units (100 to 5,000 km²) Adequate representation may be achieved by protecting representative portions of the landscape units. For the larger landscape units it may be sufficient to protect a significant portion. Medium-sized landscape units are less vulnerable to loss of habitat integrity; protection of adjacent landscapes may be required if there are significant links with these that enhance the habitat integrity of the unit.

-Large landscape units (>5,000 km²) Adequate representation may be achieved by protecting a portion of the landscape unit in one or more protected areas that are each larger than 1,000 km². The protection of adjacent landscape units may be required if there are significant links with these that enhance the habitat integrity of the unit.

- 2 territorial historic sites/trail ?
- 1 restricted development zone ?
- 8 territorial historical/archeological parks/sites ?
- 1 territorial heritage river
- 9 territorial parks >2,500 –uncertain if exploration and staking allowed

- 1 territorial marine park
- 1 territorial wildlife sanctuary

Total: ~303,000 km² or 15% of the landbase in some form of protection or map notation.

Inuit lands: 356,000 km² are Inuit-Owned Lands. Of these, the Inuit First Nation owns surface rights only over 318,086 km² and surface and subsurface rights of 37,882 km². This is a Final Agreement.

Protected areas strategy: There is a PAS under discussion, although nothing is in case yet.

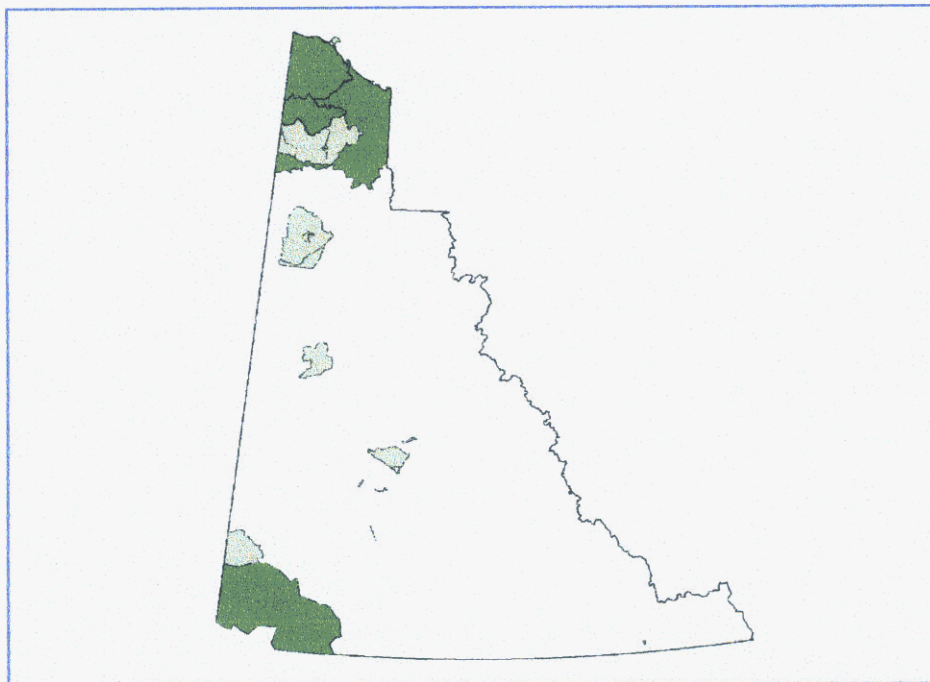

Histogram showing size distribution of protected areas in Nunavut. Protected areas managed by federal government in dark green.

Protected Areas

YUKON

Yukon

Area: 483,450 km²

protected areas

-Managed by Federal Government

3 national parks	36,230 km ² (7.5%)
3 Canadian heritage river	?
1 nominated Canadian heritage river	
5 national historic sites	?
1 Wetland (Ramsar site)	6,170 km ²
1 North Yukon IP	15,592 km ²

-Managed by Territorial Government

5 Territorial Parks	10,634 km ² (2.2%)
9 SMAs	9,791 km ² (2%)
10 proposed SMAs (approved)	8,942 km ² (1.85%)
2 prop. SMAs (not approved)	1,589 km ² (0.3%)

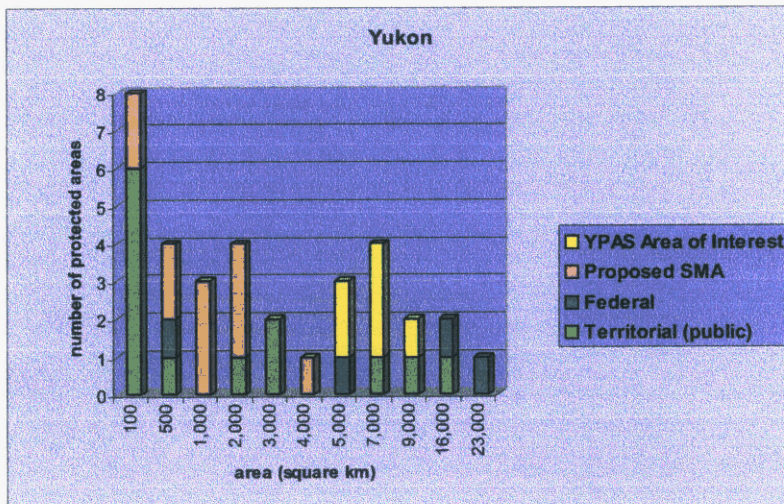

-YPAS areas of interest 36,233 km²

Total: 88,948 km², or 18.4% of the landbase in parks or map notation (heritage river and wetland).

Protected Areas commitment: to achieve representation of Yukon's 23 ecoregions. See new ecoregion map.

Target or cap: none

Status: 7 ecoregions adequately represented (YPAS planning ongoing in two of these); 6 ecoregions have some representation (one of these has 23% in parks, another has 11% in parks); 10 ecoregions considered unrepresented.

Histogram showing size distribution of protected areas in Yukon. Protected areas managed by federal government in dark green, and protected areas managed by provincial government in light green. Proposed SMAs in magenta, and proposed YPAS areas of interest in yellow.
