

Data sources:
 Base data: 1:1M DCW (ESRI); 1:250,000 topography, 500m shaded relief (Yukon Environment) Thematic data: 1:250,000 planning regions (NYPC); Old Crow traditional knowledge wildlife database (VGFN community wildlife workshop, November 2004), 1:250,000 provincial boundaries, 1M parks/protected areas (Yukon Environment); Yukon Wildlife Key Area Inventory (Yukon Department of Environment, 2005). Digital database and software produced by NatureServe Yukon, Fish and Wildlife Branch, Department of Environment, Government of Yukon, Whitehorse

Data disclaimer:
 This map is a graphical representation, which depicts the approximate size, configuration and spatial relationship of known geographic features. While great care has been taken to ensure the best possible quality, this document is not intended for legal descriptions and/or to calculate precise areas, dimensions or distances. We do not accept any responsibility for errors, omissions or inaccuracies in this data.

Disclaimer:
 Wildlife Key Areas (WKAs) are compiled by the Yukon Department of Environment WKA Inventory Program (2009) against a 1:250,000 NTDB from various data sources. Key Areas are based on observed locations of wildlife at key times of year, not on habitat assessment. With new information, boundaries and designations of Key Areas can change and additional Key Areas can be identified. Furthermore, Key Areas are not the only sites important for wildlife. Other information sources can identify other sites important for wildlife for reasons outside the scope of the WKA Inventory Program. Updates to Key Areas occur only periodically. For the most current information, please consult with the Regional Biologist for your area of interest. If you have questions or would like to contribute to the WKA database, please contact the WKA Inventory Program (wka@gov.yk.ca).
